Prerequisites
[Admission to BPsych(Hons) or BA-Psych or BA-PsychBEd(Prim) or BA-PsychBHlth or BA-PsychLLB or BBABA-Psych or BBABPsych(Hons) or BComBA-Psych or BComBPsyeh(Hons) or BPSPsyeh(Hons)BHlth or BPSPsyeh(Hons)LLB or BSc-Psych or BHlth or BHumanSc or BSpHearingSc or BSpHlSc or BMedSci or GDipSphComm or BA-PsychBHumanSc or BPSPsyeh(Hons)BHumanSc] or [an equivalent admission rank (or aggregate)] or [for all continuing students 12cp and a GPA of 2.0] or PSY105(P) or PSYC105

Corequisites

Co-badged status

Unit description
This unit introduces students to the discipline of psychology through a focus on the physiological bases of behaviour; learning; motivation; the nature of personality and psychopathology; and cross-cultural and Indigenous psychology. The unit conveys information about substantive material, and assumptions of theory associated with the science and profession of psychology through lecture and tutorial/practical classes. The unit introduces students to research methods in psychology through a series of methodology lectures. A further important aim of the unit is to develop students’ competency in critical thinking and essay writing in psychology.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at https://students.mq.edu.au/important-dates

Learning Outcomes

1. Research and Study skills (developed through planning research assignments, achieving study goals, and meeting deadlines).
2. Communication and Interpersonal skills (developed through written assignments,
interactions in tutorial groups, and working with class members on assignment tasks).
3. Team skills developed as a result of working with a small number of fellow students on a group project.
4. Information Technology Skills (developed through practical assignments and experience with the web-based elements of the course).
5. Critical Thinking skills (developed through discussion of competing theories and application of the scientific method to understand psychological phenomena).
6. Appreciation of Ethical Issues (developed in class discussion of ethical issues in research and exposure to actual participation in research).

**Essay**

Due: **Week 8 (may change)**  
Weighting: **25%**

An essay examining a key concept in psychological research.

This Assessment Task relates to the following Learning Outcomes:
- Research and Study skills (developed through planning research assignments, achieving study goals, and meeting deadlines).
- Communication and Interpersonal skills (developed through written assignments, interactions in tutorial groups, and working with class members on assignment tasks).
- Information Technology Skills (developed through practical assignments and experience with the web-based elements of the course).
- Critical Thinking skills (developed through discussion of competing theories and application of the scientific method to understand psychological phenomena).
Group Presentation
Due: Week 10 tutorial
Weighting: 10%
A 10 minute group presentation, carried out in groups of 3 - 4 students, examining a psychological disorder.

This Assessment Task relates to the following Learning Outcomes:
• Research and Study skills (developed through planning research assignments, achieving study goals, and meeting deadlines).
• Communication and Interpersonal skills (developed through written assignments, interactions in tutorial groups, and working with class members on assignment tasks).
• Team skills developed as a result of working with a small number of fellow students on a group project.
• Information Technology Skills (developed through practical assignments and experience with the web-based elements of the course).
• Appreciation of Ethical Issues (developed in class discussion of ethical issues in research and exposure to actual participation in research).

Research Participation
Due: End of semester
Weighting: 5%
Four hours of research participation in studies being conducted by staff members, research assistants, postgraduate students and honours students in the Department.

This Assessment Task relates to the following Learning Outcomes:
• Information Technology Skills (developed through practical assignments and experience with the web-based elements of the course).
• Appreciation of Ethical Issues (developed in class discussion of ethical issues in research and exposure to actual participation in research).

Research Design Quizzes
Due: Weekly
Weighting: 5%
A series of 10 weekly quizzes examining research design content. Each quiz is worth 0.5% of the total grade.

This Assessment Task relates to the following Learning Outcomes:
Research and Study skills (developed through planning research assignments, achieving study goals, and meeting deadlines).

Information Technology Skills (developed through practical assignments and experience with the web-based elements of the course).

Critical Thinking skills (developed through discussion of competing theories and application of the scientific method to understand psychological phenomena).

Appreciation of Ethical Issues (developed in class discussion of ethical issues in research and exposure to actual participation in research).

Examination
Due: Session 1 exam period
Weighting: 50%
A 2.5 Hour Multiple-Choice Exam of 120 Questions.

This Assessment Task relates to the following Learning Outcomes:

- Research and Study skills (developed through planning research assignments, achieving study goals, and meeting deadlines).

