<tbody>
<tr>
<td>The unit will critically engage with the concepts of biodiversity and biotechnology from legal and interdisciplinary points of view. It will provide an overview of international instruments and current negotiations relevant to biodiversity, as well as to 'access and benefit-sharing' in genetic resources, especially the 1992 Convention on Biological Diversity (CBD). Legislation, policies, and programmes implemented in Australia and other countries in compliance with the CBD and related international instruments aimed at promoting and protecting biodiversity and regulating trade and intellectual property rights in this field will be examined and evaluated in case studies and court decisions.</td>

## Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at [https://students.mq.edu.au/important-dates](https://students.mq.edu.au/important-dates)

## Learning Outcomes

On successful completion of this unit, you will be able to:

- Understand and appreciate the value and role of biodiversity and biotechnology and the
need to preserve eco-system services for human and non-human species
To be informed about the purpose, scope and effect of law, policies and programmes protecting biodiversity and regulating biotechnology at international, national, state and local levels
To engage in and critically evaluate the management of biodiversity by local government
To engage in learning and assessment tasks which challenge assumptions about the value of biodiversity and biotechnology, how protection is achieved in the global commons and propose reform to the institutional framework
To be informed about how non-legal strategies for biodiversity protection and biotechnology regulation and the way in which they interact and complement the regulatory framework
To consider and discuss current issues that affect biodiversity and biotechnology including climate change, pollution and bio-cultural heritage

</tbody>
</table>

Class Presentation

Due: April 28, 2014
Weighting: 20%

Students will prepare and deliver a 10-15 minute oral presentation on a topic linked to biodiversity protection and biotechnology regulation on Day 3 of the On Campus Session (OCS).

A written abstract of the intended topic must be approved by the Convener by no later than Day 1 of the OCS.

A written summary (up to 1,000 words) must be submitted at the conclusion of the oral presentation.

Each part of the task - oral presentation and written summary is worth 10% of the total of 20%

On successful completion you will be able to:
- Understand and appreciate the value and role of biodiversity and biotechnology and the need to preserve eco-system services for human and non-human species
To be informed about the purpose, scope and effect of law, policies and programmes protecting biodiversity and regulating biotechnology at international, national, state and local levels
• To engage in learning and assessment tasks which challenge assumptions about the value of biodiversity and biotechnology how protection is achieved in the global commons and propose reform to the institutional framework
• To be informed about how non-legal strategies for biodiversity protection and biotechnology regulation and the way in which they interact and complement the regulatory framework
• To consider and discuss current issues that affect biodiversity and biotechnology including climate change, pollution and bio-cultural heritage

Field Trip
Due: April 28@9am and May 3@4pm
Weighting: 30%

Students must attend a field trip to the Dalrymple-Hay Reserve at Pymble on Day 3 of the OCS being Friday April 28, 2014 between 9am-12noon. Students will learn about Kuring-gai Municipal Council's (KMC) efforts to manage and protect vulnerable areas of biodiversity within a highly urbanized area. The field trip will focus on a case study of KMC's management of the largest section of the remaining Blue Gum High Forest (BGHF). The BGHF has been selected as an example of an area which is listed both as a critically endangered ecological community under the Environmental Protection Biodiversity Conservation Act 1999 (Cth) (EPBC Act) and as an endangered ecological community in NSW under the Threatened Species Conservation Act 1995 (NSW) (TSC Act).

Students must prepare a reflective report critically evaluating KMC's performance in managing the biodiversity values of the BGHF and propose reform if appropriate.

The report should be typed, double spaced and contain appropriate legal referencing and a bibliography. The written report is due Monday May 5 at 4pm. The written report is worth 20% of the total mark for this assessment task of 30%.

On successful completion you will be able to:
• Understand and appreciate the value and role of biodiversity and biotechnology and the need to preserve eco-system services for human and non-human species
• To be informed about the purpose, scope and effect of law, policies and programmes protecting biodiversity and regulating biotechnology at international, national, state and local levels
• To engage in and critically evaluate the management of biodiversity by local government
• To engage in learning and assessment tasks which challenge assumptions about the
value of biodiversity and biotechnology how protection is achieved in the global commons and propose reform to the institutional framework

• To be informed about how non-legal strategies for biodiversity protection and biotechnology regulation and the way in which they interact and complement the regulatory framework

• To consider and discuss current issues that affect biodiversity and biotechnology including climate change, pollution and bio-cultural heritage

Research Paper

Due: **Friday May 30 at 9am**

Weighting: **50%**

Students will prepare a written research paper on a topic relevant to biodiversity protection and/or biotechnology regulation relevant the the issues raised in the Unit. Each student must submit an abstract of their proposed topic for approval by the Convener no later than the conclusion of Day 3 of the OCS. The maximum length of the paper is 6,000 words, with proper legal referencing (see The Australian Guide To Legal Citation- http://www.law.unimelb.edu.au/files/dmfile/FinalOnlinePDF-2012Reprint.pdf) and a bibliography.

