Credit points
3

Prerequisites
6cp in LING units at 200 level including (LING220 or LING214 or LING217 or PSY238) or admission to the GCertSphComm or GDipSphComm or DipSphComm

Corequisites

Co-badged status

Unit description
This unit introduces students to current theories of language acquisition, and studies children’s acquisition of word learning, morphology, syntax and pragmatics. Other topics include child bilingualism and child second language acquisition. Tutorials focus on working with data, including transcript data from children’s spontaneous speech, and discussions of appropriate experimental methodologies for evaluating children’s knowledge of language.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at https://students.mq.edu.au/important-dates
Learning Outcomes

1. Demonstrate knowledge of theories of language acquisition and their predictions for the developmental learning path
2. Evaluate experimental methodologies used to assess children’s grammatical competence and command the ethical issues surrounding working with children
3. Develop skills using CLAN, a computer program that searches transcripts of child data
4. Test experimental hypotheses through analysis and interpretation of a corpus of child data and communicate the findings

Activities

Due: **Weeks 2 through 11**
Weighting: 0%

Weekly activities based on readings or other materials provided online.

This Assessment Task relates to the following Learning Outcomes:

- Evaluate experimental methodologies used to assess children's grammatical competence and command the ethical issues surrounding working with children
- Develop skills using CLAN, a computer program that searches transcripts of child data

Online Quiz 1

Due: **Week 4**
Weighting: **10%**

This quiz tests students' understanding of theories of language acquisition
This Assessment Task relates to the following Learning Outcomes:

- Demonstrate knowledge of theories of language acquisition and their predictions for the developmental learning path

Assignment 1
Due: **Week 6**
Weighting: **15%**

Evaluation of how language acquisition theories relate to phenomena in child language

This Assessment Task relates to the following Learning Outcomes:

- Demonstrate knowledge of theories of language acquisition and their predictions for the developmental learning path
- Develop skills using CLAN, a computer program that searches transcripts of child data
- Test experimental hypotheses through analysis and interpretation of a corpus of child data and communicate the findings

Online Quiz 2
Due: **Week 10**
Weighting: **10%**

Review of class material

This Assessment Task relates to the following Learning Outcomes:

- Demonstrate knowledge of theories of language acquisition and their predictions for the developmental learning path

Assignment 2
Due: **Week 12**
Weighting: **25%**

Research: Testing theories of language acquisition through analysis and interpretation of data from transcripts of child language in CHILDES

This Assessment Task relates to the following Learning Outcomes:

- Demonstrate knowledge of theories of language acquisition and their predictions for the developmental learning path
- Develop skills using CLAN, a computer program that searches transcripts of child data
- Test experimental hypotheses through analysis and interpretation of a corpus of child data and communicate the findings
Final Exam
Due: Final Exam Period
Weighting: 40%

Examination covers topics from the entire semester.

This Assessment Task relates to the following Learning Outcomes:
- Demonstrate knowledge of theories of language acquisition and their predictions for the developmental learning path
- Evaluate experimental methodologies used to assess children’s grammatical competence and command the ethical issues surrounding working with children

Delivery and Resources

Lectures will be delivered online.

There will be a 2-hour face to face tutorial each week.

Students will need a laptop. We will download an open access program called CLAN from childes.psy.cmu.edu and use it to investigate phenomena in transcripts of child language.

Unit Schedule

Please see ilearn website for week by week schedule of topics.

Policies and Procedures

Macquarie University policies and procedures are accessible from Policy Central. Students should be aware of the following policies in particular with regard to Learning and Teaching:

Academic Honesty Policy http://mq.edu.au/policy/docs/academic_honesty/policy.html

Disruption to Studies Policy http://www.mq.edu.au/policy/docs/disruption_studies/policy.html The Disruption to Studies Policy is effective from March 3 2014 and replaces the Special Consideration Policy.

In addition, a number of other policies can be found in the Learning and Teaching Category of
Policy Central.

**Student Code of Conduct**

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: [https://students.mq.edu.au/support/student_conduct/](https://students.mq.edu.au/support/student_conduct/)

**Results**

Results shown in *iLearn*, or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in *eStudent*. For more information visit [ask.mq.edu.au](http://ask.mq.edu.au).

**Student Support**

Macquarie University provides a range of support services for students. For details, visit [http://students.mq.edu.au/support/](http://students.mq.edu.au/support/)

**Learning Skills**

Learning Skills ([mq.edu.au/learningskills](http://mq.edu.au/learningskills)) provides academic writing resources and study strategies to improve your marks and take control of your study.