Research Design Assignment
Due: Week 12 (may change)
Weighting: 5%
An assignment covering the research design component of the unit, consisting of five short answer questions.

This Assessment Task relates to the following Learning Outcomes:

- Research and Study skills (developed through planning research assignments, achieving study goals, and meeting deadlines).
- Communication and Interpersonal skills (developed through written assignments, interactions in tutorial groups, and working with class members on assignment tasks).
- Critical Thinking skills (developed through discussion of competing theories and application of the scientific method to understand psychological phenomena).
- Appreciation of Ethical Issues (developed in class discussion of ethical issues in research and exposure to actual participation in research).

Delivery and Resources
Delivery:
1 x 2-hour lecture each week
1 x 0.5 - 1 hour online recorded lecture on Research Design (available through iLearn)
1 x 1 - 2 hour tutorial each week

Textbooks:

Online resources:
iLearn website: https://ilearn.mq.edu.au

Changes from previous offering:
PSYC104 replaces PSY104 from 2013 onwards. Significant changes include the addition of Research Design into the unit.

Policies and Procedures
Macquarie University policies and procedures are accessible from Policy Central. Students should be aware of the following policies in particular with regard to Learning and Teaching:
Disruption to Studies Policy: http://www.mq.edu.au/policy/docs/disruption_studies/policy.html The Disruption to Studies Policy is effective from March 3 2014 and replaces the Special Consideration Policy.
In addition, a number of other policies can be found in the Learning and Teaching Category of Policy Central.

Student Code of Conduct
Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: https://students.mq.edu.au/support/student_conduct/

Results
Results shown in iLearn, or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in eStudent. For more information visit ask.m
Graduate Capabilities

Discipline Specific Knowledge and Skills

Our graduates will take with them the intellectual development, depth and breadth of knowledge, scholarly understanding, and specific subject content in their chosen fields to make them competent and confident in their subject or profession. They will be able to demonstrate, where relevant, professional technical competence and meet professional standards. They will be able to articulate the structure of knowledge of their discipline, be able to adapt discipline-specific knowledge to novel situations, and be able to contribute from their discipline to inter-disciplinary solutions to problems.

This graduate capability is supported by:

Learning outcomes

- Research and Study skills (developed through planning research assignments, achieving
study goals, and meeting deadlines).

- Communication and Interpersonal skills (developed through written assignments, interactions in tutorial groups, and working with class members on assignment tasks).
- Information Technology Skills (developed through practical assignments and experience with the web-based elements of the course).
- Critical Thinking skills (developed through discussion of competing theories and application of the scientific method to understand psychological phenomena).
- Appreciation of Ethical Issues (developed in class discussion of ethical issues in research and exposure to actual participation in research).

**Assessment tasks**

- Essay
- Group Presentation
- Research Design Quizzes
- Examination
- Research Design Assignment

**Critical, Analytical and Integrative Thinking**

We want our graduates to be capable of reasoning, questioning and analysing, and to integrate and synthesise learning and knowledge from a range of sources and environments; to be able to critique constraints, assumptions and limitations; to be able to think independently and systemically in relation to scholarly activity, in the workplace, and in the world. We want them to have a level of scientific and information technology literacy.

This graduate capability is supported by:

**Learning outcomes**

- Research and Study skills (developed through planning research assignments, achieving study goals, and meeting deadlines).
- Communication and Interpersonal skills (developed through written assignments, interactions in tutorial groups, and working with class members on assignment tasks).
- Information Technology Skills (developed through practical assignments and experience with the web-based elements of the course).
- Critical Thinking skills (developed through discussion of competing theories and application of the scientific method to understand psychological phenomena).

**Assessment tasks**

- Essay
- Group Presentation
Problem Solving and Research Capability

Our graduates should be capable of researching; of analysing, and interpreting and assessing data and information in various forms; of drawing connections across fields of knowledge; and they should be able to relate their knowledge to complex situations at work or in the world, in order to diagnose and solve problems. We want them to have the confidence to take the initiative in doing so, within an awareness of their own limitations.

This graduate capability is supported by:

Learning outcomes

- Research and Study skills (developed through planning research assignments, achieving study goals, and meeting deadlines).
- Communication and Interpersonal skills (developed through written assignments, interactions in tutorial groups, and working with class members on assignment tasks).
- Critical Thinking skills (developed through discussion of competing theories and application of the scientific method to understand psychological phenomena).

