Unit description
This unit provides an advanced understanding of diverse radio forms and their production as they are emerging in the contemporary online/broadcast context. Students work across a range of professional roles contributing their skills and output to either a series of programs composed of a variety of radio forms (features, comedy, talkback, reportage, discussion, live music, performance) or towards a live special event program. Students also work towards an online presentation with additional features (image, text, podcasts). The workshop program comprises production meetings (modelled on industry practice) and the acquisition of advanced audio production skills extending students' previous knowledge and experience. Specialist studio/audio production is taught using Protools and appropriate other softwares. Students also acquire advanced skills in voice production and microphone techniques for music, field and actuality recording (also applicable to film and other audio-visual forms). Lectures extend students' knowledge of critical, formal and technical developments in radio and related audio media (production and performance), including recent audio-rich storytelling forms emerging online and in new public and cultural institutional contexts. Principally drawing on Australian examples, the unit also explores new initiatives in radio and audio-rich forms internationally.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at https://www.mq.edu.au/study/calendar-of-dates

Learning Outcomes
On successful completion of this unit, you will be able to:

- Demonstrate critical and conceptual skills in radio production and audio content production for diverse media applications
- Demonstrate the development of a range of communication and expression skills.
- Demonstrate the development of a range of operational, technical and media industry skills related in particular to audio/radio production, program making and broadcasting.
- Plan strategically, and develop team skills to produce a range of creative and journalistic outputs
- Analyse critically and evaluate creative and professional media practice, with an emphasis on radio industry audio content.

Assessment Tasks

<table>
<thead>
<tr>
<th>Name</th>
<th>Weighting</th>
<th>Due</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Short audio postcard</td>
<td>20%</td>
<td>Week 6 Tutes</td>
</tr>
</tbody>
</table>
1. Short audio postcard

Due: **Week 6 Tutes**
Weighting: 20%

Use recordings of actuality sound and scripted voice/voice-over to make a short (3 - 4 minute) audio 'postcard' or reportage of a place, a place/moment (events at a location) in time. Script can involve on location voicing/narration and/or voice-over recorded separately. Your place/topic should ideally relate to your class's theme, although it is possible to make these without such limitations. Exact Subject: the only limit is your imagination. In all cases, you should start with a real place or event, although it is possible to speak of a fictional or more laterally connected topic, but still using recorded sound from this place.

(This exercise will mainly assess your writing/presentation skill for radio and your ability to construct a radio/audio item which uses recorded actuality/'wild sound' and words to take us to a place). **Prepare individually. Submit to DAWS correct folder by Week 6 Tute.** Should be available to listen to in Week 6.

On successful completion you will be able to:

- Demonstrate the development of a range of communication and expression skills.
- Demonstrate the development of a range of operational, technical and media industry skills related in particular to audio/radio production, program making and broadcasting.

2. Analysis/reflection

Due: **Week 7**
Weighting: 20%

Choose one radio program or package/feature (or max 1 hour segment of time from a 'flow radio' program) and describe, contextualise and analyze it (1500 - 2000 words).

Pay attention to the following:

**Description and Contextualisation:** Type: radio/web/podcast etc. Station/Service or Host? (Public, community, commercial etc) Date of broadcast or first availability? The genre: current affairs, talkback/discussion, interview, documentary, comedy, drama/performance or other? What is the program it is part of? Is it part of a regular offering, or a one off special? (Egs: ABC Triple J "Hack", national youth current affairs program, regular daily...; "RadioLab": American NPR specialist podcast and syndicated program available on....online site includes... ; ABC RN
"Breakfast", daily current affairs and talk show with multiple items, single host with commentators and journalists input;...2Ser magazine or Breakfast show., duo or single hosts with short feature and interview content....; "Radiotonic", product of Creative Audio Unit of ABC RN, specialist in experimental radio work, audio arts.....) Discuss here, if relevant also, its history, possible target audience, ways it engages with its audience and outline any ‘value adding’ it achieves through its online presence. Comment on any other features that are important.

