Unit description
The unit focuses on the need for sustainable economic development worldwide. It assesses the impact of international environmental legal frameworks that relate to climate change, deforestation, water, fishing, waste and biodiversity and undertakes an overview of current scientific findings in the popular press. The unit evaluates the effectiveness of Australian legal frameworks designed to facilitate sustainable economic development. Corporate social responsibility for the protection of the planet is evaluated both internationally and nationally. The unit is designed to provide a basic understanding of environmental legal issues across a broad range of disciplines.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at https://students.mq.edu.au/important-dates

Learning Outcomes
1. Explain the concept of a sustainable planet and its capacity to sustain the current level of economic development
2. Assess current mitigation and adaptation strategies that relate to sustainability
3. Evaluate international and national legal frameworks that address climate change, water, the oceans, deforestation, and waste
4. Demonstrate an ability to understand scientific articles in the popular press that relate to sustainability

General Assessment Information

- Class Participation

**tutorial class)**

Weighting: **20%**

Class attendance and participation.

This Assessment Task relates to the following Learning Outcomes:

- Explain the concept of a sustainable planet and its capacity to sustain the current level of economic development
- Assess current mitigation and adaptation strategies that relate to sustainability
- Evaluate international and national legal frameworks that address climate change, water, the oceans, deforestation, and waste
- Demonstrate an ability to understand scientific articles in the popular press that relate to sustainability

In Lecture Test

This Assessment Task relates to the following Learning Outcomes:

- Evaluate international and national legal frameworks that address climate change, water, the oceans, deforestation, and waste
- Demonstrate an ability to understand scientific articles in the popular press that relate to sustainability

Final Take Home Assignment

This Assessment Task relates to the following Learning Outcomes:

- Explain the concept of a sustainable planet and its capacity to sustain the current level of economic development
- Assess current mitigation and adaptation strategies that relate to sustainability
- Evaluate international and national legal frameworks that address climate change, water, the oceans, deforestation, and waste

Tutorial participation

Due: each week
Weighting: 20%

Weekly attendance at tutorials is compulsory. A roll will be taken each week. A student who is absent for a tutorial will be considered as not having participated for that tutorial. Students will be assessed on a weekly basis.

Assessment criteria

Criteria upon which class participation is assessed are: students’ preparation for the classes, understanding the materials, depth of arguments, presentation skills and legal research. Please see guide to assessment on iLearn for details on how marks are awarded for participation in tutorials at [https://ilearn.mq.edu.au/login/MQ/](https://ilearn.mq.edu.au/login/MQ/)

Estimated Student workload (outside class time)

On average 1.5 - 2.5 hours per week

This Assessment Task relates to the following Learning Outcomes:

- Explain the concept of a sustainable planet and its capacity to sustain the current level of economic development
Assess current mitigation and adaptation strategies that relate to sustainability
Evaluate international and national legal frameworks that address climate change, water, the oceans, deforestation, and waste
Demonstrate an ability to understand scientific articles in the popular press that relate to sustainability

In lecture test
Due: 7 April 2016
Weighting: 18%

18 short questions worth one mark each are included and will focus on all the material you have learnt up until and including the lecture on 31 March 2016. It will be held during the time for the lecture. It will be held in the second half of the lecture. The Criteria for assessment are: students’ understanding of the materials, knowledge, and ability to analyse and evaluate issues concerning the topics covered in the unit for the test (detailed explanations of the assessment criteria provided on the iLearn site of the unit).

It is an Open Book test. Information about the test will be announced in the second week of the session.

The only exception to not sitting the test at the designated time is because of documented illness or unavoidable disruption. In these circumstances, students may wish to consider applying for Special Consideration under the University’s Disruption to Studies Policy, which is available at: http://mq.edu.au/policy/docs/disruption_studies/policy.html. If a Supplementary Test is granted, the Supplementary Test will be scheduled by the Unit Convenor.

