Corequisites

Co-badged status

Unit description
This unit is designed to develop students’ understanding of the issues central to the Human Society and its Environment curriculum in years K–6, and Geography and History syllabuses in years K–10. It caters for the needs of students requiring a background in this key learning area and incorporates aspects of Australian social, cultural and environmental heritage, civics and citizenship education, and global perspectives.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at https://students.mq.edu.au/important-dates

Learning Outcomes

1. UO1 develop an appreciation of the complex factors shaping Australian society;
2. UO2 acquire knowledge, skills, values and attitudes which enable informed decisions to be made about content and methodology in the Human Society and its Environment learning area across K-10;
3. UO3 demonstrate an understanding of conceptual underpinnings and different perspectives about the key historical, social, cultural and environmental influences
related to the study of Australian society;

4. UO4 identify important aspects of government policy and of the Australian political system, and its implications for HSIE education; and

5. UO5 demonstrate understanding and appreciation of Australia in its global context – including the concept of global citizenship and the processes of economic and cultural integration, geopolitics and cultural conflict.

General Assessment Information

Submission of assignments

Assignments should be submitted through the Faculty’s Student Office on Level 3 of Building C3A, or through COE in the case of externally enrolled students.

All students MUST submit a copy of assignments via the Turnitin facility on the Unit's iLearn site.

All assignments MUST be word-processed. Assignments must NOT be placed in plastic sleeves or display folders. Under no circumstances will assignments be accepted via FAX or email attachment.

Students must use School of Education referencing procedures (APA style) in all assessment tasks (a copy can be downloaded from iLearn).

Applications for extensions must be made via the Faculty of Human Science’s online facility as k.mq.edu.au BEFORE the submission date. To ensure that consistency in the consideration of such requests is maintained, extensions can only be granted by the Unit Convener – Mrs Susan Caldis.

No assessable work will be accepted after the return of marked work on the same topic. If a student is still permitted to submit on the basis of unavoidable disruption, an alternative topic will be set.

Unless an extension is granted, late submissions will be penalised five per cent of the total possible mark for the assignment for each day late.

Students must keep a photocopy or electronic copy of assignments. In all but exceptional circumstances, claims about ‘lost’ assignments cannot be made where these copies cannot be produced.

Students who experience a disruption to their studies through ill-health or misadventure are able to apply for Special Consideration. Information related to Special Consideration can be found at: ask.mq.edu.au

The Special Consideration policy can be found at: Policy Central http://www.mq.edu.au/policy/index.html

HSIE and Australia’s Identity
Due: 18/03/2016
Weighting: 20%

“The HSIE learning area across Years K-10 provides opportunities for students to learn about Australian society from a range of perspectives. Throughout their study of HSIE related subjects, students are increasingly able to construct their own understanding about the continuity and change of Australia’s identity. It is important to remember that different perspectives can often challenge ‘mainstream ideas’ about Australia and its people.” Lectures 1 & 2.

Critically evaluate this statement drawing on the relevant literature.

In your extended response:

• Outline the nature of the HSIE learning area and its importance in helping students to develop an understanding about Australia’s identity (approximately 150 words);

• Describe the similarities and differences between ‘mainstream ideas’ and TWO other perspectives about Australia’s identity (approximately 250 words); and

• Critically evaluate the claim that the media effectively promotes a range of perspectives about the changing nature of Australia’s identity (approximately 350 words).

This Assessment Task relates to the following Learning Outcomes:

• UO1 develop an appreciation of the complex factors shaping Australian society;

• UO2 acquire knowledge, skills, values and attitudes which enable informed decisions to be made about content and methodology in the Human Society and its Environment learning area across K-10;

• UO3 demonstrate an understanding of conceptual underpinnings and different perspectives about the key historical, social, cultural and environmental influences related to the study of Australian society;

A HSIE Inquiry
Due: 27/05/2016
Weighting: 40%

“Inquiry based learning should underpin our teaching methodology in the HSIE learning area. It enables students to develop their curiosity and promotes interaction between themselves and other people as well as with their surrounding environment. Inquiry based learning helps students to understand the interconnections between people and places. Inquiry based learning also helps to bring the past in to the present whilst also bringing relevance to the seemingly irrelevant.”

