Unit description
This unit introduces essential concepts and techniques of computing for conducting science, with special emphasis on the preparation and manipulation of data. We discuss the role of computers and computing tools in science and focus on the use of spreadsheets and other data manipulation tools. This unit introduces vital skills for tertiary learning and explores their relationship to success in future careers.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at https://www.mq.edu.au/study/calendar-of-dates

Learning Outcomes
On successful completion of this unit, you will be able to:

ULO1: Demonstrate foundational knowledge of the role of data, computing and computing tools for science.

ULO2: Determine the appropriate computing tool for the key stages of data
manipulation.

ULO3: Prepare and clean data so that it can be processed by computer tools.
ULO4: Communicate the steps performed in the preparation and processing of data so that they can be reproduced.
ULO5: Explain the ethical implications of the use of computers for gathering, processing, and storing data.
ULO6: Demonstrate foundational employability and self-directed learning skills, including recording academic achievements to link university study to future careers.

General Assessment Information

Requirements to Pass this Unit

To pass this unit, you must:

• Pass the hurdle requirements:
  ◦ Undertake and satisfactorily complete all Foundation activities, and
• Achieve a total mark equal to or greater than 50%

Hurdle Requirements

Foundation activities

These activities are built to prepare students to transition to being learners in higher education and then becoming professionals within the science community. Each of the activities is a hurdle without an assessment weight. This means that these activities do not contribute to the unit grade but must be completed as outlined to pass this unit. Some activities will be automatically graded, but all will ask you to apply the modules to your work in this unit, general university studies, and your personal goals. You will be informed of any due dates, but most modules can be completed in your own time. See your iLearn unit for detailed information on how to complete these modules.

Reattempts (up to 2) for any unsuccessful activities will be available to you upon receiving the result and feedback and must be submitted by week 11.

Late Assessment Submission Penalty

Unless a Special Consideration request has been submitted and approved, a 5% penalty (of the total possible mark of the task) will be applied for each day a written report or presentation assessment is not submitted, up until the 7th day (including weekends). After the 7th day, a grade of ‘0’ will be awarded even if the assessment is submitted. The submission time for all uploaded assessments is 11:55 pm. A 1-hour grace period will be provided to students who experience a technical concern. For any late submission of time-sensitive tasks, such as scheduled tests/exams, performance assessments/presentations, and/or scheduled practical assessments/labs, please apply for Special Consideration.
**Assessment Tasks**

**Foundation activities**
Assessment Type: Quiz/Test
Indicative Time on Task: 0 hours
Due: Weeks 2-8
Weighting: 0%
This is a hurdle assessment task (see assessment policy for more information on hurdle assessment tasks)

**SGTA assessed activities**
Assessment Type: Quiz/Test
Indicative Time on Task: 0 hours
Due: Weeks 2-11
Weighting: 10%

**In-class tests**
Assessment Type: Quiz/Test
Indicative Time on Task: 0 hours
Due: Weeks 3, 7, 12
Weighting: 60%

**Project**
Assessment Type: Project
Indicative Time on Task: 0 hours
Due: Week 11
Weighting: 20%

**Reproducibility Project**
Assessment Type: Project
Indicative Time on Task: 0 hours
Due: Weeks 12, 13
Weighting: 10%
Activities related to foundational employability and self-directed learning skills

On successful completion you will be able to:

- Demonstrate foundational employability and self-directed learning skills, including recording academic achievements to link university study to future careers.

**SGTA assessed activities**

Assessment Type: Practice-based task  
Indicative Time on Task: 5 hours  
Due: **Weeks 2-11**  
Weighting: **10%**

A number of tasks directly related to the project will be assessed as part of the scheduled SGTA activities

On successful completion you will be able to:

- Demonstrate foundational knowledge of the role of data, computing and computing tools for science.
- Determine the appropriate computing tool for the key stages of data manipulation.
- Prepare and clean data so that it can be processed by computer tools.
- Communicate the steps performed in the preparation and processing of data so that they can be reproduced.
- Explain the ethical implications of the use of computers for gathering, processing, and storing data.
- Demonstrate foundational employability and self-directed learning skills, including recording academic achievements to link university study to future careers.