- **Workshops**
- **StudyWise**
- **Academic Integrity Module for Students**
- **Ask a Learning Adviser**

**Student Enquiry Service**

For all student enquiries, visit Student Connect at [ask.mq.edu.au](http://ask.mq.edu.au)

**Equity Support**

Students with a disability are encouraged to contact the [Disability Service](http://students.mq.edu.au/disability_service/) who can provide appropriate help with any issues that arise during their studies.

**IT Help**

For help with University computer systems and technology, visit [http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/](http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/).

When using the University's IT, you must adhere to the [Acceptable Use of IT Resources Policy](http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/).

The policy applies to all who connect to the MQ network including students.

**Graduate Capabilities**

**Discipline Specific Knowledge and Skills**

Our graduates will take with them the intellectual development, depth and breadth of knowledge, scholarly understanding, and specific subject content in their chosen fields to make them
competent and confident in their subject or profession. They will be able to demonstrate, where relevant, professional technical competence and meet professional standards. They will be able to articulate the structure of knowledge of their discipline, be able to adapt discipline-specific knowledge to novel situations, and be able to contribute from their discipline to inter-disciplinary solutions to problems.

This graduate capability is supported by:

**Learning outcomes**

- Demonstrate knowledge of theories of language acquisition and their predictions for the developmental learning path
- Evaluate experimental methodologies used to assess children's grammatical competence and command the ethical issues surrounding working with children
- Develop skills using CLAN, a computer program that searches transcripts of child data
- Test experimental hypotheses through analysis and interpretation of a corpus of child data and communicate the findings

**Assessment tasks**

- Activities
- Online Quiz 1
- Assignment 1
- Online Quiz 2
- Assignment 2
- Final Exam

**Problem Solving and Research Capability**

Our graduates should be capable of researching; of analysing, and interpreting and assessing data and information in various forms; of drawing connections across fields of knowledge; and they should be able to relate their knowledge to complex situations at work or in the world, in order to diagnose and solve problems. We want them to have the confidence to take the initiative in doing so, within an awareness of their own limitations.

This graduate capability is supported by:

**Learning outcomes**

- Evaluate experimental methodologies used to assess children's grammatical competence and command the ethical issues surrounding working with children
- Develop skills using CLAN, a computer program that searches transcripts of child data
- Test experimental hypotheses through analysis and interpretation of a corpus of child data and communicate the findings
Assessment tasks

• Activities
• Assignment 1
• Assignment 2
• Final Exam

Effective Communication

We want to develop in our students the ability to communicate and convey their views in forms effective with different audiences. We want our graduates to take with them the capability to read, listen, question, gather and evaluate information resources in a variety of formats, assess, write clearly, speak effectively, and to use visual communication and communication technologies as appropriate.

This graduate capability is supported by:

Learning outcome

• Test experimental hypotheses through analysis and interpretation of a corpus of child data and communicate the findings

Assessment tasks

• Assignment 1
• Assignment 2

Critical, Analytical and Integrative Thinking

We want our graduates to be capable of reasoning, questioning and analysing, and to integrate and synthesise learning and knowledge from a range of sources and environments; to be able to critique constraints, assumptions and limitations; to be able to think independently and systemically in relation to scholarly activity, in the workplace, and in the world. We want them to have a level of scientific and information technology literacy.

This graduate capability is supported by:

Learning outcomes

• Demonstrate knowledge of theories of language acquisition and their predictions for the developmental learning path
• Test experimental hypotheses through analysis and interpretation of a corpus of child data and communicate the findings

Assessment tasks

• Online Quiz 1
• Assignment 1
Engaged and Ethical Local and Global citizens

As local citizens our graduates will be aware of indigenous perspectives and of the nation's historical context. They will be engaged with the challenges of contemporary society and with knowledge and ideas. We want our graduates to have respect for diversity, to be open-minded, sensitive to others and inclusive, and to be open to other cultures and perspectives: they should have a level of cultural literacy. Our graduates should be aware of disadvantage and social justice, and be willing to participate to help create a wiser and better society.

This graduate capability is supported by:

**Learning outcome**

- Evaluate experimental methodologies used to assess children's grammatical competence and command the ethical issues surrounding working with children

**Assessment tasks**

- Activities
- Final Exam