Investigate a local site, event or issue that clearly demonstrates either ‘continuity and change’ or ‘sustainability’. Develop an inquiry question to frame your investigation about this site, event or issue so that you can conduct the inquiry with consideration of TWO different perspectives. Once the inquiry is completed and your research findings have been analysed, develop an extended response to include the following information:

• A description about the nature and location of the local site, event or issue being investigated, its connection to either ‘continuity and change’ or ‘sustainability’, and the TWO perspectives in focus;

• A justification about the chosen sources (History oriented) or research methodologies (Geography oriented) for this investigation, and an explanation about the research findings;

• Critically evaluate the possible, predicted and preferred futures for this local site, event or issue in the context of your research findings and the TWO chosen perspectives; and

• A concluding and reflective statement about the challenges and opportunities associated with inquiry based learning, based on your experience of this task but applied to a classroom context.

This Assessment Task relates to the following Learning Outcomes:

• UO2 acquire knowledge, skills, values and attitudes which enable informed decisions to be made about content and methodology in the Human Society and its Environment learning area across K-10;

• UO3 demonstrate an understanding of conceptual underpinnings and different perspectives about the key historical, social, cultural and environmental influences related to the study of Australian society;

• UO4 identify important aspects of government policy and of the Australian political system, and its implications for HSIE education; and

Examination

Due: During examination period
Weighting: 40%

Outlined below are EIGHT questions. THREE of these questions will be selected for the examination. Students will be required to answer TWO of the selected questions.
Aboriginal and Torres Strait Islander histories and cultures

Question 1

NAIDOC stands for National Aborigines and Islanders Day Observance Committee. NAIDOC Week is recognised around Australia and occurs in the first week of July. Each year there is a different theme to focus the activities around. In 2016, the theme for NAIDOC week is ‘Songlines: The living narrative of our nation’. The aim of NAIDOC Week is to increase awareness about and celebrate Aboriginal and Torres Strait Islander histories and cultures, as well as to recognise the contributions made by Indigenous Australians to our country and our society (adapted from www.naidoc.org.au; Lectures 4-8)

• Describe the significance of Country/Place to Aboriginal and Torres Strait Islander Peoples;
• Explain where AT LEAST TWO specific teaching and learning opportunities exist across the K-10 syllabus for History and/or Geography and how they could be used to enhance empathy and promote a deeper understanding about contestability between Indigenous and non-Indigenous Australians; and
• Critically assess the claim that Australia has much to learn from the contributions made by Aboriginal and Torres Strait Islander Peoples to communities, environments and places across the nation.

Question 2

A key element of contemporary ‘cultural conflict’ in Australia has been the so called ‘history wars’ in which a key point of contention is how the early years of colonial settlement should be addressed in the school curriculum. Conservatives want a ‘grand narrative’ of heroism – the taming of a hostile land and the building of a new society based on the values of mateship and egalitarianism. Progressives, on the other hand, want a ‘warts and all’ version of Australian history – one that acknowledges the dispossession and suffering of Indigenous Australians.

• Describe the significance of Country/Place to Aboriginal and Torres Strait Islander Peoples;
• Explain TWO different perspectives about TWO causes and effects of change experienced by Aboriginal and Torres Strait Islander Peoples since 1900; and
• Critically assess the view that full Reconciliation depends on recognition by non-Indigenous Australians that the alienation and disadvantage experienced by many Aboriginal and Torres Strait Islander Peoples can be linked to ‘Terra Nullius’.

Australia’s engagement with countries of the Asia region and globalisation
Question 3

There is a belief amongst some of Australia’s population that the White Australia Policy was born out of fear and insecurity about those who are racially or culturally different - and some contemporary government policies still reflect this past rhetoric. There is also a belief amongst some of Australia’s population that the pathway towards developing a multicultural society has been successful and that Australia enjoys close links with many countries, particularly those of the Asia region. (Lectures 7, 13-16)

- Describe the nature of ‘multiculturalism’ and ONE example of its evidence in Australian society as a result of government policy;
- Explain the key philosophical underpinnings of Australia’s immigration policy since Federation and how Australia has become increasingly connected to countries of the Asia region; and
- Critically assess the arguments for and against offshore and mainland processing of refugees and asylum seekers who are seeking entry to Australia.

