Unit description

Social impact assessment (SIA) is an important assessment tool which applies social science methodologies to the evaluation of a wide range of public policy proposals, including those relating to land use planning, social policies and public health. This unit addresses the theory and methods of SIA, discusses the public policy processes which use this assessment, and applies a critical perspective to the ethical dilemmas facing the SIA practitioner. There is a practical focus to the course work through the use of current case studies, and this provides students with an insight into pressures and political difficulties frequently encountered.

Students will learn how to recognise and respond to these problems, and present issues to non-specialist audiences. All enrolment queries should be directed to Open Universities

Australia (OUA): see www.open.edu.au

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

- ULO1:** Explain the theory underpinning SIA and its role and use in practice
- ULO2:** Recognise key social impact issues that occur in land use development and public policy assessment
- ULO3:** Apply knowledge and key concepts from social impact assessment to critical evaluation of planning and policy decisions
- ULO4:** Identify and discuss ways of integrating social issues into public sector discourse and practice
- ULO5:** Research and discuss complex ideas about social change, social process and assessment of social impacts
- ULO6:** Recognise ethical issues and risks in evaluation and impact assessment

General Assessment Information

To successfully pass GEOX8010 students must complete all assessment tasks. Failure to complete any single assessment task may result in failure of the unit. The final grade is based on the total mark accumulated from all assessment tasks.

All students must keep a clean electronic copy of all assignments (preferably as a PDF) submitted for assessment.

Late Submission Penalty

Circumstances that affect your ability to complete assignments by the deadline must be discussed with the unit convenor prior to the due date. Extensions will be granted only in unforeseen or exceptional circumstances according to the University Special Consideration policy. Students must apply online via AskMQ and provide appropriate supporting documentation (e.g. medical certificate).

Unless a Special Consideration request has been submitted and approved, a **5% penalty** (of the total possible mark) will be applied each day a written assessment is not submitted, up until the 7th day (including weekends). After the 7th day, a mark of '0' (zero) will be awarded even if the assessment is submitted.

Submission time for all written assessments is set at 11.55 pm. A 1-hour grace period is provided to students who experience a technical issue. This late penalty will apply to non-time sensitive assessment (incl. essays, reports, posters, portfolios, journals, recordings etc). Late submission of time sensitive tasks (such as tests/exams, performance assessments/presentations, scheduled practical assessments/labs etc) will only be addressed by the unit convenor in a Special Consideration application. Special Consideration outcome may result in a new question or topic.

Delivery and Resources

Seminars and workshops

The unit is structured around weekly themes. Each week students are expected to complete the assigned readings for that theme prior to class, and engage in discussions, activities and reflections to deepen their learning. The classes each week are approximately 3 hours long and involve a mix of activities including seminars, workshops and discussion-based activities (debates, Q&A, role plays).

Seminars (1.5 hours) will be available via Echo360 on iLearn.

GEOX8010 has a full schedule of online activities that enhance your general and discipline-specific skills and knowledge. Students are expected to contribute brief postings online and to constructively engage with others' postings.

Workload Expectation

GEOX8010 uses a combination of recorded seminars and web-based learning opportunities. It is expected that all students in the unit will both participate and contribute to classes, including completing the required readings and participating in class discussions. Students are expected to frequently access material online and participate in online discussions.

Unit webpage

The webpage for this unit can be found at iLearn, the Macquarie University online learning system at <https://ilearn.mq.edu.au>. iLearn has both a discussion board and an internal email system. The webpage will provide you with access to lectures through the University's echo360 lecture recording facility, as well as to follow-up discussion, links, readings and forum discussions. Access to the website is essential to complete GEOP8010.

Readings

Unit readings include a mix of academic, peer-reviewed readings and some policy documents. All readings will be available via Leganto from the iLearn site.

Unit Schedule

The unit is designed around four key modules:

Module I - Introduction to and guiding concepts in SIA (weeks 1-2)

Module II - Methods and process in SIA (weeks 3-4)

Module III - SIA in practice (weeks 5-12)

Module IV - Conclusion and review (week 13)

Policies and Procedures
