Lecturer

Young Lee

young.lee@mq.edu.au

Credit points

10

Prerequisites

50cp at 1000-level or above, including 20cp from (COMP1000 or COMP1010 or COMP1050 or COMP1150 or COMP1300 or COMP1350 or COMP1750 or MATH1007)

Corequisites

Co-badged status

Unit description

This unit introduces students to the principles and concepts of computer networking and cloud computing. The aim is to provide students with an understanding of the differing ways that networks are structured between corporate environments, the Internet, and The Cloud.

Topics include an introduction to computer organisation, network stacks and protocols, network addressing, inter-networking communications, utility computing, multi-tenanting, and an Introduction to security and network management.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: Discuss the organisation of physical compute and storage resources.

ULO2: Describe the arrangement and operation of physical networks, and the role of network protocol stacks.

ULO3: Demonstrate an understanding of IP addressing, routing and subnetting.

ULO4: Describe and use an arrangement and operation of cloud compute and storage resources.

ULO5: Describe and use an arrangement and operation of virtual networks.

ULO6: Compare and contrast various network management principles and orchestration approaches of cloud compute, communication, and storage resources.

ULO7: Demonstrate technical networking proficiency including ability to configure, construct, and document, and in simple cases, design networks, as well as the ability to perform traffic analysis on local area networks.

General Assessment Information

Week 1

The unit has three different scheduled class types:

- **Lecture.** Lectures begin in week 1. Attendance is recommended but not compulsory. Lectures are generally available via the ECHO360 to livestream or to view at a later date notwithstanding technical issues.
- **SGTA.** Small Group Teaching Activities begin in week 2. SGTAs are designed to provide students with examples related to lecture material, to relate the lecture material to the workshop exercises, and to act as scaffolding for the term project assessment. Each SGTA will include a preparatory task for the workshop.
- **Workshop.** Workshops begin in week 2. Practical classes offer the opportunity for students to engage in hands-on activities in order to apply what has been learned from the readings, lecture materials, and SGTA exercises.

Note that while the practical material is structured to follow the lecture material, students need to keep in mind that there will not always be a one to one mapping between the lecture topics and the weekly SGTA and workshop exercises. This is because of a need for some practical sessions to introduce new tools and techniques before following on from the related concepts from the readings and lecture materials.

Project

The project will test your understanding of selected networking and cloud technologies and their usage within an organisation (or across organisations) including issues relating to security. Students will be required to perform some independent research as part of the project and will be given the opportunity to receive feedback before final submission.

Release Date

The initial project specification will be released no later than 31 March (Sunday of Week 4).

Exams

Students will sit a final exam to assess their understanding of the unit material in an invigilated environment. The final exam is an iLearn-based quizz that assess concepts covered in lectures, SGTAs, and workshops. **There is only 1 attempt at the exam.**

If you miss the final exam due to illness / misadventure, then a supplementary exam will only be arranged upon an approved special consideration application. Otherwise, a mark of 0 will be applied for the exam. For details of the exam schedule refer to the eStudent site, and to the COMP2270 unit information section in iLearn for updates and scope of examination. Details of the special considerations policy can be found [here](#).

Requirements to pass this unit

In order to pass the unit, you must achieve a final grade of 50 out of 100 or above. Each assessment contributes to a certain percentage of the final grade. These weightings are listed in the assessment tasks table in this unit guide.

Late Assessment Submission

Late Assessment Submission Penalty

Unless a [Special Consideration](#) request has been submitted and approved, a 5% penalty (of the total possible mark of the task) will be applied for each day a written report or presentation assessment is not submitted, up until the 7th day (including weekends). After the 7th day, a grade of '0' will be awarded even if the assessment is submitted. The submission time for all uploaded assessments is 11:55 pm. A 1-hour grace period will be provided to students who experience a technical concern. For any late submission of time-sensitive tasks, such as scheduled tests/exams, performance assessments/presentations, and/or scheduled practical assessments/labs, please apply for Special Consideration. For example, if the assignment is worth 8 marks (of the entire unit) and your submission is late by 19 hours (or 23 hours 59 minutes 59 seconds), 0.4 marks (5% of 8 marks) will be deducted. If your submission is late by 24 hours (or 47 hours 59 minutes 59 seconds), 0.8 marks (10% of 8 marks) will be deducted, and so on.

