Unit description
This unit is structured as a semester-long team-based project. It integrates the materials that are covered in first and second year marketing units. Its objectives are to investigate what kinds of factors influence the competitive positioning of an industry, and the firms within it, to achieve a sustainable competitive advantage. It explores the kinds of "Blue-Ocean" strategies that can be developed to assist a firm to re-construct its existing competitive market boundaries. It addresses the scope and application of corporate social responsibility (CSR) and its use as a mechanism to achieve a sustainable competitive advantage. The class is conducted through workshops and discussions where students are taught to write a research paper around an industry of their choice. Throughout the unit, the emphasis is on the analysis process: identifying information needs, acquiring the necessary information, interpreting it and using it as the basis for business recommendations.
