5Rs Framework

5Rs Framework

The 5Rs Framework, developed by the School of Education at Macquarie University, is
embedded throughout your teacher education course.

Your use of the 5Rs Framework will help you develop the capabilities that will make your teaching career sustainable and fulfilling.

In this unit, you will learn using the 5Rs framework in the following important ways:

**Resilient:** This unit provides opportunities for students to key pedagogical leadership theories and strategies in early childhood education. During tutorials students will discuss and practice these skills. During class students will build on their skills such as problem-solving, critical analysis, self-awareness, task management, literacy and communication skills.

**Reflexive:** Students will critically review relevant literature when appraising policy and pedagogical issues as an educational leader in early childhood settings.

**Responsive:** Teaching is a relational profession: great teachers make deep connections with students, parents and communities. Most of us remember a great teacher we had at school: not because of the content they taught, but because they were inspiring; because of the connection they made with us, their interest in us as an individual, their care for our wellbeing and success. This unit encourages students to collaborate with their peers during tutorials about how they can make deep connections with centre staff to support professional learning.

**Ready to learn:** Students will design a professional learning project for a staff team.

**Research engaged:** Students will investigate complex information, concepts, and theories. Students will become more familiar with the Early Years Learning Framework and the accountability requirements as a teacher in terms of the NQF and NQS.