**Analysis:** While paying attention to the format/context of the station where it is broadcast, comment on the content, style, genre of program. Note the kinds of voices heard, the arguments or content and how this is expressed. How effectively is the story told and is it a story you think worth communicating to the program’s target audience? Why was it so engaging then? Here, you might comment on the voiced story including the impact of narrators/hosts/reporters; the scripting, editing and structure; the placement/types of sound used such as any music or actuality sound and why this works or not; the quality of interviewees, their content or interest these generate for the whole piece. If any other things are significant mention and discuss these too. Somewhere in the analysis then you should discuss: how the program succeeds (or not) in engaging its listeners, or speaking to its imagined audience(s) or communities and what you learnt from listening to this program in your role as a radio producer. Here you are asked to give your view; however this can be augmented and supported by referenced articles or commentary: use reviews and articles from media and academic scholarship where available. (See reference list, or consult with your Tutor).

A list of programs as good examples to analyze will be distributed on iLearn by Week 6.

Alternately, you are permitted to analyse one episode of ABC TV's "Q & A" or a similar program on radio or TV (containing a forum or live debate). How is the topic/s managed? Comment on the role of compere, the kinds of questions asked, the balance (or not) of perspectives aired, the guests answers in relation to the line of questioning – is there usage of 'Devil's advocate' questioning by the compere for example. See iLearn Discussions or Announcements for more detail and your tutor's suggestions.

Submit to your Tutor in class or on iLearn by Week 7. Include Cover Sheet.

On successful completion you will be able to:

- Demonstrate critical and conceptual skills in radio production and audio content production for diverse media applications
- Demonstrate the development of a range of communication and expression skills.
- Analyse critically and evaluate creative and professional media practice, with an emphasis on radio industry audio content.

**3. Program Production**

**Due:** *Week 12*

**Weighting:** 40%

This entails you producing **audio content** (usually in pairs) for the themed* live two hour
broadcast, in the form of, either: a **short feature** or a current affairs styled **feature package** (max 7 mins); or **audio collage** exploration of the theme (duration usually less than 7 mins); or, a **series of short pieces** around the theme to be spaced through the program (3x 2min for eg); or (for Producer and Host roles only) the production of the live **discussion forum** with organization of ‘talent’, research, proposed questions, securing live audience and contribution to specific content for web pages (first discuss with tutor); or the production of the overall show’s **web presence** with podcast audio elements and any additional audio as agreed to by tutor; or a **radio drama, sketch or comedic presentation/piece**.

**Criteria for assessment of content**: all radio content (features, packages and other) will be judged on their: 1) impact/construction and ability to communicate with, engage or move an audience; 2) quality of the content and research leading to the finished work including its scope, rigour, originality and/or suitability to the theme; 3) aesthetic, entertainment or innovative qualities, and or quality/sophistication of the argument of the piece - taking into consideration its intended audience; and 4) overall technical quality. Student aims, and any problems encountered, or lessons learnt, should be outlined in an accompanying **Reflection** to assist in the marking process. NB: Each student should submit a separate reflection, even if content is the same for both students.

*Include approx 2 pages (1.5 spaced, 12 pt font) for this Reflection.*

* Themes will be discussed in Tutes and decided on before Week 4.

Submit Audio to DAWS by your Tute Week 12 and have available to play in class. Submit written material to your Tutor via class or iLearn.

On successful completion you will be able to:

- Demonstrate critical and conceptual skills in radio production and audio content production for diverse media applications
- Demonstrate the development of a range of communication and expression skills.
- Demonstrate the development of a range of operational, technical and media industry skills related in particular to audio/radio production, program making and broadcasting.
- Plan strategically, and develop team skills to produce a range of creative and journalistic outputs

**4. Role for Live Show**

**Due**: **Week 13/14**

**Weighting**: **20%**

Your mark is based on individual performance in your role for the live production and written documentation supporting your contribution to the class/team broadcast. In this last respect, you will need to regularly update others of progress in your role either on iLearn, facebook group page or via email, and keep a diary with regular comments and reflections on your role and content produced for the show. This ‘production diary’ – with final comments on the success of your program and some of the key things you have learnt – should be kept from Week 6 and be
submitted to your Tutor at the end of Week 13 as supporting evidence of your participation. The
diary may be digital/typed, or hand written (in part) in a journal/notebook. Typed/online/digital
entries including facebook/iLearn discussions can be pasted in or enclosed with this. (Check with
tutor for any variations to this).

