Learning Outcomes

1. The ability to perform spinal adjustments and/or mobilisations with the appropriate associated skills; i.e. advanced tactile/palpatory skills and hand/body/eye co-ordination of practitioner movements.
2. The ability to control adjustment/mobilisation procedures with regard to patient body type, patient position, practitioner position, primary contact, secondary contact, lock-up/set-up, speed, amplitude and line of drive.
3. The ability to perform advanced static and motion palpation of spinal and peripheral joint systems.
4. Understanding of spinal joint normal and pathological biomechanics
5. Have the ability to assess and treat a variety of basic musculo-skeletal complaints at the proficiency of "clinician".
6. Become proficient in research skills at the level of open inquiry within structured
guidelines as part of a research skills development (RSD) progression

Tutorial attendance

Due: Ongoing
Weighting: 0%

As this is a chiropractic technique unit tutorial attendance is vital.

Tutorial attendance will be recorded by tutors.

A minimum tutorial attendance of 85% is expected.

This Assessment Task relates to the following Learning Outcomes:

- The ability to perform spinal adjustments and/or mobilisations with the appropriate associated skills; i.e. advanced tactile/palpatory skills and hand/body/eye co-ordination of practitioner movements.
- The ability to control adjustment/mobilisation procedures with regard to patient body type, patient position, practitioner position, primary contact, secondary contact, lock-up/set-up, speed, amplitude and line of drive.
- The ability to perform advanced static and motion palpation of spinal and peripheral joint systems.
- Understanding of spinal joint normal and pathological biomechanics
- Have the ability to assess and treat a variety of basic musculo-skeletal complaints at the proficiency of "clinician".
- Become proficient in research skills at the level of open inquiry within structured
guidelines as part of a research skills development (RSD) progression

Video Assignment (3x4%)

Due: Rolling
Weighting: 12%

A Technique Video Assignment is a task that aims to help you develop the challenging skill of 'putting it all together'. You will need to address the clinical presentation of a fellow student. You need to take a case history, conduct a physical examination, develop a treatment plan, deliver the first adjustment of that treatment plan, conduct a post treatment examination and appropriately record all aspects of this clinical interaction.

You will work independently up to the point of performing the adjustment. At that point you shall consult a tutor about the case you have worked up. Your tutor will discuss the clinical presentation with you and provide feedback on your clinical interaction, reasoning and records up to that point. Your tutor will then either agree with your proposed adjustment or propose an alternate approach. You will then video record the performance of the adjustment in a supervised environment (in class or in supervised practice). You will then submit the video and associated paperwork through the iLearn system. A tutor will then grade the performance and offer feedback. You will then be able to watch your performance again in light of this feedback to help your technique development.

This Assessment Task relates to the following Learning Outcomes:

- The ability to perform spinal adjustments and/or mobilisations with the appropriate associated skills; i.e. advanced tactile/palpatory skills and hand/body/eye co-ordination of practitioner movements.
- The ability to control adjustment/mobilisation procedures with regard to patient body type, patient position, practitioner position, primary contact, secondary contact, lock-up/set-up, speed, amplitude and line of drive.
- The ability to perform advanced static and motion palpation of spinal and peripheral joint systems.
- Have the ability to assess and treat a variety of basic musculo-skeletal complaints at the proficiency of "clinician".

iLearn Quiz 1

Due: 6pm Friday of week 6
Weighting: 4%

Online Quiz covering material from weeks 1, 2, 3, 4 & 5.

The quiz will be available online Thursday evening at 6pm and will stay open for 24 hours closing 6pm Friday evening of week 6.
This Assessment Task relates to the following Learning Outcomes:

- Understanding of spinal joint normal and pathological biomechanics
- Have the ability to assess and treat a variety of basic musculo-skeletal complaints at the proficiency of "clinician".
- Become proficient in research skills at the level of open inquiry within structured guidelines as part of a research skills development (RSD) progression

iLearn Quiz 2

Due: **6pm Friday of week 11**
Weighting: **4%**

Online Quiz covering material from weeks 6, 7, 8, 9 & 10.

The quiz will be available online Thursday evening at 6pm and will stay open for 24 hours closing 6pm Friday evening of week 11.