Assessments where Late Submissions will be accepted

- Project – YES, Standard Late Penalty applies
- Skills exercises - NO, unless Special Consideration is Granted
- Final exam - NO, unless Special Consideration is Granted

Special Consideration

The Special Consideration Policy aims to support students who have been impacted by short-term circumstances or events that are serious, unavoidable and significantly disruptive, and which may affect their performance in assessment. If you experience circumstances or events that affect your ability to complete the assessments in this unit on time, please submit a Special Consideration request via connect.mq.edu.au.

Written Assessments:

If you experience circumstances or events that affect your ability to complete the project assessments in this unit on time, or if you miss the final exam, please submit a Special Consideration.

Assessment Tasks

Name	Weighting	Hurdle	Due
Project	30%	No	2025-05-25
Skills Exercise	30%	No	Week 8 : in your registered workshop.
Final exam	40%	No	Exam Period

Project

Assessment Type ¹: Project

Indicative Time on Task ²: 36 hours

Due: **2025-05-25**

Weighting: **30%**

The project tests student's understanding of selected networking and cloud technologies and their usage within an organisation (or across organisations) including issues relating to security. Students will receive continuous feedback on the project prior to submission. Project will include a report and reflection based on the actioned feedback.

On successful completion you will be able to:

- Discuss the organisation of physical compute and storage resources.
- Describe the arrangement and operation of physical networks, and the role of network protocol stacks.
- Demonstrate an understanding of IP addressing, routing and subnetting.
- Describe and use an arrangement and operation of cloud compute and storage resources.
- Describe and use an arrangement and operation of virtual networks.
- Compare and contrast various network management principles and orchestration approaches of cloud compute, communication, and storage resources.

Skills Exercise

Assessment Type ¹: Practice-based task

Indicative Time on Task ²: 24 hours

Due: **Week 8 : in your registered workshop.**

Weighting: **30%**

Students will be assessed during a particular week (to be specified in the unit guide) based on the tasks they have completed in practical classes/ SGTAs over the entire session.

On successful completion you will be able to:

- Demonstrate technical networking proficiency including ability to configure, construct, and document, and in simple cases, design networks, as well as the ability to perform traffic analysis on local area networks.

Final exam

Assessment Type ¹: Examination

Indicative Time on Task ²: 15 hours

Due: **Exam Period**

Weighting: **40%**

The final examination ask students to answer conceptual questions about the course material as well as solve simple networking problems.

On successful completion you will be able to:

- Discuss the organisation of physical compute and storage resources.
- Describe the arrangement and operation of physical networks, and the role of network protocol stacks.
- Demonstrate an understanding of IP addressing, routing and subnetting.
- Describe and use an arrangement and operation of cloud compute and storage resources.
- Describe and use an arrangement and operation of virtual networks.
- Compare and contrast various network management principles and orchestration approaches of cloud compute, communication, and storage resources.

¹ If you need help with your assignment, please contact:

- the academic teaching staff in your unit for guidance in understanding or completing this type of assessment
- the Writing Centre for academic skills support.

² Indicative time-on-task is an estimate of the time required for completion of the assessment task and is subject to individual variation

Delivery and Resources

Lectures

Lectures are the primary introduction for content along with the prescribed readings (see below for details). The lecture is 2 hours each week. Students enrolled in the "live stream" class for the lecture are welcome to attend the lecture on campus. The lectures are recorded using the ECHO360 platform and recordings (assuming no technical difficulties occur) are made available through the unit iLearn page.

Small Group Teaching Activities (SGTA) and Workshop Classes

Scheduled SGTA and Workshop classes for COMP2270 start in week 2.

Each week, students are encouraged to attend two hours of lectures, a one hour SGTA, and a two hour workshop (except in week 1 as noted above). For details of days, times and rooms consult eStudent.

Students must attend the classes that they are enrolled in.

Text Books and Digital Resources (Leganto)

The textbook for the unit is:

Fitzgerald, J. & Dennis, A, Business Data Communications and Networking, Fourteenth Edition, Wiley, 2021

The university does have a *limited number* of 'seats' available for online access to this text book (using your OneID to log in) through the Leganto block on iLearn.

Any additional reading for the unit will be provided via links accessed via iLearn.

