Co-badge status

Unit description
This unit will engage students with research frontiers in physics and astronomy. Students will attend research seminars and journal clubs within the School's major research centres as well as follow a directed reading program of current literature. Students will be expected to actively critique and review selected literature through reports and group discussions.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at https://www.mq.edu.au/study/calendar-of-dates

Learning Outcomes
On successful completion of this unit, you will be able to:

ULO1: use your broad physics knowledge to gain insight into difficult and unfamiliar research material presented in written or spoken form.

ULO2: discuss the context for a range of frontier activities in several research fields of physics and astronomy.

ULO3: give written and oral presentations of contemporary research results and offer critical analysis of those results.

ULO4: evaluate and describe how new results sit in the context of existing knowledge and ideas, and assess the likely impact of new research.
ULO5: demonstrate the technical skills needed to access and navigate the scientific literature.
ULO6: critically reflect on your current skills and knowledge, and identify what further skills and knowledge are required to achieve your career aspirations.

**General Assessment Information**

**Requirements to Pass this Unit**
To pass this unit you must achieve a total mark equal to or greater than 50%.

**Hurdle Assessments**
There are no hurdle tasks in this unit.

**Engagement – please read, as this is very important**
As a BPhil / MRes Yr 1 student you are becoming part of our community of researchers. You need to be an active participant in the unit activities. You will be expected to lead and participate in discussions, ask questions and engage with speakers, and proactively work to find your place in our diverse research community.

**Late Assessment Submission Penalty**
Unless a Special Consideration request has been submitted and approved, a 5% penalty (of the total possible mark) will be applied each day a written report or presentation assessment is not submitted, up until the 7th day (including weekends). After the 7th day, a grade of '0' will be awarded even if the assessment is submitted. Submission time for all written assessments is set at 11:55 pm. A 1-hour grace period is provided to students who experience a technical concern.

For any late submission of time-sensitive tasks, such as scheduled tests/exams, performance assessments/presentations, and/or scheduled practical assessments/labs, students need to submit an application for Special Consideration.

**Assessments where Late Submissions will be accepted**
In this unit, late submissions will accepted as follows:

- Opportunity Essay – YES, Standard Late Penalty applies
- Journal Club Presentation - NO, unless Special Consideration is Granted you must present in your scheduled timeslot
- Journal Club Participation - NO, unless Special Consideration is Granted you must attend and participate in all journal clubs
- Seminar Forum - NO, unless Special Consideration is Granted

**Special Consideration**
The **Special Consideration Policy** aims to support students who have been impacted by short-
term circumstances or events that are serious, unavoidable and significantly disruptive, and which may affect their performance in assessment. If you experience circumstances or events that affect your ability to complete the assessments in this unit on time, please inform the convenor and submit a Special Consideration request through ask.mq.edu.au.

**Opportunity essay**

Assessment Type: Essay  
Indicative Time on Task: 28 hours  
Due: Outline Week 8, Full essay week 13  
Weighting: 25%

An essay on a research opportunity relating to a recent research breakthrough, which will include an examination of the skills and knowledge required to follow a career path in this research area.

On successful completion you will be able to:

- use your broad physics knowledge to gain insight into difficult and unfamiliar research material presented in written or spoken form.
- discuss the context for a range of frontier activities in several research fields of physics and astronomy.
- give written and oral presentations of contemporary research results and offer critical analysis of those results.
- evaluate and describe how new results sit in the context of existing knowledge and ideas, and assess the likely impact of new research.
- demonstrate the technical skills needed to access and navigate the scientific literature.
- critically reflect on your current skills and knowledge, and identify what further skills and knowledge are required to achieve your career aspirations.
Journal club presentation

Assessment Type 1: Presentation
Indicative Time on Task 2: 18 hours
Due: Throughout session.
Weighting: 30%

Presenting selected research papers to peers.

On successful completion you will be able to:

- use your broad physics knowledge to gain insight into difficult and unfamiliar research material presented in written or spoken form.
- discuss the context for a range of frontier activities in several research fields of physics and astronomy.
- give written and oral presentations of contemporary research results and offer critical analysis of those results.
- evaluate and describe how new results sit in the context of existing knowledge and ideas, and assess the likely impact of new research.
- demonstrate the technical skills needed to access and navigate the scientific literature.

Seminar Forum

Assessment Type 1: Practice-based task
Indicative Time on Task 2: 13 hours
Due: Throughout session.
Weighting: 25%

Engaging with peers to discuss seminars, using an online forum.

On successful completion you will be able to:

- use your broad physics knowledge to gain insight into difficult and unfamiliar research material presented in written or spoken form.
- discuss the context for a range of frontier activities in several research fields of physics and astronomy.
- give written and oral presentations of contemporary research results and offer critical analysis of those results.
• evaluate and describe how new results sit in the context of existing knowledge and ideas, and assess the likely impact of new research.
• demonstrate the technical skills needed to access and navigate the scientific literature.

Journal club participation
Assessment Type ¹: Practice-based task
Indicative Time on Task ²: 0 hours
Due: Throughout session.
Weighting: 20%

Assessment of informed participation in group discussions.

On successful completion you will be able to:
• use your broad physics knowledge to gain insight into difficult and unfamiliar research material presented in written or spoken form.
• discuss the context for a range of frontier activities in several research fields of physics and astronomy.
• give written and oral presentations of contemporary research results and offer critical analysis of those results.
• evaluate and describe how new results sit in the context of existing knowledge and ideas, and assess the likely impact of new research.
• demonstrate the technical skills needed to access and navigate the scientific literature.