Question 4

There are many perceptions about ‘Development’. An economist may consider a country to be ‘developed’ if its Gross Domestic Product is comparable to western capitalist economies such as the United States of America. However, a humanitarian may consider a country to be ‘developed’ based the proportion of the population able access high quality education and medical care at minimal expense. (Lectures 17-22)

In your extended response:

- Describe the nature ‘development’ and how ONE economic OR cultural event has contributed to Australia’s progress;
- Explain where AT LEAST TWO specific teaching and learning opportunities exist across the K-10 syllabus for History and/or Geography and how they could be used to enhance understanding about significance and change in the context of Australia at a global scale; and
- Critically assess the claim that Australia’s population enjoys living in a culturally integrated and economically developed society.

Australia’s identity and place in the world

Question 5

Australia is experiencing rapid economic, demographic and social change. The population is aging and becoming more culturally diverse; the environment supports a range of land-uses and sustainable management is meant to be the focus. These changes are influencing people’s decisions about where and how live. As a result, there is an ongoing debate about issues
including the opening up of a ‘food bowl’ in Northern Australia, the expected lifespan of the mining boom and its communities; urban planning considerations for an aging population, increasing population density and transport infrastructure. (Lectures 15-20)

In your extended response:

• Describe TWO different perspectives about ONE demographic change and ONE social change occurring across Australia;
• Explain how EACH change is influencing government policies and individual decisions about where and how to live; and
• Critically assess the arguments for and against Australia’s population growth in the context of sustainability.

Question 6

Australia’s national identity has been shaped over time by events, processes and people. Australia’s history (such as wartime experiences and the early exploration of the Australian continent) has created images of Australia as being a ‘classless’ or ‘egalitarian’ society in which everyone gets a ‘fair go’ including the ‘Aussie battler’. (Lectures 3-6, 9-12)

• Describe TWO factors that have contributed to Australia’s identity historically but still retains relevance in a contemporary context;
• Explain where AT LEAST TWO specific teaching and learning opportunities exist across the K-10 syllabus for History and/or Geography and how they could be used to enhance understanding about perspective, and continuity and change in the context of Australia’s identity; and
• Critically assess the extent to which ONE of the factors listed below has contributed to the emergence of a distinctly Australian identity:

  • Australia’s physical environment and natural disasters
  • Australia’s wartime experiences
  • Australia’s literature and popular culture.

HSIE teaching methodology

Question 7

As teachers, you need to be ambassadors not only for the profession but for a subject or key learning area that resonates with you. One way in which to be an effective ambassador is to demonstrate best-practice and implement teaching methodologies that research would suggest is most appropriate for your subject and student learning context. (Lectures 1-2, 10)

• Describe the significance of the HSIE key learning area being included as part of a national and school curriculum across primary and secondary years of schooling;
Explain the arguments for inquiry based learning and how you used this approach in addition to another recommended HSIE teaching methodology for a unit of work (or series of specific dot points in the syllabus) you completed as part of your professional experience; and

Critically assess the claim that HSIE teachers should only focus on being content experts.

**Question 8**

The new NSW K-10 syllabus for Geography and History has been applauded for its flexibility in curriculum design. One opportunity this ‘flexibility’ provides teachers is for them to be able to make links between subjects of the HSIE learning area where they feel it is most appropriate. This could occur in the context of conceptual understandings (such as change) or a cross-curriculum priority (such as sustainability) (Lectures 1-2, 10)

- Describe the significance of the cross-curriculum priorities and conceptual underpinnings for teaching and learning in the HSIE key learning area across primary and secondary years of schooling;
- Explain where AT LEAST TWO specific teaching and learning opportunities exist to link a conceptual understanding and/or cross curriculum priority between HSIE subjects and how you used this approach for a unit of work (or series of specific dot points in the syllabus) you completed as part of your professional experience; and
- Critically assess the claim that teaching the subjects of the HSIE learning area in an integrated way leads to students gaining a breadth rather than depth of understanding.

