Unit description
This unit is designed to engage students with current research in the Human Sciences. This is a shell unit in which a number of activities can be undertaken. Activities may include such things as seminar attendance along with directed reading of research papers in readiness for seminars, and the discussion and critiquing of research topics; or the introduction to new laboratory or clinical techniques with preparatory reading, hands-on experience and a final report. Individual learning contracts will be negotiated with each candidate. Presentation of a seminar and a written report based on work undertaken will be the minimum requirements for completion of this unit.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at https://students.mq.edu.au/important-dates

Learning Outcomes

1. Acquire a coherent and advanced knowledge of current research in an area of human sciences
2. Synthesize and analyze information from a variety of sources.
3. Develop a series of research questions and a rationale for those questions
4. Identify and discuss complex problems with intellectual independence.
5. Articulate clearly a coherent argument in written and oral form to a variety of audiences.
6. Develop a high level of oral, written, and technological communication skills, with specialisation for the specific needs of a discipline in science.
7. Work in cooperation and collaboration with others.
8. Demonstrate high standards of ethical conduct in a research activity.

**Learning Contract**

Due: **Friday Week 4**  
Weighting: **20%**

This is PASS/FAIL

Each student will complete a Learning Contract using the template available on the iLearn website. In particular, your Learning Contract will identify a specific schedule of five seminars you will attend during the session.

Examples of Learning Contracts from previous offerings of the unit are available on the iLearn website.

Assessment criteria: clear, achievable and well-articulated goals aligned to the identified learning activities and achievements.

Students whose learning contract is deemed unsatisfactory will be asked to revise and resubmit.

This Assessment Task relates to the following Learning Outcomes:

- Acquire a coherent and advanced knowledge of current research in an area of human sciences
- Develop a series of research questions and a rationale for those questions
- Articulate clearly a coherent argument in written and oral form to a variety of audiences.
- Demonstrate high standards of ethical conduct in a research activity.

**Presentation**

Due: **TBA**

Weighting: **30%**

Each student will present for 15 minutes or provide a virtual presentation of equivalent duration. Your presentation should answer the following questions:

1. What seminars have you attended so far this session?
2. Why did you choose those seminars?
3. What did you learn from attending those seminars?
4. How has your attendance at those seminars informed your thinking about research?

Assessment criteria: your presentation will be assessed according to the rubric on page 6 of this unit guide. In the case of virtual presentations the rubric can be negotiated with the convenor.

This Assessment Task relates to the following Learning Outcomes:
- Acquire a coherent and advanced knowledge of current research in an area of human sciences
- Synthesize and analyze information from a variety of sources.
- Develop a series of research questions and a rationale for those questions
- Identify and discuss complex problems with intellectual independence.
- Articulate clearly a coherent argument in written and oral form to a variety of audiences.
- Develop a high level of oral, written, and technological communication skills, with specialisation for the specific needs of a discipline in science.
- Work in cooperation and collaboration with others.
- Demonstrate high standards of ethical conduct in a research activity.

Written Report

Due: Friday Week 12
Weighting: 50%
Length: 2500 words (+/- 10%)

Each student will write a report which outlines the following:

1. their chosen research topic
2. how they have explored that topic (through seminar attendance and other activities)
3. their proposed research questions
4. the rationale for those research questions

Assessment criteria: your report will be assessed according to the rubric presented below.

This Assessment Task relates to the following Learning Outcomes:
- Acquire a coherent and advanced knowledge of current research in an area of human sciences
- Synthesize and analyze information from a variety of sources.
- Develop a series of research questions and a rationale for those questions
- Identify and discuss complex problems with intellectual independence.
Articulate clearly a coherent argument in written and oral form to a variety of audiences.
• Develop a high level of oral, written, and technological communication skills, with specialisation for the specific needs of a discipline in science.
• Work in cooperation and collaboration with others.
• Demonstrate high standards of ethical conduct in a research activity.

**Delivery and Resources**

There will be four compulsory sessions spread throughout the session in which students will learn: about the aims and structure of the unit; how to critically evaluate presentations; how to develop research questions; and how to identify if a research question is researchable.

Students are also expected to attend (either in person or “virtually”) a minimum of five seminars throughout the semester.

Please see [iLearn](http://mq.edu.au/policy/docs) for details.

**Policies and Procedures**

Macquarie University policies and procedures are accessible from [Policy Central](http://mq.edu.au/policy/docs). Students should be aware of the following policies in particular with regard to Learning and Teaching:

  *The Disruption to Studies Policy is effective from March 3 2014 and replaces the Special Consideration Policy.*

In addition, a number of other policies can be found in the [Learning and Teaching Category](http://mq.edu.au/policy/docs) of Policy Central.

