Unit description
This unit explores current issues and debates affecting pedagogy, practice, politics and policy in early childhood education. Students will explore a range of responses to state, national and international influences on provision of nurturant educational services in the early childhood years. We will consider individual approaches to teaching practice as well as policy development in the delivery of various services used by young children and their families. This will include the investigation of approaches to reconceptualising early childhood pedagogy as well as the achievements of major government initiatives directed at the education, health and wellbeing of young children and their families.