A further note on Roles: Before Week 6, you will be elected to a role or will have the chance to
volunteer for a specific task.

These tasks include: Producers (A) for the live show, to create running sheet, direct presenters,
check overall technical quality, take responsibility for content, deadlines etc (2); One Producer for
Q & A Forum Segment (B) (1); a Compere Q & A segment (1) who will work with Producer B in
smooth running of Forum and scripting/questions; panel operators (2), one in radio studio, the
other operating desk for live broadcast - both under the direction of Peter Ring (Radio Facilities
Manager); producer-assistants for the day, to run boom mics, act as messengers/liaison, assist
guests, follow up guests with thank-yous and run social media before and on the day (2-3);
presenters (up to 4, for 2 sessions); publicist (1); online content producers (1-2) depending on
experience and if this output is also contributing to another Unit (as agreed by both Convenors);
a roving reporter/reporter at large (optional) who will deliver 2 voice pieces on-location via phone,
'filing' these reports live on the day, or possibly these can be pre-produced, but programmed as if
live; and finally an entertainment content producer (1) who will organise, rehearse and be
responsible for musical artists or other performers featured in the individual class shows, and
performing live for radio audiences and before the live audience gathered in the Drama Studio in
Week 13 or 14 (TBA).

*This unit's Tute classes will each create a live show with multiple features and content. A
Theme may be suggested for each class or cover the three 2Ser shows, with each class
selecting a sub theme if they wish.

Submit written documentation with coversheet to Tutor by Friday Week 14. Audio should be
submitted to Drop Box in DAWS also by this date.

On successful completion you will be able to:

- Demonstrate critical and conceptual skills in radio production and audio content
  production for diverse media applications
- Demonstrate the development of a range of communication and expression skills.
- Demonstrate the development of a range of operational, technical and media industry
  skills related in particular to audio/radio production, program making and broadcasting.
- Plan strategically, and develop team skills to produce a range of creative and journalistic
  outputs
- Analyse critically and evaluate creative and professional media practice, with an
  emphasis on radio industry audio content.

Delivery and Resources
This Unit is structured using Lectures, Tutorial/Radio Lab/Studio Workshops and Discussion
Sessions.

REQUIRED EQUIPMENT

- **One set of** reasonable quality semi-open or closed **headphones** (compulsory for each student, due to Health & Safety regulations).
- **Memory device** to store audio data, in progress and for transport between home and university.

</tr>
<tr>
<td>Week 14</td>
<td>NB: Assessable live radio shows, 2SER, may be scheduled for this week or Week 13 (TBA), using Radio studios and Drama Theatre with live audience. Each class will be allocated a day for their broadcast show and confirmed by Week 4.</td>
<td></td>
</tr>
</tbody>
</table>

* See iLearn for full updated schedule of Lectures and Tutes. This schedule is a guide only, based on previous years.

Further Note:

As Research, there will be One Excursion to ABC TV Studios, Ultimo: to join a Q & A show. http://www.abc.net.au/tv/qanda/about.htm
“Q&A puts punters, pollies and pundits together in the studio to thrash out the hot issues of the week. It’s about democracy in action… on Q&A the audience gets to ask the questions. It doesn’t matter who you are, or where you’re from - everyone can have a go and take it up to our politicians and opinion makers. Energetic and opinionated - Q&A brings Australia’s egalitarian and larrkkin spirit into the studio. Q&A is about encouraging people to engage with politics and society. Q&A is hosted by one of the ABC’s most respected journalists, Tony Jones. Q&A is live to air - it’s happening as viewers watch”. (Dates TBA, check iLearn or Tutor for all details).