**Student Code of Conduct**

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: [https://students.mq.edu.au/support/student_conduct/](https://students.mq.edu.au/support/student_conduct/)

**Results**

Results shown in [iLearn](http://mq.edu.au/policy/docs), or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in [eStudent](http://mq.edu.au/policy/docs). For more information visit [ask.mq.edu.au](http://mq.edu.au/policy/docs).
Student Support
Macquarie University provides a range of support services for students. For details, visit http://students.mq.edu.au/support/

Learning Skills
Learning Skills (mq.edu.au/learningskills) provides academic writing resources and study strategies to improve your marks and take control of your study.

- Workshops
- StudyWise
- Academic Integrity Module for Students
- Ask a Learning Adviser

Student Enquiry Service
For all student enquiries, visit Student Connect at ask.mq.edu.au

Equity Support
Students with a disability are encouraged to contact the Disability Service who can provide appropriate help with any issues that arise during their studies.

IT Help
For help with University computer systems and technology, visit http://informatics.mq.edu.au/help/.

When using the University’s IT, you must adhere to the Acceptable Use Policy. The policy applies to all who connect to the MQ network including students.

Graduate Capabilities
PG - Critical, Analytical and Integrative Thinking
Our postgraduates will be capable of utilising and reflecting on prior knowledge and experience, of applying higher level critical thinking skills, and of integrating and synthesising learning and knowledge from a range of sources and environments. A characteristic of this form of thinking is the generation of new, professionally oriented knowledge through personal or group-based critique of practice and theory.

This graduate capability is supported by:

Learning outcomes
- Acquire a coherent and advanced knowledge of current research in an area of human sciences
- Synthesize and analyze information from a variety of sources.
• Develop a series of research questions and a rationale for those questions
• Identify and discuss complex problems with intellectual independence.
• Work in cooperation and collaboration with others.

Assessment tasks
• Learning Contract
• Presentation
• Written Report

PG - Capable of Professional and Personal Judgment and Initiative

Our postgraduates will demonstrate a high standard of discernment and common sense in their professional and personal judgment. They will have the ability to make informed choices and decisions that reflect both the nature of their professional work and their personal perspectives.

This graduate capability is supported by:

Learning outcomes
• Develop a series of research questions and a rationale for those questions
• Work in cooperation and collaboration with others.
• Demonstrate high standards of ethical conduct in a research activity.

Assessment task
• Written Report

PG - Discipline Knowledge and Skills

Our postgraduates will be able to demonstrate a significantly enhanced depth and breadth of knowledge, scholarly understanding, and specific subject content knowledge in their chosen fields.

This graduate capability is supported by:

Learning outcomes
• Acquire a coherent and advanced knowledge of current research in an area of human sciences
• Synthesize and analyze information from a variety of sources.
• Develop a series of research questions and a rationale for those questions
• Identify and discuss complex problems with intellectual independence.
• Articulate clearly a coherent argument in written and oral form to a variety of audiences.
• Develop a high level of oral, written, and technological communication skills, with specialisation for the specific needs of a discipline in science.
• Work in cooperation and collaboration with others.

Assessment tasks
• Learning Contract
• Presentation
• Written Report

PG - Research and Problem Solving Capability
Our postgraduates will be capable of systematic enquiry; able to use research skills to create new knowledge that can be applied to real world issues, or contribute to a field of study or practice to enhance society. They will be capable of creative questioning, problem finding and problem solving.

This graduate capability is supported by:

Learning outcomes
• Synthesize and analyze information from a variety of sources.
• Develop a series of research questions and a rationale for those questions
• Identify and discuss complex problems with intellectual independence.
• Articulate clearly a coherent argument in written and oral form to a variety of audiences.

Assessment tasks
• Learning Contract
• Presentation
• Written Report

PG - Effective Communication
Our postgraduates will be able to communicate effectively and convey their views to different social, cultural, and professional audiences. They will be able to use a variety of technologically supported media to communicate with empathy using a range of written, spoken or visual formats.

This graduate capability is supported by:

Learning outcomes
• Synthesize and analyze information from a variety of sources.
• Identify and discuss complex problems with intellectual independence.
• Articulate clearly a coherent argument in written and oral form to a variety of audiences.
• Develop a high level of oral, written, and technological communication skills, with specialisation for the specific needs of a discipline in science.
• Work in cooperation and collaboration with others.
Assessment tasks

- Presentation
- Written Report

PG - Engaged and Responsible, Active and Ethical Citizens

Our postgraduates will be ethically aware and capable of confident transformative action in relation to their professional responsibilities and the wider community. They will have a sense of connectedness with others and country and have a sense of mutual obligation. They will be able to appreciate the impact of their professional roles for social justice and inclusion related to national and global issues.

This graduate capability is supported by:

Learning outcomes

- Develop a series of research questions and a rationale for those questions
- Work in cooperation and collaboration with others.
- Demonstrate high standards of ethical conduct in a research activity.

Assessment tasks

- Presentation
- Written Report