**In-class tests**

Assessment Type: Quiz/Test  
Indicative Time on Task: 20 hours  
Due: **Weeks 3, 7, 12**  
Weighting: **60%**

One in-class test for each principal module of the unit.

On successful completion you will be able to:

- Demonstrate foundational knowledge of the role of data, computing and computing tools for science.
- Determine the appropriate computing tool for the key stages of data manipulation.
- Prepare and clean data so that it can be processed by computer tools.
Communicate the steps performed in the preparation and processing of data so that they can be reproduced.

Explain the ethical implications of the use of computers for gathering, processing, and storing data.

Demonstrate foundational employability and self-directed learning skills, including recording academic achievements to link university study to future careers.

**Project**

Assessment Type: Project
Indicative Time on Task: 45 hours
Due: Week 11
Weighting: 20%

Development of a project in several stages: 1. data preparation, 2. processing, 3. presentation

On successful completion you will be able to:

- Demonstrate foundational knowledge of the role of data, computing and computing tools for science.
- Determine the appropriate computing tool for the key stages of data manipulation.
- Prepare and clean data so that it can be processed by computer tools.
- Communicate the steps performed in the preparation and processing of data so that they can be reproduced.
- Demonstrate foundational employability and self-directed learning skills, including recording academic achievements to link university study to future careers.

**Reproducibility Project**

Assessment Type: Project
Indicative Time on Task: 15 hours
Due: Weeks 12, 13
Weighting: 10%

Peer assessment of the reproducibility of a project

On successful completion you will be able to:

- Determine the appropriate computing tool for the key stages of data manipulation.
- Communicate the steps performed in the preparation and processing of data so that they can be reproduced.
• Demonstrate foundational employability and self-directed learning skills, including recording academic achievements to link university study to future careers.

1 If you need help with your assignment, please contact:

• the academic teaching staff in your unit for guidance in understanding or completing this type of assessment
• the Writing Centre for academic skills support.

2 Indicative time-on-task is an estimate of the time required for completion of the assessment task and is subject to individual variation.

**Delivery and Resources**

**Classes**

You should register for a two-hour lecture and a two-hour SGTA class. All classes commence in week 1.

There are no lectures from week 11 and no SGTA tasks in week 13. Instead, from week 11, there will be other activities related to improving your employability skills. These activities will be detailed in iLearn.

**Delivery Modes**

At the time of writing this unit guide, the plan is:

• **Lectures** will be delivered on campus with live-streaming options and recorded
• **SGTA sessions** will be delivered according to your enrolment mode. Please check the timetable for the specific times and types of sessions.
• **In class-tests** will be at the place and time of your SGTA according to eStudent class registration
• All other assessment tasks will be take-home tasks done online via iLearn.

Any changes to this plan will be announced in iLearn.

**Software**

The unit will use the following software:

• Microsoft Excel Online
  ◦ You can find information about how to access the online version at [https://students.mq.edu.au/support/technology/software/microsoft](https://students.mq.edu.au/support/technology/software/microsoft).
• MATLAB. Macquarie University has a license for all students.
  ◦ You can find information about how to use MATLAB and access to the online
Textbooks and Reading
This unit does not have a textbook. Each week, check the assigned reading material and videos. These will be made available via iLearn.

Methods of Communication
We will communicate with you via your university email and through announcements on iLearn. Queries can either be placed on the iLearn general forum or the private dialogue on iLearn.

General Notes
In this unit, you should do the following:

• Engage in lectures by taking notes and asking questions.
• Actively participate during your weekly SGTA session and complete the tasks.
• Complete Foundation activities and SGTA-assessed activities within the suggested week.
• Ensure that you completed the in-class tests in your registered SGTA class.
• Read appropriate sections of the content materials, add to your notes, and prepare questions for the teaching staff.
• Work on any assignments that have been released.

