Unit description

Almost every use of land from building a family home to infrastructure projects across cities through to coal mining will require some form of legal assessment and approval. The relevant area of law is environmental planning law. This unit examines the intersection of economic, social and environmental issues in the context of land use and law. The focus is on both the natural and built environment in an urban and rural context with particular emphasis on the regulation of land use under the Environmental Planning and Assessment Law 1979 (NSW) and the Environment Protection and Biodiversity Conservation Act 1999 (Cth). The unit provides a detailed analysis of the legal requirements of land use planning instruments, development assessment methods, environmental impact assessment and administrative decision making relating to land use. A critical analysis is undertaken of the effectiveness of the current regulatory regime including reform proposals and options. Discussion and analysis of relevant case law and the functions of the Land and Environment Court in terms of resolving land planning and development issues is covered extensively.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: Acquire and demonstrate specialized knowledge of the theories, principles and policies underlying planning and development law with particular focus on Ecologically

Sustainable Development and environmental justice;

ULO2: Identify, explain and apply the regulatory scheme for planning, development assessment and approval of land use development at federal, state and local levels as the basis for critically analysis of the Environmental Planning and Assessment Act 1979 (NSW) and Environment Protection Biodiversity Conservation Act 1999 (Cth).

ULO3: Critically analyse the operation of legal review mechanisms relevant to environmental planning law in assessing the effectiveness and accountability of public authorities involved in environmental planning and assessment at all jurisdictional levels

ULO4: Display expertise in forecasting environmental challenges that will affect environmental planning law in the future and how to combat these issues whilst balancing competing interests related to economic benefits of land use planning and development.

ULO5: Critically evaluate how environmental law and policy is politicised across federal, state and local government balance levels and how the economic aspects and attempts to balance economic and environmental priorities of land use.

General Assessment Information

All written assessments that are submitted electronically will utilise Turnitin plagiarism detection software.

Students should carefully check that they submit the correct file for an assessment, as re-submissions will not be accepted after the due date and time, including instances where students upload an incorrect file in error.

Word limits are strictly applied. Work above the word limit will not be marked. Footnotes are to be used only for referencing. Referencing must conform to the requirements set out in the Australian Guide to Legal Citation 4th edition.

Marking of all assessments is moderated through a process of blind marking and the use of detailed marking rubrics.

Late penalty policy

Unless a Special Consideration request has been submitted and approved, a 5% penalty (of the total possible mark) will be applied each day a written assessment is not submitted, up until the 7th day (including weekends). After the 7th day, a mark of '0' (zero) will be awarded even if the assessment is submitted. Submission time for all written assessments is set at 11.55pm. A 1-hour grace period is provided to students who experience a technical issue.

This late penalty will apply to non-timed sensitive assessments (incl essays, reports, posters, portfolios, journals, recordings etc). Late submission of time-sensitive tasks (such as tests/exams, performance assessments/presentations, scheduled practical assessments/labs etc) will only be addressed by the unit convenor in a Special consideration application. Special

Consideration outcome may result in a new question or topic.

Special Consideration

Students should submit applications for Special Consideration electronically via ask.mq.edu.au, along with the supporting documentation. Before submitting their applications, students should refer to the Special Consideration Policy (link provided under 'Policies and Procedures' below).

Changes from Previous Offering

The topic on Week 2, 'The interaction between planning law and Aboriginal and Torres Strait Islander philosophy, culture and law/lore' is a new addition to the course.

Please note - the Reflective Paper task listed above has two elements (unfortunately this cannot be communicated in the prepopulated unit guide): 1) In class participation (10%) and 2) a reflective paper (10%).

This paper will describe the student's reflective learning (more details on reflective learning will be given on the iLearn page and in the course).

The due date for the Reflective Paper is earlier than in 2023. This is to distribute the workload for students more evenly through the session. As a result, the content of the reflective paper will be focused more on the first half of the course.
