Unit description

Contemporary violent extremism has evolved far beyond traditional terrorism, encompassing a range of ideological movements that threaten democratic institutions, social cohesion, and public safety. This transformation reflects shifting societal dynamics and the disruptive influence of digital technologies on how extremist ideas spread and communities mobilise. This unit examines the expanding landscape of violent extremism, including far-right and antisemitic movements, violent misogyny and incels, nihilistic violence, conspiracy-driven groups such as QAnon, and disinformation networks. Students will explore how technologies such as social media, encrypted communications, generative AI, and online gaming environments have become powerful tools for radicalisation and mobilisation. The unit also critically evaluates countering violent extremism (CVE) strategies and social resilience programs, exploring their effectiveness in addressing these emerging threats. Students will develop the conceptual and analytical skills needed to assess and respond to the complex challenges of modern extremism.
