Unit description
The objective of this unit is to develop comprehensive understanding on significant health and safety concerns and to apply various approaches for risk assessment and management in order to ensure safer construction projects. This encompasses the study of potential hazards at construction sites, the utilization of techniques for hazard identification, both qualitative and quantitative methods of risk assessment, strategies for risk control and management, impact analysis, safety principles at various design and construction stages (planning, commissioning, operation, decommissioning), the influence of human factors on construction safety, and the effective communication of health, safety, and risk management strategies. The unit also includes guest lectures by industry practitioners to delve into current health and safety practices and challenges encountered in the design and operation of diverse construction sites.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at https://www.mq.edu.au/study/calendar-of-dates

https://unitguides.mq.edu.au/unit_offerings/166897/unit_guide/print
Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: Identify and assess the major work health, safety and welfare legislation in the construction projects
ULO2: Demonstrate an in-depth understanding and use of hazard and quantitative risk identification methods in construction projects
ULO3: Review and improve risk management practices of civil engineering operations
ULO4: Develop and communicate safety and risk management strategies for safer construction projects
ULO5: Apply advanced techniques in analyzing and mitigating complex safety challenges in construction projects

General Assessment Information

In order to pass this unit a student must obtain a mark of 50 or more for the unit (i.e. obtain a passing grade P/ CR/ D/ HD).

For further details about grading, please refer below in the policies and procedures section.

In-class activities, or scheduled tests and exam must be undertaken at the time indicated in the unit guide. Should these activities be missed due to illness or misadventure, students may apply for Special Consideration.

All other assessments must be submitted by 5:00 pm on their due date.

Assessments not submitted by the due date will receive a mark of zero.

If you receive special consideration for the final exam, a supplementary exam will be scheduled by the faculty during a supplementary exam period, typically about 3 to 4 weeks after the normal exam period. By making a special consideration application for the final exam you are declaring yourself available for a resit during the supplementary examination period and will not be eligible for a second special consideration approval based on pre-existing commitments. Please ensure you are familiar with the policy prior to submitting an application. Approved applicants will receive an individual notification one week prior to the exam with the exact date and time of their supplementary examination.

Special Consideration

The Special Consideration Policy aims to support students who have been impacted by short-term circumstances or events that are serious, unavoidable and significantly disruptive, and which may affect their performance in assessment. If you experience circumstances or events that affect your ability to complete the written assessments in this unit on time, please inform the convenor and submit a Special Consideration request through ask.mq.edu.au.

Team Project final report and presentation

Assessment Type 1: Project
Indicative Time on Task 2: 35 hours
Due: Week 13
Weighting: 40%

This is part of a group project based on real life industry practice

On successful completion you will be able to:

- Identify and assess the major work health, safety and welfare legislation in the construction projects
- Demonstrate an in-depth understanding and use of hazard and quantitative risk identification methods in construction projects
- Review and improve risk management practices of civil engineering operations
- Develop and communicate safety and risk management strategies for safer construction projects
- Apply advanced techniques in analyzing and mitigating complex safety challenges in construction projects

Team Project initial proposal

Assessment Type 1: Report
Indicative Time on Task 2: 10 hours
Due: Week 6
Weighting: 10%

This is part of a group project.
On successful completion you will be able to:

- Identify and assess the major work health, safety and welfare legislation in the construction projects
- Demonstrate an in-depth understanding and use of hazard and quantitative risk identification methods in construction projects
- Review and improve risk management practices of civil engineering operations
- Develop and communicate safety and risk management strategies for safer construction projects
- Apply advanced techniques in analyzing and mitigating complex safety challenges in construction projects

**Final examination**

Assessment Type: Examination
Indicative Time on Task: 25 hours
Due: TBA
Weighting: 30%

Final examination to be held in exam period

On successful completion you will be able to:

- Identify and assess the major work health, safety and welfare legislation in the construction projects
- Demonstrate an in-depth understanding and use of hazard and quantitative risk identification methods in construction projects
- Review and improve risk management practices of civil engineering operations
- Develop and communicate safety and risk management strategies for safer construction projects
- Apply advanced techniques in analyzing and mitigating complex safety challenges in construction projects

**Mid session test**

Assessment Type: Quiz/Test
Indicative Time on Task: 15 hours
Due: Week 8
Weighting: **20%**

Students to solve a set of problems in a defined time.

