General Information

Unit convenor and teaching staff
Unit convenor, lecturer (group theory)
Richard Garner
richard.garner@mq.edu.au
Contact via email
12 Wally's Walk, 718
see iLearn

Lecturer (ring theory)
JS Lemay
js.jemay@mq.edu.au
Contact via email
12 Wally's Walk, 735
see iLearn

Credit points
10

Prerequisites
130cp including (MATH2010 or MATH235)

Corequisites
MATH3900 or MATH3901 or MATH3905 or MATH300 or MATH331 or MATH335

Co-badged status

Unit description
This unit develops the basic ideas of modern abstract algebra by concentrating on the many facets of group theory and its applications. Groups are used to describe symmetries of physical and mathematical objects. The course begins by introducing their basic theory, including generators and relations, Lagrange's theorem, and quotient groups. These ideas are applied to topics such as geometry and the possibility or impossibility of solving polynomial equations.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at https://www.mq.edu.au/study/calendar-of-dates

Learning Outcomes
On successful completion of this unit, you will be able to:
ULO1: Demonstrate a well-developed knowledge of algebraic principles, concepts and calculation techniques as occur within Group Theory.

ULO2: Apply relevant knowledge to problems in group theory and other fields in which group theory is used; through sustained logic, with clearly presented and justified mathematical arguments.

ULO3: Synthesize multiple ideas and techniques of group theory in order to solve a larger scale problem.

ULO4: Present mathematical ideas, arguments and findings in a professional manner as appropriate to the intended audience.

**General Assessment Information**

**Requirements to Pass this Unit**

To pass this unit you must:

• Achieve a total mark equal to or greater than 50%.

**Hurdle Requirements**

There are no hurdles in this unit.

**Late Assessment Submission Penalty**

Unless a Special Consideration request has been submitted and approved, a 5% penalty (of the total possible mark of the task) will be applied for each day a written report or presentation assessment is not submitted, up until the 7th day (including weekends). After the 7th day, a grade of ‘0’ will be awarded even if the assessment is submitted.

The submission time for all uploaded assessments is 11:55 pm. A 1-hour grace period will be provided to students who experience a technical concern. For any late submission of time-sensitive tasks, such as scheduled tests/exams, performance assessments/presentations, and/or scheduled practical assessments/labs, please apply for Special Consideration.

Assessments where Late Submissions will be accepted

• Assignment 1, Assignment 2, and Project – YES, Standard Late Penalty applies.

**Special Consideration**

The Special Consideration Policy aims to support students who have been impacted by short-term circumstances or events that are serious, unavoidable and significantly disruptive, and which may affect their performance in assessment.

If you experience circumstances or events that affect your ability to complete the assignments or

Final Exam
Assessment Type 1: Examination
Indicative Time on Task 2: 15 hours
Due: Final exam period
Weighting: 50%

This will be an invigilated exam, held during the final exam period.

On successful completion you will be able to:

- Demonstrate a well-developed knowledge of algebraic principles, concepts and calculation techniques as occur within Group Theory.
- Apply relevant knowledge to problems in group theory and other fields in which group theory is used; through sustained logic, with clearly presented and justified mathematical arguments.
- Present mathematical ideas, arguments and findings in a professional manner as appropriate to the intended audience.

Project
Assessment Type 1: Project
Indicative Time on Task 2: 20 hours
Due: Week 13
Weighting: 20%
This project gives students the opportunity to apply the knowledge gained in the unit to a larger scale mathematical problem than the short questions typical in assignments.

On successful completion you will be able to:

- Demonstrate a well-developed knowledge of algebraic principles, concepts and calculation techniques as occur within Group Theory.
- Apply relevant knowledge to problems in group theory and other fields in which group theory is used; through sustained logic, with clearly presented and justified mathematical arguments.
- Synthesize multiple ideas and techniques of group theory in order to solve a larger scale problem.
- Present mathematical ideas, arguments and findings in a professional manner as appropriate to the intended audience.

Assignment 1

Assessment Type: Problem set
Indicative Time on Task: 12 hours
Due: Week 5
Weighting: 15%

A collection of problems relevant to the material taught during weeks 1–5 of the teaching session.

