Unit description This unit introduces students to the dynamics of modern warfare. War is a complex thing and force continues to be employed extensively by a range of state and non-state actors with major implications for national, international, and human security. The unit provides students with the theoretical tools required to make sense of the different forms and levels of modern warfare as well as the operational concepts and approaches which underpin its conduct. The unit critically considers a range of pressing issues and debates relating to the practice of warfare, with a particular emphasis on the impact of new technologies, the role of information, and ethical considerations. Through detailed analysis of contemporary military operations, students will learn to assess the utility of force by examining its political effects and consequences. All enrolment queries should be directed to Open Universities Australia (OUA): see www.open.edu.au