Technologies Used and Required

This unit will be using lab computers for the workshop activities, quizzes and exams must be completed on the lab computers. As all the software used in the unit is free of cost, for some activities students will be encouraged to bring their personal laptop computer to class.

Communication Methods in COMP2270

All announcements about unit-related matters will be communicated through iLearn. It is the student's responsibility to ensure they check iLearn announcements, forums, and FAQ sections regularly.

Students are encouraged to use the iLearn forums for asking questions about unit content and concepts. Where questions are about specific details in an assessment submission, this may need to be sent via a private forum post in the first instance (details are provided in iLearn about how this is set up) so as not to be at risk of breaching the university academic integrity policy.

Students should use the appropriate iLearn forms for contacting staff. There may be occasions where unit staff will email a student directly to their @students.mq.edu.au email address. It is the student's responsibility to ensure they check their official university email regularly for communications from the university staff. Ensure that you read the unit iLearn communications section carefully about where to best direct your query depending on the nature of the query.

Policies and Procedures

Macquarie University policies and procedures are accessible from [Policy Central \(https://policies.mq.edu.au\)](https://policies.mq.edu.au). Students should be aware of the following policies in particular with regard to Learning and Teaching:

- [Academic Appeals Policy](#)
- [Academic Integrity Policy](#)
- [Academic Progression Policy](#)
- [Assessment Policy](#)
- [Fitness to Practice Procedure](#)
- [Assessment Procedure](#)
- [Complaints Resolution Procedure for Students and Members of the Public](#)
- [Special Consideration Policy](#)

Students seeking more policy resources can visit [Student Policies \(https://students.mq.edu.au/support/study/policies\)](https://students.mq.edu.au/support/study/policies). It is your one-stop-shop for the key policies you need to know about throughout your undergraduate student journey.

To find other policies relating to Teaching and Learning, visit [Policy Central \(https://policies.mq.edu.au\)](https://policies.mq.edu.au) and use the [search tool](#).

Student Code of Conduct

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: <https://students.mq.edu.au/admin/other-resources/student-conduct>

Results

Results published on platform other than [eStudent](#), (eg. iLearn, Coursera etc.) or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in [eStudent](#). For more information visit connect.mq.edu.au or if you are a Global MBA student contact globalmba.support@mq.edu.au

Academic Integrity

At Macquarie, we believe [academic integrity](#) – honesty, respect, trust, responsibility, fairness and courage – is at the core of learning, teaching and research. We recognise that meeting the expectations required to complete your assessments can be challenging. So, we offer you a range of resources and services to help you reach your potential, including free [online writing and maths support](#), [academic skills development](#) and [wellbeing consultations](#).

Student Support

Macquarie University provides a range of support services for students. For details, visit <http://students.mq.edu.au/support/>

Academic Success

[Academic Success](#) provides resources to develop your English language proficiency, academic writing, and communication skills.

- [Workshops](#)
- [Chat with a WriteWISE peer writing leader](#)
- [Access StudyWISE](#)
- [Upload an assignment to Studiosity](#)
- [Complete the Academic Integrity Module](#)

The Library provides online and face to face support to help you find and use relevant information resources.

- [Subject and Research Guides](#)
- [Ask a Librarian](#)

Student Services and Support

Macquarie University offers a range of [Student Support Services](#) including:

- [IT Support](#)
- [Accessibility and disability support](#) with study
- Mental health [support](#)
- [Safety support](#) to respond to bullying, harassment, sexual harassment and sexual assault
- [Social support including information about finances, tenancy and legal issues](#)
- [Student Advocacy](#) provides independent advice on MQ policies, procedures, and processes

Student Enquiries

Got a question? Ask us via the [Service Connect Portal](#), or contact [Service Connect](#).

IT Help

For help with University computer systems and technology, visit http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/.

When using the University's IT, you must adhere to the [Acceptable Use of IT Resources Policy](#). The policy applies to all who connect to the MQ network including students.

Changes from Previous Offering

This is the first offering of the unit.

Changes since First Published

Date	Description
16/02/2025	Adjusted skills exercise due date in consultation with director of the BIT.
15/02/2025	Updates made at request of program director of the BIT.

Unit information based on version 2025.02 of the [Handbook](#)
