BIOX1310

Unit description
This unit introduces students to the essential concepts in current biology. BIOL1310 forms the first step for students pursuing a career in the biological sciences, and provides a basis for students in other disciplines who wish to maintain an interest in this dynamic field. The theme of this unit is evolution. The first part of the unit is concerned with the origin of life and discusses current theories on how life may have arisen on a previously lifeless planet. We discuss evolutionary theory in detail including some of the genetic principles that underlie evolution. In the second part we introduce the major groups of organisms examining their diversity and how they function. In the final part we discuss the ecological interactions between organisms from the small scale to global patterns. Throughout the unit, these core concepts are illustrated with examples from current research. BIOL1310 is designed as a companion unit to BIOL1110 in Session 2.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at https://www.mq.edu.au/study/calendar-of-dates
Learning Outcomes

On successful completion of this unit, you will be able to:

- **ULO1**: Define evolution and describe its main mechanisms
- **ULO2**: Define the major evolutionary transitions of organisms on earth
- **ULO3**: Differentiate the main groups of organisms and interpret their evolutionary relationships
- **ULO4**: Contrast major ecological processes and describe biogeographical patterns
- **ULO5**: Synthesise experimental results and information from the scientific literature to prepare a scientific report
- **ULO6**: Demonstrate foundational learning skills including active engagement in the learning process

General Assessment Information

1. **Requirements to Pass this Unit**

To pass this unit you must:

- (a) Participate in, and undertake all hurdle activities for, a minimum of 7 of the 10 scheduled weekly practical classes, and
- (b) Achieve an overall assessment mark equal to or greater than 50%

**Hurdle assessment - participation in unit practicals**

The development of knowledge and skills requires continual practice at authentic problems in a laboratory-based setting. This unit has weekly laboratory classes and you must demonstrate your progress in developing and communicating knowledge and skills in a minimum of 7 of the 10 scheduled classes. This is a hurdle assessment, meaning that failure to meet this requirement may result in a fail grade for the unit. Students are permitted up to three absences: additional absences will require you to apply for Special Consideration (see further below).

2. **Late Assessment Submission Penalty**

Unless a Special Consideration request has been submitted and approved, a 5% penalty (of the total possible mark of the task) will be applied for each day a written report or presentation assessment is not submitted, up until the 7th day (including weekends). After the 7th day, a grade of ‘0’ will be awarded even if the assessment is submitted. The submission time for all uploaded assessments is 11:55 pm. A 1-hour grace period will be provided to students who experience a technical concern. For any late submission of time-sensitive tasks, such as scheduled tests/exams, performance assessments/presentations, and/or scheduled practical assessments/labs, please apply for Special consideration.

**Assessments where Late Submissions will be accepted**: Assessment 1 (Research report) – standard late penalty applies.

The Special Consideration Policy aims to support students who have been impacted by short-
term circumstances or events that are serious, unavoidable and significantly disruptive, and which may affect their performance in assessment.

Weekly practice-based tasks: To pass the unit you need to demonstrate ongoing development of skills and application of knowledge in a minimum of 7 out of the 10 scheduled practical classes. If you miss a class due to a serious, unavoidable and significant disruption, contact the unit’s tutorial convenor ASAP (via email: biol1310@mq.edu.au) as you may be able to attend another class that week, or during the block on-campus sessions.

**Note that it is not necessary for you to apply for special consideration for missing a scheduled practical unless you have (or will) miss 3 or more classes.**

4. Assessment activities and other information

Weekly pre-practical quizzes and the mid-semester test will be administered online via the BIOL1310 iLearn site. You will submit your assignment via a link provided on this site.

Assessment outcomes and feedback will be provided via the "gradebook" function of the iLearn site.

