Unit description
This unit provides students with a grounding in the principle theoretical approaches to the study of international relations and world order. Beginning with a focus on the historical emergence of traditional approaches such as realism, liberalism and Marxism and their competing perspectives on the causes of war and the conditions for peace, the unit goes on to consider more recent approaches, including gender approaches, critical theory, constructivism, postcolonialism, postmodernism and green theory.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at https://students.mq.edu.au/important-dates

Learning Outcomes

1. Aims and Objectives: As a core compulsory unit for all students in the MIR program, this unit provides an essential grounding in theories of International Relations (IR). The main aim of the unit is to equip students with a critical appreciation of traditional theoretical approaches to the study of IR as well as of newer approaches that have emerged in recent years. The key objective is to enable students to work with the conceptual tools essential to analysis. Thus by the end of the unit students should be able to not only understand the various theories of IR, but also to apply them in the analysis of issues in the general field of international politics.

Mid-semester test

Due: **10/04/2016**
Weighting: **10%**

A mid-semester test comprising 20 multiple choice questions (worth 1 mark each and therefore 10% of the total assessment) covering material presented in the unit up to and including week 5. The test itself will be conducted at the end of week 6 and will cover material presented in the first 5 weeks. The test will be administered on-line. You will have access to the test from 9 am Thursday 7 April – 11pm Sunday 10 April. Once you open and start the test, however, you will have only a certain amount of time in which to finish it (e.g. one hour). You will need to have revise all the material presented in the first 5 weeks of the course to answer the questions before you start the test. You won’t be able to attempt to simply look answers up during the test.

This Assessment Task relates to the following Learning Outcomes:

- **Aims and Objectives**: As a core compulsory unit for all students in the MIR program, this unit provides an essential grounding in theories of International Relations (IR). The main aim of the unit is to equip students with a critical appreciation of traditional theoretical approaches to the study of IR as well as of newer approaches that have emerged in recent years. The key objective is to enable students to work with the conceptual tools essential to analysis. Thus by the end of the unit students should be able to not only understand the various theories of IR, but also to apply them in the analysis of issues in the general field of international politics.

Essay

Due: **3/05/2016**
Weighting: **50%**

An essay of up to 3,000 words max. (worth 50%). You must include the word count on the title page of your essay. If you don’t provide an accurate word limit you will be penalized. If you exceed the word limit by more than 10% you will be penalized. Essays that are well short of the
word limit (more than 10% under) will also be penalized. Due date is Tuesday 3rd May 11:55pm. All essays should be upload it through Turnitin - no hardcopy is required. Students who submit by the due date will get their essays back before the end of the lecture period. **Alternatively, students may take an extension of a week without penalty (and without asking the convener) and submit by Tuesday 10th May 11:55pm.** This date is for students who, for whatever reason (illness, poor time management, personal problems etc.), cannot make the due date. However, students submitting after 3rd May are unlikely to get their essays back before the exam period starts. Priority in marking will be given to those who submitted on 3rd May. It is entirely up to you as to when you submit. Please note also that there will be no extensions for illness or other reasons beyond 10th May, except in the case of very serious, prolonged illness or hospitalization.

This Assessment Task relates to the following Learning Outcomes:

- **Aims and Objectives:** As a core compulsory unit for all students in the MIR program, this unit provides an essential grounding in theories of International Relations (IR). The main aim of the unit is to equip students with a critical appreciation of traditional theoretical approaches to the study of IR as well as of newer approaches that have emerged in recent years. The key objective is to enable students to work with the conceptual tools essential to analysis. Thus by the end of the unit students should be able to not only understand the various theories of IR, but also to apply them in the analysis of issues in the general field of international politics.

**Participation (internal only)**

**Due:** Ongoing

**Weighting:** 10%

Internal students will be required to conduct group presentations. More detail on this will be forthcoming in the first tutorial.