On successful completion you will be able to:

• Understand and appreciate the value and role of biodiversity and biotechnology and the need to preserve eco-system services for human and non-human species

• To be informed about the purpose, scope and effect of law, policies and programmes protecting biodiversity and regulating biotechnology at international, national, state and local levels

• To engage in learning and assessment tasks which challenge assumptions about the value of biodiversity and biotechnology how protection is achieved in the global commons and propose reform to the institutional framework

• To be informed about how non-legal strategies for biodiversity protection and biotechnology regulation and the way in which they interact and complement the regulatory framework

• To consider and discuss current issues that affect biodiversity and biotechnology including climate change, pollution and bio-cultural heritage

Delivery and Resources

Delivery and Resources

**Delivery:** Day, Intensive
This unit will use: iLearn

Times and Locations for Lectures and Tutorials:

For current updates, lecture times and classrooms please consult the MQ Timetables website:

http://timetables.mq.edu.au

This course is scheduled to run as an intensive course from Saturday 26th of April 2014 to Monday 28th of April 2014.

REQUIRED AND RECOMMENDED TEXTS AND/OR MATERIALS

Recommended texts:

McManis C(ed) Biodiversity and the law Intellectual property, Biotechnology and Traditional Knowledge Earthscan, Uk/USA, 2009

Jeffery M.J.& Ors (eds) Biodiversity, Conservation, Law and Livelihoods Bridging the North-South Divide Cambridge University Press, 2010

Rimmer M Intellectual Property and Biotechnology Edward Elgar Publishing 2011

Students may purchase these texts if they wish but they may be available for loan.

REQUIRED READING

Preston BJ, "The Role of Law in the Protection of Biological Diversity in the Asia Pacific Region" (1995) 12 EPLJ 264

Bradsen J, "Biodiversity Legislation: Species, Vegetation, Habitat" (1992), 9 EPLJ 175

Australia’s Biodiversity Conservation Strategy 2010-2030

Carroll E, "Implementation of the Convention on Biological Diversity by local
government in NSW" (2004), 9 LGLJ 186

Australia's Biodiversity and Climate Change, CSIRO Publishing, 2009

FURTHER READING

UNEP, "Emerging Issues for Biodiversity Conservation in a Changing Climate", CBD Technical Series No. 29, 2007

Bray Z, "Reconciling development and natural beauty: The promise and dilemma of conservation easements" (2010), 34 Harvard Environmental Law Review 119

Kelly AH & Stoianoff NP, "Biodiversity conservation, local government finance and differential rates: The good, the bad and the potentially attractive" (2009), 26 EPLJ 5
INTERNATIONAL CONVENTIONS

OTHER BIODIVERSITY-RELATED TREATIES

- 1971 Ramsar Convention on Wetlands (RAMSAR)

- 1972 World Heritage Convention (WHC)

- 1979 Bonn Convention on Migratory Species (CMS)

Online units can be accessed at:  
http://ilearn.mq.edu.au

PC and Internet access are required. Basic computer skills (e.g., internet browsing) and skills in word processing are also a requirement.

Please consult teaching staff for any further, more specific requirements.

Academic honesty is an integral part of the core values and principles contained in the Macquarie University Ethics Statement:  

Its fundamental principle is that all staff and students act with integrity in the creation, development, application and use of ideas and information. This means that:

• All academic work claimed as original is the work of the author making the claim.
• All academic collaborations are acknowledged.
• Academic work is not falsified in any way
• When the ideas of others are used, these ideas are acknowledged appropriately.

The link below has more details about the policy, procedure and schedule of penalties that will apply to breaches of the Academic Honesty Policy which can be viewed at: 
http://www.mq.edu.au/policy/docs/academic_honesty/policy.html
Macquarie University provides a range of Student Support Services. Details of these services can be accessed at:

Another useful support service is provided by the Learning Skills unit which you can find at: http://www.mq.edu.au/learningskills/.

**Arts Student Centre**

Centre staff are there to smooth the way into university life; answer questions; give informed advice; provide a sympathetic ear; de-mystify uni ways and procedures.

The Faculty Assessment Coversheet and Arts online submissions for Special Approval, Special Consideration, Grade Review and Grade Appeal are located at: www.arts.mq.edu.au/current_students/undergraduate.

