Unit description
This unit introduces students to the challenges of intelligence policy. It covers intelligence policy in the Western world—with a focus on the Five Eyes intelligence services and other Western/non-Western allies; as well as adversarial intelligence communities. Upon successful completion of the course students will understand some of the dynamics that affect intelligence policy at the national, regional, and international levels. They will also understand the different mechanisms through which intelligence policy is shaped, formulated and implemented. Moreover, students will gain a deeper understanding of the complexities of coordination, prioritization and evaluation of the intelligence community, and of the dilemmas of and different approaches to integrating intelligence into policy and decision-making at the national and international levels. Finally, students will understand the broad social, economic, and political ramifications of different intelligence-policy choices.