This Assessment Task relates to the following Learning Outcomes:

- **Aims and Objectives:** As a core compulsory unit for all students in the MIR program, this unit provides an essential grounding in theories of International Relations (IR). The main aim of the unit is to equip students with a critical appreciation of traditional theoretical approaches to the study of IR as well as of newer approaches that have emerged in recent years. The key objective is to enable students to work with the conceptual tools essential to analysis. Thus by the end of the unit students should be able to not only understand the various theories of IR, but also to apply them in the analysis of issues in the general field of international politics.
End-of-semester test

Due: 5/06/2016
Weighting: 30%

An end-of-semester test worth 30% of the total assessment (for external students it is worth 40% and contains an extra question). Students will be asked to answer a total of 4 short essays out of a choice of ten questions. Answers should be between 500-700 words. The short answer test must also be submitted electronically to Turnitin in the same as an assignment and also uploaded to Turnitin. Students must reference any source material and include a single bibliography. Answers must be in your own words, and reflect your own thoughts. You have from Tuesday Week 13 to Sunday (11:59pm) to complete the examination. (opens 9am 31 May; closes 11:59pm 5 June).

This Assessment Task relates to the following Learning Outcomes:

- **Aims and Objectives:** As a core compulsory unit for all students in the MIR program, this unit provides an essential grounding in theories of International Relations (IR). The main aim of the unit is to equip students with a critical appreciation of traditional theoretical approaches to the study of IR as well as of newer approaches that have emerged in recent years. The key objective is to enable students to work with the conceptual tools essential to analysis. Thus by the end of the unit students should be able to not only understand the various theories of IR, but also to apply them in the analysis of issues in the general field of international politics.

**Delivery and Resources**

**Teaching Methods/Mode of Delivery**

Teaching on the unit consists of lectures and tutorials for both day and evening students. The tutorials follow the lecture program and their purpose is to allow students to participate in discussions and ask questions about the topics dealt with in the lectures. Students must also be prepared to discuss issues during the seminars based on the recommended readings and the lectures. Tutorial sessions will be led by qualified tutors who will share responsibility for the marking of coursework and who will be responsible for awarding marks for tutorial participation.

External students are provided with the recorded lectures. External students should also use the reading guide and questions provided for each week’s topic as a self-tutorial program. That is, if you do the required reading each week and consider the questions set, you should acquire a good understanding of the various topics. A tutor will be available to answer queries on the material from external students.

**Prerequisites and Preparation**

https://unitguides.mq.edu.au/unit_offerings/55005/unit_guide/print
Students taking this unit inevitably come from a wide range of academic backgrounds. Some students will already have been introduced to the study of IR, and IR theory, at undergraduate level. For others, this unit will be their first experience of the subject, or of the more general field of political studies, of which IR is a part. For those with little or no previous background in the study of politics and IR, it is essential that you do some extra reading and preparation for the unit. Even if you have done some politics and IR before, you will benefit from some revision.

Textbooks and Sources: Students make an enormous financial investment in studying for a Master’s degree. Don’t compromise by not investing in the core texts for any unit and relying solely on the library. You are strongly advised to acquire your own copies of the core texts so that you have ready access to them when you need them. You will find that these texts are useful for other units as well. The core texts for IRPG841 are:

Stephanie Lawson, *Theories of International Relations: Contending approaches to world politics* (Polity, 2015) is now available to be purchased at the co-op book store. Most of the readings for each week’s topic will come from this document.

The second text is: Stephanie Lawson, *International Relations*, (Polity, 2012). This book introduces students to the general field of IR, explains the emergence of IR theories in an historic context, and examines three major contexts for the application of theoretical concepts, namely: security and insecurity, global governance and world order, and globalization and the state. You are advised to read this book within the first week or so of the course as it will give you a good overview of the field of IR and the role of theory at a fairly accessible level. You can then re-read the relevant sections each week as indicated in the week-by-week program.

Supplementary Texts

You need not buy these, although they are certainly highly relevant to the unit and would be a good investment.

John Baylis, Steve Smith and Patricia Owens (ed), *The Globalization of World Politics*, 6th edn, Oxford, Oxford University Press, 2014. This book covers a range of IR theories, from the principle strands of realism, liberalism and Marxism through to constructivism, feminism, poststructuralism and postcolonialism. In addition to the theory chapters, there are more than 20 chapters on a range of other topics in IR, so it will be useful for wider reading and for other units in the MIR program. However, it does not cover ‘green theory’ and a separate reading will be provided.