The marked Tests will be returned to the students the following week.

Estimated Student Workload (outside class time)
On average 2 - 2.5 hours per week from Week 1 to the class test on 7 April 2016

This Assessment Task relates to the following Learning Outcomes:

• Evaluate international and national legal frameworks that address climate change, water, the oceans, deforestation, and waste
• Demonstrate an ability to understand scientific articles in the popular press that relate to sustainability

Final take home assignment
Due: 16 June 2016
Weighting: 60%
The final assignment contains 2 questions each worth 30 marks. The Questions are research based. Students will need to research outside the recommended reading materials for classes. Students will be expected to conduct their own research as the task is for each student to undertake. Collective or collaborative work is not acceptable.

The questions will be released on 9 June 2016 in the lecture.

Footnotes and a bibliography are required. The Australian Guide to Legal Citation 3rd ed is preferred. Criteria upon which the assignment is assessed are: content, structure, presentation and referencing. Detailed information on this assignment will be provided on iLearn. The assignment must be handed into BESS (Business and Economics Student Services by 3pm on 16 June 2016 in E4B 106.

No extensions will be granted. There will be a deduction of 10% of the total available marks made from the total awarded mark for each 24 hour period or part thereof that the submission is late. (for example 25 hours late in submission - 20% penalty). The penalty does not apply for cases in which an application for disruption of studies is made and approved. No submission will be accepted after solutions have been posted.

**Estimated Student Workload (outside class time)**

On average, 4.5 hours per week.

This Assessment Task relates to the following Learning Outcomes:

- Explain the concept of a sustainable planet and its capacity to sustain the current level of economic development
- Assess current mitigation and adaptation strategies that relate to sustainability
- Evaluate international and national legal frameworks that address climate change, water, the oceans, deforestation, and waste

**Referencing exercise**

Due: 17 March 2016
Weighting: 2%

You will undertake a referencing exercise in order to prepare you for your final assessment as outlined above. Full instructions will be posted on iLearn in the first week. You are to hand the assignment to your tutor. The time to undertake this exercise is an hour. Feedback will be provided within the first third of the study period. No extensions will be granted and as this exercise is only worth 2 marks the student will receive 0 marks for late submission. This penalty does not apply for cases in which an application for disruption of studies is made and approved.

This Assessment Task relates to the following Learning Outcomes:

- Demonstrate an ability to understand scientific articles in the popular press that relate to
sustainability

Delivery and Resources

Classes

3 hours face to face teaching including 1 x 2 hour lecture and 1 x 1 hour tutorial

The timetable for classes can be found on the University web site at: http://www.timetables.mq.edu.au/

Weekly attendance at all tutorials is compulsory and a roll will be taken each week. A student who is absent from a tutorial will not be assessed for that tutorial. Details on each tutorial class can be found on iLearn (https://iLearn.mq.edu.au). The detailed criteria for assessment is posted on iLearn.

Compulsory Text

Phillipe Sands and Jacqueline Peel Principles of International Environmental Law 3rd Ed. Cambridge Press 2012 This can be purchased from the Macquarie University Co-op Bookshop.

<td></td>
</tr>
</tbody>
</table>

**Tutorial 1**
- **10 March**
- The meaning of sustainability and sustainable development

**What does sustainable development mean?**
**What is the meaning of scientific literacy**

This tutorial is an introduction to the unit and also a brainstorming session by students.

**Tutorial 2**
- **17 March**
- Governance of this planet by international states and non-state actors

This tutorial requires you to identify the organizations both public and private that govern the way in which this planet is managed. You will identify both the effective and non-effective organizations involved.
<table>

Policies and Procedures

Macquarie University policies and procedures are accessible from Policy Central. Students should be aware of the following policies in particular with regard to Learning and Teaching:

In addition, a number of other policies can be found in the **Learning and Teaching Category** of Policy Central.