Assessment tasks

- Essay
- Group Presentation
- Research Design Quizzes
- Examination
- Research Design Assignment

Creative and Innovative

Our graduates will also be capable of creative thinking and of creating knowledge. They will be imaginative and open to experience and capable of innovation at work and in the community. We want them to be engaged in applying their critical, creative thinking.

This graduate capability is supported by:

Learning outcomes

- Research and Study skills (developed through planning research assignments, achieving study goals, and meeting deadlines).
- Critical Thinking skills (developed through discussion of competing theories and application of the scientific method to understand psychological phenomena).
Assessment task
  • Group Presentation

Effective Communication
We want to develop in our students the ability to communicate and convey their views in forms effective with different audiences. We want our graduates to take with them the capability to read, listen, question, gather and evaluate information resources in a variety of formats, assess, write clearly, speak effectively, and to use visual communication and communication technologies as appropriate.

This graduate capability is supported by:

Learning outcomes
  • Research and Study skills (developed through planning research assignments, achieving study goals, and meeting deadlines).
  • Communication and Interpersonal skills (developed through written assignments, interactions in tutorial groups, and working with class members on assignment tasks).
  • Team skills developed as a result of working with a small number of fellow students on a group project.
  • Information Technology Skills (developed through practical assignments and experience with the web-based elements of the course).

Assessment tasks
  • Essay
  • Group Presentation
  • Research Design Assignment

Engaged and Ethical Local and Global citizens
As local citizens our graduates will be aware of indigenous perspectives and of the nation’s historical context. They will be engaged with the challenges of contemporary society and with knowledge and ideas. We want our graduates to have respect for diversity, to be open-minded, sensitive to others and inclusive, and to be open to other cultures and perspectives: they should have a level of cultural literacy. Our graduates should be aware of disadvantage and social justice, and be willing to participate to help create a wiser and better society.

This graduate capability is supported by:

Learning outcomes
  • Research and Study skills (developed through planning research assignments, achieving study goals, and meeting deadlines).
  • Communication and Interpersonal skills (developed through written assignments,
interactions in tutorial groups, and working with class members on assignment tasks).

- Appreciation of Ethical Issues (developed in class discussion of ethical issues in research and exposure to actual participation in research).

**Assessment tasks**

- Essay
- Research Participation

**Socially and Environmentally Active and Responsible**

We want our graduates to be aware of and have respect for self and others; to be able to work with others as a leader and a team player; to have a sense of connectedness with others and country; and to have a sense of mutual obligation. Our graduates should be informed and active participants in moving society towards sustainability.

This graduate capability is supported by:

**Learning outcomes**

- Research and Study skills (developed through planning research assignments, achieving study goals, and meeting deadlines).
- Communication and Interpersonal skills (developed through written assignments, interactions in tutorial groups, and working with class members on assignment tasks).
- Team skills developed as a result of working with a small number of fellow students on a group project.
- Appreciation of Ethical Issues (developed in class discussion of ethical issues in research and exposure to actual participation in research).

**Assessment tasks**

- Group Presentation
- Research Participation

**Capable of Professional and Personal Judgement and Initiative**

We want our graduates to have emotional intelligence and sound interpersonal skills and to demonstrate discernment and common sense in their professional and personal judgement. They will exercise initiative as needed. They will be capable of risk assessment, and be able to handle ambiguity and complexity, enabling them to be adaptable in diverse and changing environments.

This graduate capability is supported by:

**Learning outcomes**

- Communication and Interpersonal skills (developed through written assignments,
interactions in tutorial groups, and working with class members on assignment tasks).
• Critical Thinking skills (developed through discussion of competing theories and application of the scientific method to understand psychological phenomena).
• Appreciation of Ethical Issues (developed in class discussion of ethical issues in research and exposure to actual participation in research).

Assessment tasks

• Essay
• Group Presentation

Commitment to Continuous Learning

Our graduates will have enquiring minds and a literate curiosity which will lead them to pursue knowledge for its own sake. They will continue to pursue learning in their careers and as they participate in the world. They will be capable of reflecting on their experiences and relationships with others and the environment, learning from them, and growing - personally, professionally and socially.

This graduate capability is supported by:

Learning outcomes

• Research and Study skills (developed through planning research assignments, achieving study goals, and meeting deadlines).
• Critical Thinking skills (developed through discussion of competing theories and application of the scientific method to understand psychological phenomena).

Assessment tasks

• Essay
• Group Presentation
• Research Participation