On successful completion you will be able to:

- Demonstrate a well-developed knowledge of algebraic principles, concepts and calculation techniques as occur within Group Theory.
- Apply relevant knowledge to problems in group theory and other fields in which group theory is used; through sustained logic, with clearly presented and justified mathematical arguments.
- Present mathematical ideas, arguments and findings in a professional manner as appropriate to the intended audience.

Assignment 2

Assessment Type: Problem set
Indicative Time on Task: 12 hours
Due: Week 11  
Weighting: 15%  

A collection of problems relevant to the material taught during weeks 5–10 of the teaching session.

On successful completion you will be able to:

• Demonstrate a well-developed knowledge of algebraic principles, concepts and calculation techniques as occur within Group Theory.
• Apply relevant knowledge to problems in group theory and other fields in which group theory is used; through sustained logic, with clearly presented and justified mathematical arguments.
• Present mathematical ideas, arguments and findings in a professional manner as appropriate to the intended audience.

1 If you need help with your assignment, please contact:

• the academic teaching staff in your unit for guidance in understanding or completing this type of assessment
• the Writing Centre for academic skills support.

2 Indicative time-on-task is an estimate of the time required for completion of the assessment task and is subject to individual variation

**Delivery and Resources**

**Classes**

Lectures (beginning in Week 1): There is one two-hour lecture each week.

SGTA classes (beginning in Week 2): Students must register in and attend one one-hour class per week.

**Textbook**

There is no required textbook but see iLearn for various recommended resources.

**Communication**

https://unitguides.mq.edu.au/unit_offerings/164136/unit_guide/print
We will communicate with you via your university email or through announcements on iLearn. Queries to convenors can either be placed on the iLearn discussion board or sent to your lecturers from your university email address.

COVID Information

For the latest information on the University’s response to COVID-19, please refer to the Coronavirus infection page on the Macquarie website: https://www.mq.edu.au/about/coronavirus-faqs. Remember to check this page regularly in case the information and requirements change during semester. If there are any changes to this unit in relation to COVID, these will be communicated via iLearn.

The timing of the topics is indicative, and may need to be changed. Any such changes will be communicated via iLearn.

Policies and Procedures

Macquarie University policies and procedures are accessible from Policy Central (https://policies.mq.edu.au). Students should be aware of the following policies in particular with regard to Learning and Teaching:
Student Support

- Academic Appeals Policy
- Academic Integrity Policy
- Academic Progression Policy
- Assessment Policy
- Fitness to Practice Procedure
- Assessment Procedure
- Complaints Resolution Procedure for Students and Members of the Public
- Special Consideration Policy

Students seeking more policy resources can visit Student Policies (https://students.mq.edu.au/support/study/policies). It is your one-stop-shop for the key policies you need to know about throughout your undergraduate student journey.

To find other policies relating to Teaching and Learning, visit Policy Central (https://policies.mq.edu.au) and use the search tool.

Student Code of Conduct

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: https://students.mq.edu.au/admin/other-resources/student-conduct

Results

Results published on platform other than eStudent, (eg. iLearn, Coursera etc.) or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in eStudent. For more information visit ask.mq.edu.au or if you are a Global MBA student contact globalmba.support@mq.edu.au

Academic Integrity

At Macquarie, we believe academic integrity – honesty, respect, trust, responsibility, fairness and courage – is at the core of learning, teaching and research. We recognise that meeting the expectations required to complete your assessments can be challenging. So, we offer you a range of resources and services to help you reach your potential, including free online writing and maths support, academic skills development and wellbeing consultations.

Student Support

Macquarie University provides a range of support services for students. For details, visit http://students.mq.edu.au/support/

The Writing Centre

The Writing Centre provides resources to develop your English language proficiency, academic writing, and communication skills.

- Workshops
- Chat with a WriteWISE peer writing leader
Student Services and Support

Macquarie University offers a range of Student Support Services including:

- IT Support
- Accessibility and disability support with study
- Mental health support
- Safety support to respond to bullying, harassment, sexual harassment and sexual assault
- Social support including information about finances, tenancy and legal issues
- Student Advocacy provides independent advice on MQ policies, procedures, and processes

Student Enquiries

Got a question? Ask us via AskMQ, or contact Service Connect.

IT Help

For help with University computer systems and technology, visit http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/.

When using the University’s IT, you must adhere to the Acceptable Use of IT Resources Policy. The policy applies to all who connect to the MQ network including students.