This Assessment Task relates to the following Learning Outcomes:

- Understanding of spinal joint normal and pathological biomechanics
- Have the ability to assess and treat a variety of basic musculo-skeletal complaints at the proficiency of "clinician".
- Become proficient in research skills at the level of open inquiry within structured guidelines as part of a research skills development (RSD) progression

FoCA (2x10%)

Due: **Week 6 & week 11**
Weighting: **20%**

Feedback on Chiropractic Assessment (FoCA): You will preform a chiropractic practical exam within normal tutorial time. Immediately afterward (i.e. during the same class), you will be given feedback on your performance. The layout of the exam will help prepare you for the OSCE.

This Assessment Task relates to the following Learning Outcomes:

- The ability to perform spinal adjustments and/or mobilisations with the appropriate associated skills; i.e. advanced tactile/palpatory skills and hand/body/eye co-ordination of practitioner movements.
- The ability to control adjustment/mobilisation procedures with regard to patient body type, patient position, practitioner position, primary contact, secondary contact, lock-up/set-up, speed, amplitude and line of drive.
- The ability to perform advanced static and motion palpation of spinal and peripheral joint systems.
Understanding of spinal joint normal and pathological biomechanics

Have the ability to assess and treat a variety of basic musculo-skeletal complaints at the proficiency of "clinician".

**OSCE**

**Due:** Week 13

**Weighting:** 30%

Objective Structural Clinical Exam (OSCE): You will perform a practical exam over a number of stations during the end of semester practical examination period. The marks from the OSCE will be published on the CHIR891 iLearn page after the formal exam period.

This Assessment Task relates to the following Learning Outcomes:

- The ability to perform spinal adjustments and/or mobilisations with the appropriate associated skills; i.e. advanced tactile/palpatory skills and hand/body/eye co-ordination of practitioner movements.
- The ability to control adjustment/mobilisation procedures with regard to patient body type, patient position, practitioner position, primary contact, secondary contact, lock-up/set-up, speed, amplitude and line of drive.
- The ability to perform advanced static and motion palpation of spinal and peripheral joint systems.
- Understanding of spinal joint normal and pathological biomechanics

**End of semester written exam**

**Due:** University Examination Period

**Weighting:** 30%

The end of semester written exam is a closed book examination of all the material covered in the unit.

This Assessment Task relates to the following Learning Outcomes:

- Understanding of spinal joint normal and pathological biomechanics
- Have the ability to assess and treat a variety of basic musculo-skeletal complaints at the proficiency of "clinician".
- Become proficient in research skills at the level of open inquiry within structured guidelines as part of a research skills development (RSD) progression

**Delivery and Resources**

https://unitguides.mq.edu.au/unit_offerings/55285/unit_guide/print
Classes

- The timetable for classes can be found on the University web site at: http://www.timetables.mq.edu.au/
- Tutorials begin on Thursday of week 1 - this is an organisational tutorial in which tutorial enrolment will be finalised.
- Tutorial attendance/participation is required and will be factored in to the final grade
- There are 12 x 2 x 1hr lecture times & 11 x 3 x 2hr tutorials

Required and Recommended Texts and/or Materials

TEXT

- Esposito & Philipson, Manual of Spinal Technique (compilation) - adjustment available from the Co-op Bookshop.
- Manual of Peripheral Technique, Department of Chiropractic, Macquarie University - online adjustment compilation available via iLearn download

- RECOMMENDED READING

- Bergmann & Peterson: Chiropractic technique, principles and procedures 3rd Ed. 2011, Mosby
- Specific resources available as links via iLearn each week

Teaching and Learning Strategy / electronic resources

- This unit is comprised of lectures and technique tutorials. There will also be some self directed learning within the course.
- The unit is an internal offering.
- Students are expected to attend lectures and tutorials (tutorial minimum attendance 85%)
- iLearn is not a substitute for lecture attendance. Complex concepts are discussed as a group within the lecture format.
Quizzes will be entered via iLearn

**Changes to CHIR891 in 2016**
In 2016 the number of iLearn quizzes has been reduced from 4 to 2. The amount of marks that the iLearn quizzes contribute to the cumulative assessment mark is unchanged.

In 2015, video assignments were introduced. 2016 will be the second year video assignments are used.

**Unit Schedule**
Refer to CHIR891 iLearn 2016 for unit schedule

**Learning and Teaching Activities**

**Lecture**
Lecture/class discussion

**Tutorial**
Demonstration/tutorial

**Case**
Case analysis

**FoCA**
Feedback on Chiropractic Assessment

**iLearn Quiz**
On line quiz

**Theory Assessment**
End of semester exam

**OSCE**
End of semester practicum

**Video assignment**
Video assignment

**Policies and Procedures**

Macquarie University policies and procedures are accessible from Policy Central. Students should be aware of the following policies in particular with regard to Learning and Teaching:

In addition, a number of other policies can be found in the Learning and Teaching Category of Policy Central.

