Each offering, lectures may be updated, readings may be updated and changed, assessment tasks and quiz or test questions are updated and changed.

The 5Rs Framework

The 5Rs Framework, developed by the School of Education at Macquarie University, is embedded throughout your teacher education course.

Your use of the 5Rs Framework will help you develop the capabilities that will make your teaching career sustainable and fulfilling.

In this unit, you will learn using the 5Rs framework in the following important ways:

Resilience: This unit requires students to familiarise themselves with the 5R's and the concept of resilience and students will interact with these concepts; assessment and feedback is a formative process that requires the competencies of self-regulation, self-efficacy and support seeking, which are critical components of our capacity to be resilient.

Reflexive: This unit teaches key concepts of education in a reflexive stance that requires students to interact with and engage with their own beliefs and understandings of these concepts.

Responsive: Activities and tasks require students to practise the application of concepts to teaching and learning activities and demonstrate practical and reflexive engagement with concepts.

Ready to learn: This unit is supported and scaffolded with a structured iLearn site however students must demonstrate readiness to learn by scheduling their own listening time for online lectures/podcasts, completion of weekly readings and activities, and preparedness for tutorials and assessment tasks. Assessment tasks support readiness skills by promoting revision of weekly learning materials and readiness to engage in research to support evidence-based

practice.

Research-Engaged: Unit readings and assessments tasks draw on published and/or peer-reviewed research and students are offered a choice of assessment topics with which to demonstrate research engagement.
