Unit description

This unit enables students to explore industry practices including vocal recording and performance. With the aim of exploring individuality in singing, the unit explores a variety of creative vocal practices. Vocal processing and technological applications on the singing voice are also explored. The unit provides students with experiences of singing in recording, in musically arranging and in structuring/analysing vocal performances. Students will be allocated a recording/mixing session. Throughout the unit, students progressively engage in critical thinking and listening related to the singer and to music more broadly.