Martin Griffiths and Terry O’Callaghan, *International Relations: The Key Concepts*, Routledge,
Further Reading

There are many other good texts that students may benefit from reading and consulting for seminar and essay preparation. These include the following:

Amitav Acharya and Barry Buzan (eds), *Non-Western International Relations Theory: Perspectives from Asia*, Routledge, 2009.

Duncan Bell (ed.), *Political Thought and International Relations: Variations on a Realist Theme*, Oxford University Press, 2008.

Stefano Guzzini and Anna Leander (eds), *Constructivism and International Relations: Alexander Wendt and His Critics*, Routledge, 2006.

Edwin Van de Haar, *Classical Liberalism and International Relations Theory: Hume, Smith,*

John Vogler and Mark Imber (eds), The Environment and International Relations, Routledge, 1996.

Kenneth Waltz, Man, the State and War, Columbia University Press, 1959.

Phil Williams, Donald M. Goldstein and Jay M. Shafritz (eds), Classic Readings and Contemporary Debates in International Relations, Thompson Higher Education, 2006.

The above lists are not exhaustive. There are literally hundreds of other books as well as many journals dealing with the subject matter of this unit, and the literature is growing all the time. You should sample other texts in the library as well as journal articles, especially when researching for essays.

With respect to journals, some of the main international ones that carry articles on IR theory are: Review of International Studies; Millennium: Journal of International Studies; British Journal of Politics and International Relations; European Journal of International Relations; International Studies Quarterly; International Studies Review; International Organization, Foreign Affairs and World Politics. Relevant journals based in Australia are: Australian Journal of International Affairs; Global Change, Peace and Security; Australian Journal of Political Science; Australian Journal of Politics and History.

Journal articles generally provide commentary on more specialized issues in world politics as well as aspects of IR theory. The Macquarie library holds a large range of books and journals on the subject matter of IR and it is recommended that you explore the shelves to see what is available at an early stage in the unit. It is certainly expected that you go beyond the readings listed in this unit guide, especially when researching for essays. For specialized reading, it is very important that you learn to find relevant journal articles via the library’s electronic data bases. Once you know how to use these, access to journal articles is quite straightforward. Also, recent journal issues are more readily accessible than recently published books which take much longer to get into the library system (and for which reason many books published in 2013/14 may not yet be in the library). One way to find books and articles on any aspect of IR is to use Google Scholar. Simply type ‘google scholar’ into your search tab, then type you topic, like ‘international
relations theory’ or ‘liberal international relations theory’ and you will immediately find literally hundreds of academic books and articles on the subject. Google Scholar does not bring up other web-based sources – only serious academic articles suitable for citing in essays. However, you have to exercise your own judgement about which are the most relevant or useful for your purpose.

**Policies and Procedures**

Macquarie University policies and procedures are accessible from [Policy Central](http://mq.edu.au/policy/docs/). Students should be aware of the following policies in particular with regard to Learning and Teaching:

In addition, a number of other policies can be found in the [Learning and Teaching Category](http://www.mq.edu.au/policy/docs/) of Policy Central.

**Student Code of Conduct**

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: [https://students.mq.edu.au/support/student_conduct/](https://students.mq.edu.au/support/student_conduct/)

**Results**

Results shown in *iLearn*, or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in *eStudent*. For more information visit [ask.mq.edu.au](http://ask.mq.edu.au).

**Student Support**

Macquarie University provides a range of support services for students. For details, visit [http://students.mq.edu.au/support/](http://students.mq.edu.au/support/)

**Learning Skills**

[mq.edu.au/learningskills](http://mq.edu.au/learningskills) provides academic writing resources and study strategies to improve your marks and take control of your study.
Our postgraduates will be able to demonstrate a significantly enhanced depth and breadth of knowledge, scholarly understanding, and specific subject content knowledge in their chosen fields.

PG - Critical, Analytical and Integrative Thinking

Our postgraduates will be capable of utilising and reflecting on prior knowledge and experience, of applying higher level critical thinking skills, and of integrating and synthesising learning and knowledge from a range of sources and environments. A characteristic of this form of thinking is the generation of new, professionally oriented knowledge through personal or group-based critique of practice and theory.