**Student Code of Conduct**

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: [https://students.mq.edu.au/support/student_conduct/](https://students.mq.edu.au/support/student_conduct/)

**Results**

Results shown in iLearn, or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in eStudent. For more information visit [ask.mq.edu.au](http://ask.mq.edu.au).
Grades

Macquarie University uses the following grades in coursework units of study:

- HD - High Distinction
- D - Distinction
- CR - Credit
- P - Pass
- F - Fail

Grade descriptors and other information concerning grading are contained in the Macquarie University Grading Policy which is available at: http://www.mq.edu.au/policy/docs/grading/policy.html.

All final grades in the Department of Accounting and Corporate Governance are determined by a grading committee and are not the sole responsibility of the Unit Coordinator.

Students will be awarded one of these grades plus a Standardised Numerical Grade (SNG). The SNG is not necessarily a summation of the individual assessment components.

The final grade and SNG that are awarded reflect the corresponding grade descriptor in the Grading Policy.

**To pass the unit, the students need an overall mark of 50%**.

Grading Appeals

If, at the conclusion of the unit, you have performed below expectations, and are considering lodging an appeal of grade and/or viewing your essay please refer to the following website which provides information about these processes and the cut off dates in the first instance. Please read the instructions provided concerning what constitutes a valid grounds for appeal before appealing your grade. http://www.businessandeconomics.mq.edu.au/new_and_current_students/undergraduate_current_students/how_do_i/grade_appeals/.

Academic Honesty

The nature of scholarly endeavour, dependent as it is on the work of others, binds all members of the University community to abide by the principles of academic honesty. Its fundamental principle is that all staff and students act with integrity in the creation, development, application
and use of ideas and information. This means that:

• all academic work claimed as original is the work of the author making the claim
• all academic collaborations are acknowledged
• academic work is not falsified in any way
• when the ideas of others are used, these ideas are acknowledged appropriately.

Further information on academic honesty can be found in the Macquarie University Academic honesty Policy at http://www.mq.edu.au/policy/docs/academic_honesty/policy.html

Disruption to Studies Policy
The University is committed to equity and fairness in all aspects of its learning and teaching. It recognises that students may experience disruptions that adversely affect their academic performance in assessment activities. A Disruption to Studies Policy exists to support students who experience serious and unavoidable disruption. The policy is available at: http://www.mq.edu.au/policy/docs/disruption_studies/policy.html.

Macquarie University provides a range of support services for students. For details, visit http://students.mq.edu.au/support/

Learning Skills
Learning Skills (mq.edu.au/learningskills) provides academic writing resources and study strategies to improve your marks and take control of your study.

• Workshops
• StudyWise
• Academic Integrity Module for Students
• Ask a Learning Adviser

Student Enquiry Service
For all student enquiries, visit Student Connect at ask.mq.edu.au

Equity Support
Students with a disability are encouraged to contact the Disability Service who can provide appropriate help with any issues that arise during their studies.

IT Help
For help with University computer systems and technology, visit http://informatics.mq.edu.au/help/.
When using the University's IT, you must adhere to the Acceptable Use Policy. The policy applies to all who connect to the MQ network including students.

Access to all student computing facilities within the Faculty of Business and Economics is restricted to authorised coursework for approved units. Student ID cards must be displayed in the locations provided at all times.

Students are expected to act responsibly when using University IT facilities. the following regulations apply to the use of computing facilities and online services:

Accessing in appropriate web sites or downloading inappropriate material is not permitted. Material that is not related to coursework for approved units is deemed inappropriate.

Downloading copyright material without permission from the copyright owner is illegal and strictly prohibited. Students detected undertaking such activities will face disciplinary action which may result in criminal proceedings.

Non compliance with these conditions may result in disciplinary action without further notice.

Students must use their Macquarie University email addresses to communicate with staff as it is University policy that the University issued email account is used for official University communication.

Consultation is not available via email or telephone.