This Assessment Task relates to the following Learning Outcomes:

- UO1 develop an appreciation of the complex factors shaping Australian society;
- UO2 acquire knowledge, skills, values and attitudes which enable informed decisions to be made about content and methodology in the Human Society and its Environment learning area across K-10;
- UO3 demonstrate an understanding of conceptual underpinnings and different perspectives about the key historical, social, cultural and environmental influences related to the study of Australian society;
- UO4 identify important aspects of government policy and of the Australian political system, and its implications for HSIE education; and
- UO5 demonstrate understanding and appreciation of Australia in its global context – including the concept of global citizenship and the processes of economic and cultural integration, geopolitics and cultural conflict.
Delivery and Resources

Lectures:  
Monday (L1)  9.00am – 10.00am  (E7B Mason Theatre)  
Thursday (L2)  3.00pm – 4.00pm  (X5B T1 Theatre)

Tutorials:  
Monday  10.00am  E5A111  Carole Wellham  
Monday  10.00am  W6B382  Susan Caldis  
Monday  11.00am  E8A188  Carole Wellham  
Monday  11.00am  X5B143  Susan Caldis  
Monday  12.00noon  E6A109  Carole Wellham  

Thursday  2.00pm  C5C238  Alberto Marchetto  
Thursday  4.00pm  E5A160  Anastasia Zarkos  
Thursday  4.00pm  E5A170  Alberto Marchetto  
Thursday  5.00pm  C5A404  Anastasia Zarkos  
Thursday  5.00pm  X5B136  TBC

Attendance requirements  
EDUC289 is a lecture and tutorial-based unit of study. Students are, therefore, required to satisfy the tutorial and on-campus day attendance requirements specified by the School of Education. Where the student fails to meet this requirement they may be asked to show cause why they should not be excluded from, or fail, the unit. Students who miss a class will be required to substantiate their reasons by supplying the relevant documentation (for example, doctors’ certificates). Students should also consider lodging a ‘Special Consideration’ application through the University’s ask@mq facility.

IEC Students: An additional non-compulsory on-campus day will be held for students engaged in Professional Experience placements and who, as a consequence, miss tutorials.

External students (on-campus days)  
Students enrolled in the external mode offering MUST attend both on-campus days. If you are unable to meet this commitment you should change you enrolment status to an internal mode.

The on-campus sessions will be held on:

- Saturday 2 April – 9.00am–12.00pm and 1.00pm–4.00pm
- Saturday 21 May – 9.00am–12.00pm and 1.00pm–4.00pm

Technology requirements
Students enrolled in EDUC289 will need regular access to a computer and the Internet. There are a number of university computers in C5C (Rooms 211, 213 and 217) as well as in the dedicated teaching spaces for students studying Education (the TEL Labs C5A204). Computers in Room C5A204 can be accessed at specified times. These are posted on the door of C5A210.

The iLearn web page for this unit can be found at: https://ilearn.mq.edu.au

Students will need to use their own student username and password to log in and then choose EDUC289 from their My Online Units menu.

The EDUC289 iLearn facility provides students with access to:

- iLecture recordings of lectures (audio and visuals)
- A ‘soft’ copy of the EDUC289 Unit Outline, assignment and marking criteria.
- A discussion board.

Please do NOT contact the Unit Convener regarding iLearn technical support. Instead, contact the Macquarie University Library Student IT Help Desk (Phone: 9850 4357; Email: support@mq.edu.au)

**NOTE:** All official University correspondence will be sent via students’ University email account. Students are strongly advised to link this account to the email account you most frequently access. DO NOT use the email or discussion facility available on iLearn to contact the Unit Convener, please use: susan.caldis@mq.edu.au

**RECOMMENDED READINGS**

**Readings**

Readings are specified on a weekly basis and are available as a ‘Book of Readings’ sold through the Co-op Bookshop. There will also be additional readings available on the iLearn facility.

**Textbooks**

In addition to the new NSW K-10 Geography syllabus and new NSW K-10 History syllabus there is no recommended set text for EDUC289, however, students will find the following books to be of particular interest:

**HSIE Teaching Methodology**

Burgess, D. (2012), *Teach Like A PIRATE*, Dave Burgess Consulting Incorporated

Maude, A. (2014), *Understanding and Teaching the Australian Curriculum: Geography* for Primary Schools, Hawker Brownlow Education

Reynolds, R. (2012), *Teaching History and Geography & SOSE in the Primary School*, second

**HSIE related content**

Bradley, E. (2009), A Rock To Remember: A memoir from early tourism to Uluru, Kristina Kidd Publishing

https://unitguides.mq.edu.au/unit_offerings/56383/unit_guide/print
Angus and Robertson.