**Research Report**

Assessment Type: Report

Indicative Time on Task: 20 hours

Due: 03 May 2024

Weighting: 30%

In this assignment you will write a short research report on an experiment we have conducted in the practicals. The report will be in the style of a scientific paper, but somewhat shorter. It will contain a title, introduction, methods, results (with figures and/or tables), discussion and reference list. Prior to this, a practical will be dedicated to explaining all elements of the research report, and the marking rubric. Note that while you will work in a group to conduct the practical, all written work is expected to be your own.
On successful completion you will be able to:

- Define evolution and describe its main mechanisms
- Contrast major ecological processes and describe biogeographical patterns
- Synthesise experimental results and information from the scientific literature to prepare a scientific report

**Weekly practical class**

Assessment Type: Practice-based task
Indicative Time on Task: 12 hours
Due: Weekly (in practical weeks)
Weighting: 5%

*This is a hurdle assessment task (see assessment policy for more information on hurdle assessment tasks)*

Development of knowledge and skills requires continual practice at authentic tasks. In each weekly practical class, you will undertake a range of activities and record your progress in a lab book. To pass this hurdle assessment, you must be able to demonstrate your progress in developing and communicating knowledge and skills in a minimum of 80% of practical classes.

On successful completion you will be able to:

- Synthesise experimental results and information from the scientific literature to prepare a scientific report
- Demonstrate foundational learning skills including active engagement in the learning process

**Mid-semester test**

Assessment Type: Examination
Indicative Time on Task: 15 hours
Due: 09 Apr 2024
Weighting: 15%

The mid-semester test will cover lecture and practical material and will consist of multiple choice questions.

On successful completion you will be able to:
• Define evolution and describe its main mechanisms
• Define the major evolutionary transitions of organisms on earth
• Differentiate the main groups of organisms and interpret their evolutionary relationships
• Contrast major ecological processes and describe biogeographical patterns

Final Exam
Assessment Type: Examination
Indicative Time on Task: 8 hours
Due: TBA
Weighting: 40%

The final exam will be held during the Formal Examination Period, and may consist of a mixture of multiple choice and short-length answer. The exam will cover all Lecture and Practical material presented in the unit. The University will announce the examination date towards the end of semester. We will relay that date via an announcement in Lectures and via iLearn.

On successful completion you will be able to:
• Define evolution and describe its main mechanisms
• Define the major evolutionary transitions of organisms on earth
• Differentiate the main groups of organisms and interpret their evolutionary relationships
• Contrast major ecological processes and describe biogeographical patterns
• Synthesise experimental results and information from the scientific literature to prepare a scientific report

Pre-practical Quizzes
Assessment Type: Quiz/Test
Indicative Time on Task: 12 hours
Due: Weekly (in practical weeks)
Weighting: 10%

Weekly practical quizzes are required to be undertaken prior to the start of the practical class. The purpose of the quiz is to ensure that you are familiar with the activities of the practical and the biological concepts they cover.

On successful completion you will be able to:
• Define evolution and describe its main mechanisms
Define the major evolutionary transitions of organisms on earth
Differentiate the main groups of organisms and interpret their evolutionary relationships
Contrast major ecological processes and describe biogeographical patterns
Demonstrate foundational learning skills including active engagement in the learning process

If you need help with your assignment, please contact:

- the academic teaching staff in your unit for guidance in understanding or completing this type of assessment
- the Writing Centre for academic skills support.

Indicative time-on-task is an estimate of the time required for completion of the assessment task and is subject to individual variation

Delivery and Resources

1. Methods of communication
Unit staff will communicate with you via email to your university email address or through announcements on iLearn. It is therefore critical that you regularly check your university email inbox. Queries to convenors can either be placed on the iLearn discussion board or sent to biol1310@mq.edu.au from your university email address.

2. Lectures
Two 1-hour lectures will be available for you to stream and/or download via the unit’s iLearn site prior to scheduled lecture times in each week of the teaching session. It is important to follow these lectures across the session because the material is closely linked to the compulsory practical classes and associated assessment tasks.

3. Practicals
Weekly practical classes last for up to 2.5 hours and will (mostly) be conducted on campus.

There are no practical classes in the first week of the session. Practicals are run in weeks 2-5, weeks 7-8 and weeks 9-12 (totalling 10 classes).