On successful completion you will be able to:

- Identify and assess the major work health, safety and welfare legislation in the construction projects
- Demonstrate an in-depth understanding and use of hazard and quantitative risk identification methods in construction projects
- Review and improve risk management practices of civil engineering operations
- Apply advanced techniques in analyzing and mitigating complex safety challenges in construction projects

---

1 If you need help with your assignment, please contact:

- the academic teaching staff in your unit for guidance in understanding or completing this type of assessment
- the [Writing Centre](https://unitguides.mq.edu.au/unit_offerings/166897/unit_guide/print) for academic skills support.

2 Indicative time-on-task is an estimate of the time required for completion of the assessment task and is subject to individual variation.

**Delivery and Resources**

Teaching materials, including lecture notes and slides, are provided by the instructor. Please refer to ILearn for further information.

There is no tutorial session in Week 1.

**Unit Schedule**

The lectures for this unit are online and the SGTAs are face-to-face at Macquarie University campus. Please refer to ILearn.

**Policies and Procedures**

Macquarie University policies and procedures are accessible from [Policy Central](https://policies.mq.edu.au). Students should be aware of the following policies in particular with regard to Learning and Teaching:

- [Academic Appeals Policy](https://unitguides.mq.edu.au/unit_offerings/166897/unit_guide/print)
- [Academic Integrity Policy](https://unitguides.mq.edu.au/unit_offerings/166897/unit_guide/print)
Students seeking more policy resources can visit Student Policies (https://students.mq.edu.au/support/study/policies). It is your one-stop-shop for the key policies you need to know about throughout your undergraduate student journey.

To find other policies relating to Teaching and Learning, visit Policy Central (https://policies.mq.edu.au) and use the search tool.

**Student Code of Conduct**

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: https://students.mq.edu.au/admin/other-resources/student-conduct

**Results**

Results published on platform other than eStudent, (eg. iLearn, Coursera etc.) or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in eStudent. For more information visit ask.mq.edu.au or if you are a Global MBA student contact globalmba.support@mq.edu.au

**Academic Integrity**

At Macquarie, we believe academic integrity – honesty, respect, trust, responsibility, fairness and courage – is at the core of learning, teaching and research. We recognise that meeting the expectations required to complete your assessments can be challenging. So, we offer you a range of resources and services to help you reach your potential, including free online writing and maths support, academic skills development and wellbeing consultations.

**Student Support**

Macquarie University provides a range of support services for students. For details, visit http://students.mq.edu.au/support/

**The Writing Centre**

The Writing Centre provides resources to develop your English language proficiency, academic writing, and communication skills.

- Workshops
- Chat with a WriteWISE peer writing leader
- Access StudyWISE
- Upload an assignment to Studiosity
**Student Services and Support**

Macquarie University offers a range of **Student Support Services** including:

- **IT Support**
- **Accessibility and disability support** with study
- **Mental health support**
- **Safety support** to respond to bullying, harassment, sexual harassment and sexual assault
- **Social support including information about finances, tenancy and legal issues**
- **Student Advocacy** provides independent advice on MQ policies, procedures, and processes

**Student Enquiries**

Got a question? Ask us via **AskMQ**, or contact **Service Connect**.

**IT Help**

For help with University computer systems and technology, visit [http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/](http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/).

When using the University's IT, you must adhere to the **Acceptable Use of IT Resources Policy**. The policy applies to all who connect to the MQ network including students.

Unit information based on version 2024.01 of the **Handbook**