### Policies and Procedures

Macquarie University policies and procedures are accessible from [Policy Central](http://mq.edu.au/policy/docs/). Students should be aware of the following policies in particular with regard to Learning and Teaching:

In addition, a number of other policies can be found in the [Learning and Teaching Category](http://mq.edu.au/policy/docs/) of Policy Central.

### Student Code of Conduct

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: [https://students.mq.edu.au/support/student_conduct/](https://students.mq.edu.au/support/student_conduct/)

### Results

Results shown in *iLearn*, or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in *eStudent*. For more information visit [ask.m](http://mq.edu.au/policy/docs/).
Graduate Capabilities

Problem Solving and Research Capability

Our graduates should be capable of researching; of analysing, and interpreting and assessing data and information in various forms; of drawing connections across fields of knowledge; and they should be able to relate their knowledge to complex situations at work or in the world, in order to diagnose and solve problems. We want them to have the confidence to take the initiative in doing so, within an awareness of their own limitations.

This graduate capability is supported by:

Learning outcomes

- UO1 develop an appreciation of the complex factors shaping Australian society;
- UO2 acquire knowledge, skills, values and attitudes which enable informed decisions to be made about content and methodology in the Human Society and its Environment
learning area across K-10;

- UO3 demonstrate an understanding of conceptual underpinnings and different perspectives about the key historical, social, cultural and environmental influences related to the study of Australian society;
- UO4 identify important aspects of government policy and of the Australian political system, and its implications for HSIE education; and
- UO5 demonstrate understanding and appreciation of Australia in its global context – including the concept of global citizenship and the processes of economic and cultural integration, geopolitics and cultural conflict.

**Assessment tasks**

- HSIE and Australia's Identity
- A HSIE Inquiry
- Examination

**Effective Communication**

We want to develop in our students the ability to communicate and convey their views in forms effective with different audiences. We want our graduates to take with them the capability to read, listen, question, gather and evaluate information resources in a variety of formats, assess, write clearly, speak effectively, and to use visual communication and communication technologies as appropriate.

This graduate capability is supported by:

**Learning outcomes**

- UO1 develop an appreciation of the complex factors shaping Australian society;
- UO2 acquire knowledge, skills, values and attitudes which enable informed decisions to be made about content and methodology in the Human Society and its Environment learning area across K-10;
- UO4 identify important aspects of government policy and of the Australian political system, and its implications for HSIE education; and
- UO5 demonstrate understanding and appreciation of Australia in its global context – including the concept of global citizenship and the processes of economic and cultural integration, geopolitics and cultural conflict.

**Assessment tasks**

- HSIE and Australia's Identity
- Examination
Discipline Specific Knowledge and Skills

Our graduates will take with them the intellectual development, depth and breadth of knowledge, scholarly understanding, and specific subject content in their chosen fields to make them competent and confident in their subject or profession. They will be able to demonstrate, where relevant, professional technical competence and meet professional standards. They will be able to articulate the structure of knowledge of their discipline, be able to adapt discipline-specific knowledge to novel situations, and be able to contribute from their discipline to inter-disciplinary solutions to problems.

This graduate capability is supported by:

Learning outcomes

• UO1 develop an appreciation of the complex factors shaping Australian society;
• UO2 acquire knowledge, skills, values and attitudes which enable informed decisions to be made about content and methodology in the Human Society and its Environment learning area across K-10;
• UO3 demonstrate an understanding of conceptual underpinnings and different perspectives about the key historical, social, cultural and environmental influences related to the study of Australian society;
• UO4 identify important aspects of government policy and of the Australian political system, and its implications for HSIE education; and
• UO5 demonstrate understanding and appreciation of Australia in its global context – including the concept of global citizenship and the processes of economic and cultural integration, geopolitics and cultural conflict.

Assessment tasks

• HSIE and Australia’s Identity
• A HSIE Inquiry
• Examination

Critical, Analytical and Integrative Thinking

We want our graduates to be capable of reasoning, questioning and analysing, and to integrate and synthesise learning and knowledge from a range of sources and environments; to be able to critique constraints, assumptions and limitations; to be able to think independently and systemically in relation to scholarly activity, in the workplace, and in the world. We want them to have a level of scientific and information technology literacy.