**Unit Schedule**

*Day 1: Saturday 26 April 2014*

**Session 1: Introduction (9.00am - 10.00am)**

- Unit aims and themes
• Assessment and penalties
• Oral presentation
• Field trip

Session 2: Concepts and definitions of biodiversity and biotechnology (10.30am - 1.00pm)
Lunch (1.00pm - 2.00pm)

Session 3: Key threats and strategies of biodiversity (2.00pm -4.00pm)

Session 4: International responses (4.00pm - 5.00pm)
• Convention on Biological Diversity and Protocols
• International Treaty on Plant Genetic Resources for Food and Agriculture

Day 2: Sunday 27 April 2014

Session 5: International responses continued (9.00 am - 10.30am)
• Convention on International Trade in Endangered Species of Wild Fauna and Flora
• Convention on Wetlands of International Importance
• Convention Concerning the Protection of the World Cultural and Natural Heritage

Session 6: National responses (11.00 am - 1.00pm)
• Environment Protection and Biodiversity Conservation Act 1995 (Cth)
• Federal regulation of biotechnology
• Gene Technology Act 2000 (Cth)

Lunch (1.00pm - 2.00pm)

Session 7: State responses (2.00pm - 3.30pm)
• State regulation of biodiversity and biotechnology

Session 8: Emerging issues (3.30pm - 5.00pm)
• Climate change
• biocultural protection- loss of indigenous language and impact on biodiversity protection

Day 3: Monday 28 April 2014

Session 9: Student presentations (9.00am - 12.30pm)
• Student presentations
• Research paper topics

Lunch (12.30pm - 1.30pm)

Field trip (1.30pm - 5.00pm)
• Field trip to Darymple Hay reserve (a Blue Gum High Forest endangered ecological
Policies and Procedures

Macquarie University policies and procedures are accessible from Policy Central. Students should be aware of the following policies in particular with regard to Learning and Teaching:

In addition, a number of other policies can be found in the Learning and Teaching Category of Policy Central.

**Student Code of Conduct**

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: [https://students.mq.edu.au/support/student_conduct/](https://students.mq.edu.au/support/student_conduct/)

**Student Support**

Macquarie University provides a range of support services for students. For details, visit [http://students.mq.edu.au/support/](http://students.mq.edu.au/support/)

**Learning Skills**

Learning Skills ([mq.edu.au/learningskills](http://mq.edu.au/learningskills)) provides academic writing resources and study strategies to improve your marks and take control of your study.

- **Workshops**
- **StudyWise**
- **Academic Integrity Module for Students**
- **Ask a Learning Adviser**
Student Enquiry Service
For all student enquiries, visit Student Connect at ask.mq.edu.au

Equity Support
Students with a disability are encouraged to contact the Disability Service who can provide appropriate help with any issues that arise during their studies.

IT Help
For help with University computer systems and technology, visit http://informatics.mq.edu.au/helpp.

When using the University's IT, you must adhere to the Acceptable Use Policy. The policy applies to all who connect to the MQ network including students.

Graduate Capabilities

PG - Discipline Knowledge and Skills
Our postgraduates will be able to demonstrate a significantly enhanced depth and breadth of knowledge, scholarly understanding, and specific subject content knowledge in their chosen fields.

This graduate capability is supported by:

Learning outcomes

- Understand and appreciate the value and role of biodiversity and biotechnology and the need to preserve eco-system services for human and non-human species
- To be informed about the purpose, scope and effect of laws, policies and programmes protecting biodiversity and regulating biotechnology at international, national, state and local levels
- To engage in and critically evaluate the management of biodiversity by local government
- To engage in learning and assessment tasks which challenge assumptions about the value of biodiversity and biotechnology how protection is achieved in the global commons and propose reform to the institutional framework
- To be informed about how non-legal strategies for biodiversity protection and biotechnology regulation and the way in which they interact and complement the regulatory framework
- To consider and discuss current issues that affect biodiversity and biotechnology including climate change, pollution and bio-cultural heritage
Assessment tasks

- Class Presentation
- Field Trip
- Research Paper

PG - Critical, Analytical and Integrative Thinking

Our postgraduates will be capable of utilising and reflecting on prior knowledge and experience, of applying higher level critical thinking skills, and of integrating and synthesising learning and knowledge from a range of sources and environments. A characteristic of this form of thinking is the generation of new, professionally oriented knowledge through personal or group-based critique of practice and theory.