**Learning and Teaching Activities**

The new ProTools Version 11 audio software will be part of this unit's instruction

This will be taught/updated by fully accredited (Avid trained ProTools ) instructor, Peter Ring. A Training Manual will need to be purchased. Your Tutor will inform you how to do this in Week 2.

**Policies and Procedures**

Macquarie University policies and procedures are accessible from [Policy Central](http://mq.edu.au/policy/docs/academic_honesty/policy.html). Students should be aware of the following policies in particular with regard to Learning and Teaching:

In addition, a number of other policies can be found in the Learning and Teaching Category of Policy Central.

**Student Code of Conduct**

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: [https://students.mq.edu.au/support/student_conduct/](https://students.mq.edu.au/support/student_conduct/)

**Results**

Results shown in iLearn, or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in eStudent. For more information visit [ask.mq.edu.au](http://ask.mq.edu.au).

**Additional information**

Our graduates will also be capable of creative thinking and of creating knowledge. They will be imaginative and open to experience and capable of innovation at work and in the community. We want them to be engaged in applying their critical, creative thinking.

This graduate capability is supported by:

Learning outcomes

- Demonstrate the development of a range of operational, technical and media industry
skills related in particular to audio/radio production, program making and broadcasting.

- Plan strategically, and develop team skills to produce a range of creative and journalistic outputs
- Analyse critically and evaluate creative and professional media practice, with an emphasis on radio industry audio content.

**Assessment tasks**

- 1. Short audio postcard
- 3. Program Production
- 4. Role for Live Show

**Capable of Professional and Personal Judgement and Initiative**

We want our graduates to have emotional intelligence and sound interpersonal skills and to demonstrate discernment and common sense in their professional and personal judgement. They will exercise initiative as needed. They will be capable of risk assessment, and be able to handle ambiguity and complexity, enabling them to be adaptable in diverse and changing environments.

This graduate capability is supported by:

**Learning outcomes**

- Demonstrate critical and conceptual skills in radio production and audio content production for diverse media applications
- Demonstrate the development of a range of communication and expression skills.
- Demonstrate the development of a range of operational, technical and media industry skills related in particular to audio/radio production, program making and broadcasting.
- Plan strategically, and develop team skills to produce a range of creative and journalistic outputs
- Analyse critically and evaluate creative and professional media practice, with an emphasis on radio industry audio content.

**Assessment tasks**

- 1. Short audio postcard
- 3. Program Production
- 4. Role for Live Show

**Commitment to Continuous Learning**

Our graduates will have enquiring minds and a literate curiosity which will lead them to pursue knowledge for its own sake. They will continue to pursue learning in their careers and as they participate in the world. They will be capable of reflecting on their experiences and relationships
with others and the environment, learning from them, and growing - personally, professionally and socially.

This graduate capability is supported by:

**Learning outcomes**

- Demonstrate critical and conceptual skills in radio production and audio content production for diverse media applications
- Demonstrate the development of a range of operational, technical and media industry skills related in particular to audio/radio production, program making and broadcasting.
- Plan strategically, and develop team skills to produce a range of creative and journalistic outputs

**Assessment tasks**

- 1. Short audio postcard
- 2. Analysis/reflection
- 3. Program Production
- 4. Role for Live Show

**Discipline Specific Knowledge and Skills**

Our graduates will take with them the intellectual development, depth and breadth of knowledge, scholarly understanding, and specific subject content in their chosen fields to make them competent and confident in their subject or profession. They will be able to demonstrate, where relevant, professional technical competence and meet professional standards. They will be able to articulate the structure of knowledge of their discipline, be able to adapt discipline-specific knowledge to novel situations, and be able to contribute from their discipline to inter-disciplinary solutions to problems.