This graduate capability is supported by:

Learning outcomes

• UO1 develop an appreciation of the complex factors shaping Australian society;
Unit guide EDUC289 Human Society and its Environment

- UO2 acquire knowledge, skills, values and attitudes which enable informed decisions to be made about content and methodology in the Human Society and its Environment learning area across K-10;
- UO3 demonstrate an understanding of conceptual underpinnings and different perspectives about the key historical, social, cultural and environmental influences related to the study of Australian society;
- UO4 identify important aspects of government policy and of the Australian political system, and its implications for HSIE education; and
- UO5 demonstrate understanding and appreciation of Australia in its global context – including the concept of global citizenship and the processes of economic and cultural integration, geopolitics and cultural conflict.

Assessment tasks

- HSIE and Australia's Identity
- A HSIE Inquiry
- Examination

Creative and Innovative

Our graduates will also be capable of creative thinking and of creating knowledge. They will be imaginative and open to experience and capable of innovation at work and in the community. We want them to be engaged in applying their critical, creative thinking.

This graduate capability is supported by:

Learning outcome

- UO5 demonstrate understanding and appreciation of Australia in its global context – including the concept of global citizenship and the processes of economic and cultural integration, geopolitics and cultural conflict.

Assessment task

- A HSIE Inquiry

Engaged and Ethical Local and Global citizens

As local citizens our graduates will be aware of indigenous perspectives and of the nation's historical context. They will be engaged with the challenges of contemporary society and with knowledge and ideas. We want our graduates to have respect for diversity, to be open-minded, sensitive to others and inclusive, and to be open to other cultures and perspectives: they should have a level of cultural literacy. Our graduates should be aware of disadvantage and social justice, and be willing to participate to help create a wiser and better society.

This graduate capability is supported by:
Learning outcomes

- UO2 acquire knowledge, skills, values and attitudes which enable informed decisions to be made about content and methodology in the Human Society and its Environment learning area across K-10;
- UO4 identify important aspects of government policy and of the Australian political system, and its implications for HSIE education; and
- UO5 demonstrate understanding and appreciation of Australia in its global context — including the concept of global citizenship and the processes of economic and cultural integration, geopolitics and cultural conflict.

Assessment tasks

- A HSIE Inquiry
- Examination

Socially and Environmentally Active and Responsible

We want our graduates to be aware of and have respect for self and others; to be able to work with others as a leader and a team player; to have a sense of connectedness with others and country; and to have a sense of mutual obligation. Our graduates should be informed and active participants in moving society towards sustainability.

This graduate capability is supported by:

Learning outcome

- UO5 demonstrate understanding and appreciation of Australia in its global context — including the concept of global citizenship and the processes of economic and cultural integration, geopolitics and cultural conflict.

Assessment tasks

- A HSIE Inquiry
- Examination

Capable of Professional and Personal Judgement and Initiative

We want our graduates to have emotional intelligence and sound interpersonal skills and to demonstrate discernment and common sense in their professional and personal judgement. They will exercise initiative as needed. They will be capable of risk assessment, and be able to handle ambiguity and complexity, enabling them to be adaptable in diverse and changing environments.

This graduate capability is supported by:
Learning outcomes

- UO1 develop an appreciation of the complex factors shaping Australian society;
- UO2 acquire knowledge, skills, values and attitudes which enable informed decisions to be made about content and methodology in the Human Society and its Environment learning area across K-10;
- UO3 demonstrate an understanding of conceptual underpinnings and different perspectives about the key historical, social, cultural and environmental influences related to the study of Australian society;
- UO4 identify important aspects of government policy and of the Australian political system, and its implications for HSIE education; and
- UO5 demonstrate understanding and appreciation of Australia in its global context – including the concept of global citizenship and the processes of economic and cultural integration, geopolitics and cultural conflict.

Assessment tasks

- HSIE and Australia’s Identity
- A HSIE Inquiry
- Examination

Changes from Previous Offering

As a result of formal and informal feedback received from students and academic staff the following changes have been made to the 2015 offering of EDUC289:

- The schedule of assessment tasks has been modified;
- The focus of knowledge, understanding and skills has been modified to reflect new syllabus requirements for Kindergarten to Year 10 in both History and Geography;
- A focus on HSIE methodology has been incorporated in to several lectures.