The following timetabled options exist for weekly practical classes:

- Wednesdays 9:00am - 11:30am
- Wednesdays 12:00pm - 2:30pm
- Wednesdays 3:00pm - 5:30pm
- Thursdays 9:00am - 11:30am

All classes are held in three adjoining teaching laboratories at 6 Wally’s Walk - rooms 106, 110 and 112.

For safety reasons fully covered shoes are mandatory for entry into these laboratories.

4. COVID-19 Information
For the latest information on the University’s response to COVID-19, please refer to the Coronavirus infection page on the Macquarie website: [https://www.mq.edu.au/about/coronavirus-faqs](https://www.mq.edu.au/about/coronavirus-faqs). Remember to check this page regularly in case the information and requirements change during semester. If there are any changes to this unit in relation to COVID, these will be communicated via iLearn.

Policies and Procedures

Macquarie University policies and procedures are accessible from Policy Central (https://policies.mq.edu.au). Students should be aware of the following policies in particular with regard to Learning and Teaching:

- Academic Appeals Policy
- Academic Integrity Policy
- Academic Progression Policy
- Assessment Policy
- Fitness to Practice Procedure
- Assessment Procedure
- Complaints Resolution Procedure for Students and Members of the Public
- Special Consideration Policy

Students seeking more policy resources can visit Student Policies (https://students.mq.edu.au/support/study/policies). It is your one-stop-shop for the key policies you need to know about throughout your undergraduate student journey.

To find other policies relating to Teaching and Learning, visit Policy Central (https://policies.mq.edu.au) and use the search tool.

Student Code of Conduct

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: https://students.mq.edu.au/admin/other-resources/student-conduct

Results

Results published on platform other than eStudent, (eg. iLearn, Coursera etc.) or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in eStudent. For more information visit ask.mq.edu.au or if you are a Global MBA student contact globalmba.support@mq.edu.au

Academic Integrity

At Macquarie, we believe academic integrity – honesty, respect, trust, responsibility, fairness and
courage – is at the core of learning, teaching and research. We recognise that meeting the expectations required to complete your assessments can be challenging. So, we offer you a range of resources and services to help you reach your potential, including free online writing and maths support, academic skills development and wellbeing consultations.

Student Support

Macquarie University provides a range of support services for students. For details, visit [http://students.mq.edu.au/support/](http://students.mq.edu.au/support/)

The Writing Centre

The Writing Centre provides resources to develop your English language proficiency, academic writing, and communication skills.

- Workshops
- Chat with a WriteWISE peer writing leader
- Access StudyWISE
- Upload an assignment to Studiosity
- Complete the Academic Integrity Module

The Library provides online and face to face support to help you find and use relevant information resources.

- Subject and Research Guides
- Ask a Librarian

Student Services and Support

Macquarie University offers a range of Student Support Services including:

- IT Support
- Accessibility and disability support with study
- Mental health support
- Safety support to respond to bullying, harassment, sexual harassment and sexual assault
- Social support including information about finances, tenancy and legal issues
- Student Advocacy provides independent advice on MQ policies, procedures, and processes

Student Enquiries

Got a question? Ask us via AskMQ, or contact Service Connect.

IT Help

For help with University computer systems and technology, visit [http://www.mq.edu.au/about_us/](http://www.mq.edu.au/about_us/)
When using the University's IT, you must adhere to the Acceptable Use of IT Resources Policy. The policy applies to all who connect to the MQ network including students.

**Changes from Previous Offering**

We value student feedback to be able to continually improve the way we offer our units. As such we encourage students to provide constructive feedback via student surveys, to the teaching staff directly, or via the FSE Student Experience & Feedback link in the iLearn page.

Student feedback from the previous offering of this unit was very positive overall, with students pleased with the clarity around assessment requirements and the level of support from teaching staff. As such, no change to the delivery of the unit is planned, however we will continue to strive to improve the level of support and the level of student engagement.

Unit information based on version 2024.01 of the Handbook.