---

**Student Support**

Macquarie University provides a range of support services for students. For details, visit [http://students.mq.edu.au/support/](http://students.mq.edu.au/support/)

**Learning Skills**

Learning Skills ([mq.edu.au/learningskills](http://mq.edu.au/learningskills)) provides academic writing resources and study strategies to improve your marks and take control of your study.

- **Workshops**
- **StudyWise**
We want our graduates to be aware of and have respect for self and others; to be able to work with others as a leader and a team player; to have a sense of connectedness with others and country; and to have a sense of mutual obligation. Our graduates should be informed and active participants in moving society towards sustainability.

Graduate Capabilities

Socially and Environmentally Active and Responsible

We want our graduates to be aware of and have respect for self and others; to be able to work with others as a leader and a team player; to have a sense of connectedness with others and country; and to have a sense of mutual obligation. Our graduates should be informed and active participants in moving society towards sustainability.

Learning outcomes

- Explain the concept of a sustainable planet and its capacity to sustain the current level of economic development
- Assess current mitigation and adaptation strategies that relate to sustainability
- Demonstrate an ability to understand scientific articles in the popular press that relate to sustainability

Assessment task

- Final take home assignment

Discipline Specific Knowledge and Skills

Our graduates will take with them the intellectual development, depth and breadth of knowledge, scholarly understanding, and specific subject content in their chosen fields to make them competent and confident in their subject or profession. They will be able to demonstrate, where relevant, professional technical competence and meet professional standards. They will be able to articulate the structure of knowledge of their discipline, be able to adapt discipline-specific
knowledge to novel situations, and be able to contribute from their discipline to inter-disciplinary solutions to problems.

This graduate capability is supported by:

**Learning outcomes**

- Explain the concept of a sustainable planet and its capacity to sustain the current level of economic development
- Assess current mitigation and adaptation strategies that relate to sustainability
- Evaluate international and national legal frameworks that address climate change, water, the oceans, deforestation, and waste
- Demonstrate an ability to understand scientific articles in the popular press that relate to sustainability

**Assessment tasks**

- Tutorial participation
- In lecture test
- Final take home assignment

**Critical, Analytical and Integrative Thinking**

We want our graduates to be capable of reasoning, questioning and analysing, and to integrate and synthesise learning and knowledge from a range of sources and environments; to be able to critique constraints, assumptions and limitations; to be able to think independently and systemically in relation to scholarly activity, in the workplace, and in the world. We want them to have a level of scientific and information technology literacy.

This graduate capability is supported by:

**Learning outcomes**

- Explain the concept of a sustainable planet and its capacity to sustain the current level of economic development
- Assess current mitigation and adaptation strategies that relate to sustainability
- Evaluate international and national legal frameworks that address climate change, water, the oceans, deforestation, and waste

**Assessment tasks**

- Tutorial participation
- Final take home assignment

**Problem Solving and Research Capability**

Our graduates should be capable of researching; of analysing, and interpreting and assessing
data and information in various forms; of drawing connections across fields of knowledge; and they should be able to relate their knowledge to complex situations at work or in the world, in order to diagnose and solve problems. We want them to have the confidence to take the initiative in doing so, within an awareness of their own limitations.

This graduate capability is supported by:

**Learning outcomes**

- Explain the concept of a sustainable planet and its capacity to sustain the current level of economic development
- Assess current mitigation and adaptation strategies that relate to sustainability
- Evaluate international and national legal frameworks that address climate change, water, the oceans, deforestation, and waste

**Assessment tasks**

- Tutorial participation
- In lecture test
- Final take home assignment
- Referencing exercise

**Changes from Previous Offering**

The journal exercise will not be undertaken this year however the referencing exercise that formed part of the journal exercise is included and is worth 2 marks.

The in lecture test is now worth 18 marks and not 20 marks.

Environmental governance - international, state and non state actors has been added to the unit lectures and tutorials

The final assignment is worth 20 more marks than last year and is now worth 60 marks.
