Unit description

How do cultures in different parts of the world determine and understand who is mad, bad or sad? Madness, deviance and other forms of social difference are cultural constructs that vary considerably across both historical period and cultural context. Moreover, these ideas have profound moral implications that become dramatically entwined with people's lived experience, as well as broader socio-political structures. We examine the cultural and social construction of normality, with a focus on what happens when people find themselves outside these bounds. We will explore comparative perspectives on social structures and individual experiences and meaning, examining themes such as 'sanity', mental illness and culture, melancholy and depression, emotions, sexuality, gender norms, and their transgressions. Throughout, we will focus on the social processes of labeling, representation, medicalisation, and stigmatisation associated with these experiences. Ultimately, students will come to understand how difference is constructed and embodied, and become aware of how deviance is surveilled, managed, and constrained in a variety of cultural contexts.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: Demonstrate command of anthropological knowledge and theories related to normality, abnormality, and how social difference is constructed and managed within particular social, cultural, political, and environmental contexts.

ULO2: Analyse comparative ethnographic perspectives on themes related to culture and madness, disorder, deviance, addictions, and mental health.

ULO3: Identify and analyse the social and cultural factors that make madness a powerful metaphor and site of surveillance within societies.

ULO4: Apply critical analytic skills to discover how desire and deviance transcend individual bodies and are incited, monitored and regulated within the social body and the body politic.

ULO5: Demonstrate an ability to analyse and interpret the significance and impact of medicalisation, labelling and stigmatisation.

ULO6: Analyse and interpret assumptions about other cultures and cultural differences and what is considered 'natural' or 'normal' human experience.

ULO7: Demonstrate an ability to analyse the cultural construction of abnormality and difference within public representations of culture, madness and deviance.

General Assessment Information

Unless a Special Consideration request has been submitted and approved, a 5% penalty (of the total possible mark) will be applied each day a written assessment is not submitted, up until the 7th day (including weekends). After the 7th day, a mark of '0' (zero) will be awarded even if the assessment is submitted. Submission time for all non-timed written assessments (incl essays, reports, posters, portfolios, journals, recordings etc) is set at 11.55pm. A 1-hour grace period is provided to students who experience a technical issue. Late submission of time sensitive tasks (such as tests/exams/quizzes, performance assessments/presentations, scheduled practical assessments/labs etc) will only be addressed by the unit convenor in a Special consideration application. Special Consideration outcome may result in a new question or topic.

Delivery and Resources

In this unit, you will examine deviance and other phenomena considered "out of place" through

the lens of anthropology. Our primary focus will be on how forms of deviance are integral to cultural constructions, often reflecting underlying norms, values, and identities.

We will critically explore why deviations from the norm captivate so many of us. While many are drawn to true stories of deviance, anthropologists have endeavored to situate deviance within broader societal and cultural contexts. By engaging with various cross-cultural perspectives on deviance, this course will deepen your understanding of what it means to deviate from the expected.

The unit will be delivered through a combination of lectures and tutorials. The lectures will be interactive, providing ample opportunity for students to engage critically and inquisitively with the material. In the tutorials, we will continue these discussions in small groups, each focusing on a specific question in relation to scholarly writings, with regular group presentations fostering dynamic class exchanges.
