Unit description

This unit explores the various forms of intellectual property protected under statutory regimes and general law. The unit identifies and evaluates existing intellectual property regimes such as copyright, patents, plant breeders' rights, designs, trade mark, passing off and relevant aspects of unfair trading laws. The unit analyses the subject matter protected, conditions of such protection and what constitutes infringement for each head of protection. Students are taught to identify and explain the interrelationship and overlaps between different intellectual property regimes. Students learn how to apply intellectual property principles and policy in practical scenarios.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: Describe and analyse the fundamental principles of intellectual property law.

ULO2: Demonstrate detailed and comprehensive knowledge of the specific rules in intellectual property law through the close critique of legislation, case law and law reform policy discourse.

ULO3: Exhibit skills of legal analysis through the application of the law to hypothetical fact situations involving intellectual property law

ULO4: Identify intellectual property law issues and apply the relevant law to provide accurate legal advice, including where relevant, assessment of the likely outcome.

General Assessment Information

All written assessments submitted electronically must be submitted through the link provided in iLearn. This unit will utilise Turnitin plagiarism detection software. Students should carefully check that they submit the correct file for an assessment, as re-submissions will not be accepted after the due date and time, including instances where students upload an incorrect file in error.

The design, moderation and feedback of all assessments is in accordance with the Macquarie University Assessment Procedure (link provided under 'Policies and Procedures' below).

Late Submission Policy

A maximum penalty of five (5) percentage points of the total possible marks will be applied per day to late submissions, for up to a maximum of seven calendar days. Tasks that have not been submitted within the maximum number of additional late days will receive a mark of zero. This provision does not apply to exams or other assessment with a time limit of less than 24 hours.

Penalties for late submission will be applied consistently and equitably to all students enrolled in

the unit. Where short-term, serious and unavoidable circumstances have affected their ability to submit an assessment task, a student must submit a formal application for Special Consideration as per the Special Consideration Policy. Students should not request an informal arrangement from their tutor, lecturer or Unit Convenor.

Where an application for Special Consideration is approved, and the outcome is an extension to the due date of a task, submissions that are received after the new due date will be subject to late penalties that are calculated from the new due date. This only applies where the outcome is an extension to the due date – see the Special Consideration Policy for a schedule of all possible outcomes.

Special Consideration

Students should submit applications for Special Consideration electronically via the Service Connect portal, along with the supporting documentation. Before submitting their applications, students should refer to the Special Consideration Policy (link provided under 'Policies and Procedures' below).