Lecture notes will be made available each week, but these notes are intended as an outline of the lecture only and are not a substitute for your own notes or the recommended reading list.

COVID Information
For the latest information on the University’s response to COVID-19, please refer to the Coronavirus infection page on the Macquarie website: https://www.mq.edu.au/about/coronavirus-faqs. Remember to check this page regularly in case the information and requirements change during the semester. If there are any changes to this unit about COVID, these will be communicated via iLearn.

Unit Schedule
The following weekly schedule is tentative:

1. Computing in Science
2. Basic concepts of computing
3. Data types and data frames
4. Data exploration
5. Storing data
6. Scripts and MATLAB
7. Cleaning data
8. Transforming data
9. Summarising and analysing data
10. Ethics and reproducibility
11. Foundational skills (I)
12. Foundational skills (II)
13. Foundational skills (III)

Policies and Procedures

Macquarie University policies and procedures are accessible from Policy Central (https://policies.mq.edu.au). Students should be aware of the following policies in particular with regard to Learning and Teaching:

- Academic Appeals Policy
- Academic Integrity Policy
- Academic Progression Policy
- Assessment Policy
- Fitness to Practice Procedure
- Assessment Procedure
- Complaints Resolution Procedure for Students and Members of the Public
- Special Consideration Policy

Students seeking more policy resources can visit Student Policies (https://students.mq.edu.au/support/study/policies). It is your one-stop-shop for the key policies you need to know about throughout your undergraduate student journey.

To find other policies relating to Teaching and Learning, visit Policy Central (https://policies.mq.edu.au) and use the search tool.

Student Code of Conduct

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: https://students.mq.edu.au/admin/other-resources/student-conduct

Results

Results published on platform other than eStudent, (eg. iLearn, Coursera etc.) or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in eStudent. For more information visit ask.mq.edu.au or if you are a Global MBA student contact globalmba.support@mq.edu.au
Academic Integrity
At Macquarie, we believe academic integrity – honesty, respect, trust, responsibility, fairness and courage – is at the core of learning, teaching and research. We recognise that meeting the expectations required to complete your assessments can be challenging. So, we offer you a range of resources and services to help you reach your potential, including free online writing and maths support, academic skills development and wellbeing consultations.

Student Support
Macquarie University provides a range of support services for students. For details, visit http://students.mq.edu.au/support/

The Writing Centre
The Writing Centre provides resources to develop your English language proficiency, academic writing, and communication skills.

- Workshops
- Chat with a WriteWISE peer writing leader
- Access StudyWISE
- Upload an assignment to Studiosity
- Complete the Academic Integrity Module

The Library provides online and face to face support to help you find and use relevant information resources.

- Subject and Research Guides
- Ask a Librarian

Student Services and Support
Macquarie University offers a range of Student Support Services including:

- IT Support
- Accessibility and disability support with study
- Mental health support
- Safety support to respond to bullying, harassment, sexual harassment and sexual assault
- Social support including information about finances, tenancy and legal issues
- Student Advocacy provides independent advice on MQ policies, procedures, and processes

Student Enquiries
Got a question? Ask us via AskMQ, or contact Service Connect.
IT Help

For help with University computer systems and technology, visit http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/.

When using the University's IT, you must adhere to the Acceptable Use of IT Resources Policy. The policy applies to all who connect to the MQ network including students.

Changes from Previous Offering

Based on the student feedback and results from the previous offering:

• SGTA-assessed activities are introduced

We value student feedback to be able to improve the way we offer our units continually. As such, we encourage students to provide constructive feedback to the teaching staff directly via student surveys or via the FSE Student Experience & Feedback link on the iLearn page.

We will continue to strive to improve the level of support and the level of student engagement.

Unit information based on version 2024.04 of the Handbook