### Student Code of Conduct

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: [https://students.mq.edu.au/support/student_conduct/](https://students.mq.edu.au/support/student_conduct/)

### Results

Results shown in *iLearn*, or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in *eStudent*. For more information visit [ask.mq.edu.au](http://ask.mq.edu.au).

### Passing the unit

To pass CHIR891, students need to pass the practical component of the unit AS WELL AS an overall passing grade. The passing grade is 50%. Tutorial attendance needs to be ≥85% in addition to the condition above. Attendance will be recorded at each tutorial.

You are required to read and understand the marking criteria found at the link below:

### Late submission

Late submission of assignments (video) will incur a penalty of 10% per day for each day overdue.

Late submission of iLearn Quiz will incur a penalty of 50%. A quiz will not be accepted after 48 hours past the due date without adequate certification.
Serious and unavoidable disruption: The University classifies a disruption as serious and unavoidable if it:

- could not have reasonably been anticipated, avoided or guarded against by the student; and
- was beyond the student’s control; and
- caused substantial disruption to the student’s capacity for effective study and/or completion of required work; and
- occurred during an event critical study period and was at least three (3) consecutive days duration, and/or
- prevented completion of a final examination.

Students with a pre-existing disability/health condition or prolonged adverse circumstances may be eligible for ongoing assistance and support. Such support is governed by other policies and may be sought and coordinated through Campus Wellbeing and Support Services.

If a supplementary examination is granted as a result of the disruption to studies process the examination will be scheduled after the conclusion of the official examination period. (Individual Faculties may wish to signal when the Faculty Supplementary exams are normally scheduled.)

If you are granted a supplementary exam via the Disruption to Studies process, you will have to write a supplementary exam in the supplementary exam period. In this scenario, only your supplementary exam mark will count towards your final exam mark, irrespective of whether or not you attended the final exam in the normal examination period. The submission of a Disruption to Studies form should not be used as a ‘just in case’ strategy.

You are advised that it is Macquarie University policy not to set early examinations for individuals or groups of students. You are expected to ensure that you are available until the end of the teaching semester that is the final day of the official examination period.

Student Support

Macquarie University provides a range of support services for students. For details, visit http://students.mq.edu.au/support/

Learning Skills

Learning Skills (mq.edu.au/learningskills) provides academic writing resources and study strategies to improve your marks and take control of your study.
Student Enquiry Service
For all student enquiries, visit Student Connect at ask.mq.edu.au

Equity Support
Students with a disability are encouraged to contact the Disability Service who can provide appropriate help with any issues that arise during their studies.

IT Help
For help with University computer systems and technology, visit http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/.

When using the University’s IT, you must adhere to the Acceptable Use of IT Resources Policy. The policy applies to all who connect to the MQ network including students.

Graduate Capabilities
PG - Capable of Professional and Personal Judgment and Initiative
Our postgraduates will demonstrate a high standard of discernment and common sense in their professional and personal judgment. They will have the ability to make informed choices and decisions that reflect both the nature of their professional work and their personal perspectives.

This graduate capability is supported by:

Learning outcomes

- The ability to perform spinal adjustments and/or mobilisations with the appropriate associated skills; i.e. advanced tactile/palpatory skills and hand/body/eye co-ordination of practitioner movements.
- The ability to control adjustment/mobilisation procedures with regard to patient body type, patient position, practitioner position, primary contact, secondary contact, lock-up/set-up, speed, amplitude and line of drive.
- The ability to perform advanced static and motion palpation of spinal and peripheral joint systems.
- Understanding of spinal joint normal and pathological biomechanics
- Have the ability to assess and treat a variety of basic musculo-skeletal complaints at the proficiency of "clinician".
Become proficient in research skills at the level of open inquiry within structured guidelines as part of a research skills development (RSD) progression

### Assessment tasks

- Tutorial attendance
- Video Assignment (3x4%)
- FoCA (2x10%)
- OSCE
- End of semester written exam

### Learning and teaching activities

- Demonstration/tutorial
- Case analysis
- Video assignment

### PG - Discipline Knowledge and Skills

Our postgraduates will be able to demonstrate a significantly enhanced depth and breadth of knowledge, scholarly understanding, and specific subject content knowledge in their chosen fields.