This graduate capability is supported by:

Learning outcomes

- Understand and appreciate the value and role of biodiversity and biotechnology and the need to preserve eco-system services for human and non-human species
- To be informed about the purpose, scope and effect of law, policies and programmes protecting biodiversity and regulating biotechnology at international, national, state and local levels
- To engage in and critically evaluate the management of biodiversity by local government
- To engage in learning and assessment tasks which challenge assumptions about the value of biodiversity and biotechnology how protection is achieved in the global commons and propose reform to the institutional framework
- To be informed about how non-legal strategies for biodiversity protection and biotechnology regulation and the way in which they interact and complement the regulatory framework
- To consider and discuss current issues that affect biodiversity and biotechnology including climate change, pollution and bio-cultural heritage

Assessment tasks

- Class Presentation
- Field Trip
- Research Paper

PG - Research and Problem Solving Capability

Our postgraduates will be capable of systematic enquiry; able to use research skills to create new knowledge that can be applied to real world issues, or contribute to a field of study or practice to enhance society. They will be capable of creative questioning, problem finding and
problem solving.

This graduate capability is supported by:

**Learning outcomes**

- Understand and appreciate the value and role of biodiversity and biotechnology and the need to preserve eco-system services for human and non-human species
- To be informed about the purpose, scope and effect of law, policies and programmes protecting biodiversity and regulating biotechnology at international, national, state and local levels
- To engage in and critically evaluate the management of biodiversity by local government
- To engage in learning and assessment tasks which challenge assumptions about the value of biodiversity and biotechnology how protection is achieved in the global commons and propose reform to the institutional framework
- To be informed about how non-legal strategies for biodiversity protection and biotechnology regulation and the way in which they interact and complement the regulatory framework
- To consider and discuss current issues that affect biodiversity and biotechnology including climate change, pollution and bio-cultural heritage

**Assessment tasks**

- Class Presentation
- Field Trip
- Research Paper

**PG - Effective Communication**

Our postgraduates will be able to communicate effectively and convey their views to different social, cultural, and professional audiences. They will be able to use a variety of technologically supported media to communicate with empathy using a range of written, spoken or visual formats.

This graduate capability is supported by:

**Learning outcomes**

- Understand and appreciate the value and role of biodiversity and biotechnology and the need to preserve eco-system services for human and non-human species
- To engage in and critically evaluate the management of biodiversity by local government
- To engage in learning and assessment tasks which challenge assumptions about the value of biodiversity and biotechnology how protection is achieved in the global commons and propose reform to the institutional framework
• To be informed about how non-legal strategies for biodiversity protection and biotechnology regulation and the way in which they interact and complement the regulatory framework
• To consider and discuss current issues that affect biodiversity and biotechnology including climate change, pollution and bio-cultural heritage

Assessment tasks
• Class Presentation
• Field Trip
• Research Paper

PG - Engaged and Responsible, Active and Ethical Citizens

Our postgraduates will be ethically aware and capable of confident transformative action in relation to their professional responsibilities and the wider community. They will have a sense of connectedness with others and country and have a sense of mutual obligation. They will be able to appreciate the impact of their professional roles for social justice and inclusion related to national and global issues

This graduate capability is supported by:

Learning outcomes
• Understand and appreciate the value and role of biodiversity and biotechnology and the need to preserve eco-system services for human and non-human species
• To be informed about the purpose, scope and effect of law, policies and programmes protecting biodiversity and regulating biotechnology at international, national, state and local levels
• To engage in and critically evaluate the management of biodiversity by local government
• To engage in learning and assessment tasks which challenge assumptions about the value of biodiversity and biotechnology how protection is achieved in the global commons and propose reform to the institutional framework
• To be informed about how non-legal strategies for biodiversity protection and biotechnology regulation and the way in which they interact and complement the regulatory framework
• To consider and discuss current issues that affect biodiversity and biotechnology including climate change, pollution and bio-cultural heritage

Assessment tasks
• Class Presentation
• Field Trip
PG - Capable of Professional and Personal Judgment and Initiative

Our postgraduates will demonstrate a high standard of discernment and common sense in their professional and personal judgment. They will have the ability to make informed choices and decisions that reflect both the nature of their professional work and their personal perspectives.

This graduate capability is supported by:

**Learning outcomes**

- Understand and appreciate the value and role of biodiversity and biotechnology and the need to preserve eco-system services for human and non-human species
- To be informed about the purpose, scope and effect of law, policies and programmes protecting biodiversity and regulating biotechnology at international, national, state and local levels
- To engage in and critically evaluate the management of biodiversity by local government
- To engage in learning and assessment tasks which challenge assumptions about the value of biodiversity and biotechnology how protection is achieved in the global commons and propose reform to the institutional framework
- To consider and discuss current issues that affect biodiversity and biotechnology including climate change, pollution and bio-cultural heritage

**Assessment tasks**

- Class Presentation
- Field Trip
- Research Paper