¹ If you need help with your assignment, please contact:
• the academic teaching staff in your unit for guidance in understanding or completing this type of assessment
• the Writing Centre for academic skills support.

² Indicative time-on-task is an estimate of the time required for completion of the assessment task and is subject to individual variation

Delivery and Resources
Overview
This unit focuses on accessing and understanding research results through seminars, colloquia and papers.
It addresses questions such as:

- How do we make a start on understanding unfamiliar material?
- How do we present material describing other people's results?
- How do we lead and contribute to a discussion of a third party's research work?

The key idea is that as scientists approaching new topics, the quantity and technical difficulty of material can be overwhelming. Nevertheless there are techniques that can allow us to grab footholds and start to develop a basic understanding of the material. In this unit, we will do this many times by encountering new research in several forms (papers, talks etc); following it up online by looking for further literature and other information; and reporting our conclusions in different ways: journal club discussions, short blogs and discussion fora.

Amongst other things we will try to evaluate:

- novelty and potential impact
- wider context of the work
- probable correctness
- quality of presentation

We will also think about the ways scientific research is a human activity. This has implications for how scientists and teams of scientists plan their projects over a series of papers, and what are appropriate ways for us as consumers of scientific reporting to discuss and critique the work of others. We will also discuss factors around the process of publication, including the peer review process, research funding and careers which are all linked to the overall enterprise of research as captured through the Academic Literature. The intention of this unit is that it should be unfamiliar and demanding, but rewarding. The skills developed and assessed are entirely different from any other unit this year. If you put in the time, it should be very achievable to perform well. This is also a unit where discussion and (respectful) exchange of opinions is central. The more each of us puts in, the more fun we will have.

Methods of Communication

Communication will be via your university email or through announcements on iLearn. Queries to the convenor can either be placed on the iLearn discussion board or sent to matt.owes@mq.edu.au from your university email address.

COVID Information

For the latest information on the University’s response to COVID-19, please refer to the Coronavirus infection page on the Macquarie website: https://www.mq.edu.au/about/coronavirus-faqs. Remember to check this page regularly in case the information and requirements change during semester. If there are any changes to this unit in relation to COVID, these will be communicated via iLearn.
Unit Schedule

Class timetable

The workshops in Weeks 1-4 will include introductory material to help set you up for Week 5 onwards where the floor is yours! At times decided in class, one or two students will present a journal club of around 20-25 minutes at each session and lead a discussion of the paper. Other topics related to seminars we’ve seen may come up from time to time.

Policies and Procedures

Macquarie University policies and procedures are accessible from Policy Central (https://policies.mq.edu.au). Students should be aware of the following policies in particular with regard to Learning and Teaching:

- Academic Appeals Policy
- Academic Integrity Policy
- Academic Progression Policy
- Assessment Policy
- Fitness to Practice Procedure
- Assessment Procedure
- Complaints Resolution Procedure for Students and Members of the Public
- Special Consideration Policy

Students seeking more policy resources can visit Student Policies (https://students.mq.edu.au/support/study/policies). It is your one-stop-shop for the key policies you need to know about throughout your undergraduate student journey.

To find other policies relating to Teaching and Learning, visit Policy Central (https://policies.mq.edu.au) and use the search tool.

Student Code of Conduct

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: https://students.mq.edu.au/admin/other-resources/student-conduct

Results

Results published on platform other than eStudent, (eg. iLearn, Coursera etc.) or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in eStudent. For more information visit ask.mq.edu.au or if you are a Global MBA student contact globalmba.support@mq.edu.au

Academic Integrity

At Macquarie, we believe academic integrity – honesty, respect, trust, responsibility, fairness and courage – is at the core of learning, teaching and research. We recognise that meeting the
expectations required to complete your assessments can be challenging. So, we offer you a range of resources and services to help you reach your potential, including free online writing and maths support, academic skills development and wellbeing consultations.

Student Support
Macquarie University provides a range of support services for students. For details, visit http://students.mq.edu.au/support/

The Writing Centre
The Writing Centre provides resources to develop your English language proficiency, academic writing, and communication skills.

- Workshops
- Chat with a WriteWISE peer writing leader
- Access StudyWISE
- Upload an assignment to Studiosity
- Complete the Academic Integrity Module

The Library provides online and face to face support to help you find and use relevant information resources.

- Subject and Research Guides
- Ask a Librarian

Student Services and Support
Macquarie University offers a range of Student Support Services including:

- IT Support
- Accessibility and disability support with study
- Mental health support
- Safety support to respond to bullying, harassment, sexual harassment and sexual assault
- Social support including information about finances, tenancy and legal issues
- Student Advocacy provides independent advice on MQ policies, procedures, and processes

Student Enquiries
Got a question? Ask us via AskMQ, or contact Service Connect.

IT Help
For help with University computer systems and technology, visit http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/.
When using the University's IT, you must adhere to the Acceptable Use of IT Resources Policy. The policy applies to all who connect to the MQ network including students.

**Changes from Previous Offering**

The Opportunity Essay has been modified so that students will now also reflect on their research career aspirations.

Dr Tayyaba Zafar is a welcome addition to the teaching staff on this unit.

Unit information based on version 2024.02 of the Handbook.