This graduate capability is supported by:

### Learning outcomes

- The ability to perform spinal adjustments and/or mobilisations with the appropriate associated skills; i.e. advanced tactile/palpatory skills and hand/body/eye co-ordination of practitioner movements.
- The ability to control adjustment/mobilisation procedures with regard to patient body type, patient position, practitioner position, primary contact, secondary contact, lock-up/set-up, speed, amplitude and line of drive.
- The ability to perform advanced static and motion palpation of spinal and peripheral joint systems.
- Have the ability to assess and treat a variety of basic musculo-skeletal complaints at the proficiency of "clinician".

### Assessment tasks

- Tutorial attendance
- Video Assignment (3x4%)
- iLearn Quiz 1
- iLearn Quiz 2
Learning and teaching activities

- Lecture/class discussion
- Demonstration/tutorial
- Case analysis
- Feedback on Chiropractic Assessment
- On line quiz
- End of semester exam
- End of semester practicum
- Video assignment

PG - Critical, Analytical and Integrative Thinking

Our postgraduates will be capable of utilising and reflecting on prior knowledge and experience, of applying higher level critical thinking skills, and of integrating and synthesising learning and knowledge from a range of sources and environments. A characteristic of this form of thinking is the generation of new, professionally oriented knowledge through personal or group-based critique of practice and theory.

This graduate capability is supported by:

Learning outcomes

- The ability to perform advanced static and motion palpation of spinal and peripheral joint systems.
- Understanding of spinal joint normal and pathological biomechanics
- Have the ability to assess and treat a variety of basic musculo-skeletal complaints at the proficiency of "clinician".
- Become proficient in research skills at the level of open inquiry within structured guidelines as part of a research skills development (RSD) progression

Assessment tasks

- Tutorial attendance
- Video Assignment (3x4%)
- iLearn Quiz 1
- iLearn Quiz 2
- FoCA (2x10%)
- End of semester written exam
Learning and teaching activities

- Lecture/class discussion
- Demonstration/tutorial
- Case analysis
- On line quiz
- End of semester exam
- Video assignment

PG - Research and Problem Solving Capability

Our postgraduates will be capable of systematic enquiry; able to use research skills to create new knowledge that can be applied to real world issues, or contribute to a field of study or practice to enhance society. They will be capable of creative questioning, problem finding and problem solving.

This graduate capability is supported by:

Learning outcomes

- Have the ability to assess and treat a variety of basic musculo-skeletal complaints at the proficiency of "clinician".
- Become proficient in research skills at the level of open inquiry within structured guidelines as part of a research skills development (RSD) progression

Assessment tasks

- Tutorial attendance
- iLearn Quiz 1
- iLearn Quiz 2
- End of semester written exam

Learning and teaching activities

- Lecture/class discussion
- Case analysis
- On line quiz
- End of semester exam

PG - Effective Communication

Our postgraduates will be able to communicate effectively and convey their views to different social, cultural, and professional audiences. They will be able to use a variety of technologically supported media to communicate with empathy using a range of written, spoken or visual formats.
This graduate capability is supported by:

**Learning outcomes**

- The ability to perform spinal adjustments and/or mobilisations with the appropriate associated skills; i.e. advanced tactile/palpatory skills and hand/body/eye co-ordination of practitioner movements.
- The ability to perform advanced static and motion palpation of spinal and peripheral joint systems.

**Assessment tasks**

- Tutorial attendance
- iLearn Quiz 1
- iLearn Quiz 2
- FoCA (2x10%)
- End of semester written exam

**Learning and teaching activities**

- Demonstration/tutorial
- Case analysis
- Feedback on Chiropractic Assessment
- End of semester practicum

**PG - Engaged and Responsible, Active and Ethical Citizens**

Our postgraduates will be ethically aware and capable of confident transformative action in relation to their professional responsibilities and the wider community. They will have a sense of connectedness with others and country and have a sense of mutual obligation. They will be able to appreciate the impact of their professional roles for social justice and inclusion related to national and global issues.

This graduate capability is supported by:

**Learning outcomes**

- The ability to perform advanced static and motion palpation of spinal and peripheral joint systems.
- Become proficient in research skills at the level of open inquiry within structured guidelines as part of a research skills development (RSD) progression

**Assessment tasks**

- Tutorial attendance
- FoCA (2x10%)
• OSCE
• End of semester written exam

**Learning and teaching activities**

• Demonstration/tutorial
• Case analysis