This graduate capability is supported by:

**Learning outcomes**

- Demonstrate the development of a range of operational, technical and media industry skills related in particular to audio/radio production, program making and broadcasting.
- Analyse critically and evaluate creative and professional media practice, with an emphasis on radio industry audio content.

**Assessment tasks**

- 1. Short audio postcard
- 2. Analysis/reflection
- 3. Program Production
- 4. Role for Live Show
Critical, Analytical and Integrative Thinking

We want our graduates to be capable of reasoning, questioning and analysing, and to integrate and synthesise learning and knowledge from a range of sources and environments; to be able to critique constraints, assumptions and limitations; to be able to think independently and systemically in relation to scholarly activity, in the workplace, and in the world. We want them to have a level of scientific and information technology literacy.

This graduate capability is supported by:

**Learning outcomes**

- Demonstrate critical and conceptual skills in radio production and audio content production for diverse media applications
- Demonstrate the development of a range of operational, technical and media industry skills related in particular to audio/radio production, program making and broadcasting.
- Analyse critically and evaluate creative and professional media practice, with an emphasis on radio industry audio content.

**Assessment tasks**

- 2. Analysis/reflection
- 3. Program Production

Problem Solving and Research Capability

Our graduates should be capable of researching; of analysing, and interpreting and assessing data and information in various forms; of drawing connections across fields of knowledge; and they should be able to relate their knowledge to complex situations at work or in the world, in order to diagnose and solve problems. We want them to have the confidence to take the initiative in doing so, within an awareness of their own limitations.

This graduate capability is supported by:

**Learning outcomes**

- Demonstrate critical and conceptual skills in radio production and audio content production for diverse media applications
- Demonstrate the development of a range of operational, technical and media industry skills related in particular to audio/radio production, program making and broadcasting.
- Plan strategically, and develop team skills to produce a range of creative and journalistic outputs
- Analyse critically and evaluate creative and professional media practice, with an emphasis on radio industry audio content.
Assessment tasks

- 2. Analysis/reflection
- 3. Program Production

Effective Communication

We want to develop in our students the ability to communicate and convey their views in forms effective with different audiences. We want our graduates to take with them the capability to read, listen, question, gather and evaluate information resources in a variety of formats, assess, write clearly, speak effectively, and to use visual communication and communication technologies as appropriate.

This graduate capability is supported by:

Learning outcomes

- Demonstrate critical and conceptual skills in radio production and audio content production for diverse media applications
- Demonstrate the development of a range of communication and expression skills.
- Demonstrate the development of a range of operational, technical and media industry skills related in particular to audio/radio production, program making and broadcasting.
- Plan strategically, and develop team skills to produce a range of creative and journalistic outputs
- Analyse critically and evaluate creative and professional media practice, with an emphasis on radio industry audio content.

Assessment tasks

- 1. Short audio postcard
- 2. Analysis/reflection
- 3. Program Production
- 4. Role for Live Show

Engaged and Ethical Local and Global citizens

As local citizens our graduates will be aware of indigenous perspectives and of the nation's historical context. They will be engaged with the challenges of contemporary society and with knowledge and ideas. We want our graduates to have respect for diversity, to be open-minded, sensitive to others and inclusive, and to be open to other cultures and perspectives: they should have a level of cultural literacy. Our graduates should be aware of disadvantage and social justice, and be willing to participate to help create a wiser and better society.

This graduate capability is supported by:
Learning outcomes

• Demonstrate critical and conceptual skills in radio production and audio content production for diverse media applications
• Demonstrate the development of a range of operational, technical and media industry skills related in particular to audio/radio production, program making and broadcasting.

Assessment tasks

• 1. Short audio postcard
• 3. Program Production

Socially and Environmentally Active and Responsible

We want our graduates to be aware of and have respect for self and others; to be able to work with others as a leader and a team player; to have a sense of connectedness with others and country; and to have a sense of mutual obligation. Our graduates should be informed and active participants in moving society towards sustainability.

This graduate capability is supported by:
