Unit description
This unit will explore what language is and how it develops in early childhood from birth to
eight years of age. The relationship between language, learning and culture will be
investigated. Students will consider different definitions of literacy and examine how oral
language in the early years of life relates to subsequent knowledge of written, visual and aural
texts. Issues to be addressed include how to create a language and literacy rich environment
and the central role of adults in supporting children's language and literacy development in a
range of contexts.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are
available at https://students.mq.edu.au/important-dates

Learning Outcomes

1. Use appropriate metalanguage when analysing language structure and function.
2. Demonstrate understanding of the relationship between oral language, adult-child
interaction and literacy development.
3. Evaluate EC settings in terms of language and literacy development.
4. Pedagogical strategies for promoting language and literacy development.
5. Use peer reviewed research to justify decision making.
6. Use academic language appropriately to express ideas and arguments.
