Unit description
This unit is designed to bring students with no econometrics background to an intermediate level in econometrics. Starting from first principles, the unit outlines standard econometric methods to the extent necessary for students to understand key concepts, apply basic methods, and interpret empirical research results in economics, finance and business. The unit material also includes elementary discussions of violations of the standard assumptions for a regression model, such as autocorrelation and heteroscedasticity.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at https://students.mq.edu.au/important-dates

Learning Outcomes

1. Apply basic statistical techniques to problems in economics and business
2. Use econometric tools to model, estimate and forecast economic data
3. Critically evaluate empirical econometric work
4. Engage into further studies in econometrics
Assessment Tasks

<table>
<thead>
<tr>
<th>Name</th>
<th>Weighting</th>
<th>Due</th>

</thead>
<tbody>
<tr>
<td>Class Test</td>
<td>35%</td>
<td>Week 6</td>
</tr>
<tr>
<td>Take Home Test</td>
<td>35%</td>
<td>Week 11</td>
</tr>
<tr>
<td>Group Assignment</td>
<td>30%</td>
<td>Week 13</td>
</tr>
</tbody>
</table>

**Class Test**

**Due:** Week 6  
**Weighting:** 35%

A two hour test consisting of short-answer and multiple-choice questions will be held during the lecture in week 6. A calculator is needed for the test and attendance is compulsory.

Students must be available during the time of the lecture class to sit the class test. The only exception to this is that a student could not do the test because of documented illness or unavoidable disruption. In these circumstances this student may wish to consult the University’s Disruption to Studies policy - [http://www.mq.edu.au/policy/docs/disruption_studies/policy.html](http://www.mq.edu.au/policy/docs/disruption_studies/policy.html).

This Assessment Task relates to the following Learning Outcomes:

- Apply basic statistical techniques to problems in economics and business
- Engage into further studies in econometrics

**Take Home Test**

**Due:** Week 11  
**Weighting:** 35%

A take home test will consist of econometric problems that you will need to solve.

Late take home tests will be penalised at a rate of 20% per day. For example, if a test is late by less than 24 hours, 20% of the final mark will be deducted as penalty; if a test is late by more than 24 hours but less than 48 hours, 40% of the final mark will be deducted as penalty, etc. The only exception to this is that a student could not do the test because of documented illness or unavoidable disruption. In these circumstances this student may wish to consult the University’s Disruption to Studies policy - [http://www.mq.edu.au/policy/docs/disruption_studies/policy.html](http://www.mq.edu.au/policy/docs/disruption_studies/policy.html).

This Assessment Task relates to the following Learning Outcomes:

- Apply basic statistical techniques to problems in economics and business
- Critically evaluate empirical econometric work
Engage into further studies in econometrics

Group Assignment

Due: Week 13
Weighting: 30%

Hands on research using econometric models. Groups of up to 4 students will write a research report, and present their findings in the last week of lectures (week 13). A printed copy of the report will also be submitted in class in week 13. Assignment topic will be announced in class.

Late assignments will be penalised at a rate of 20% per day. For example, if an assignment is late by less than 24 hours, 20% of the final mark will be deducted as penalty; if an assignment is late by more than 24 hours but less than 48 hours, 40% of the final mark will be deducted as penalty, etc. The only exception to this is that a student could not do the test because of documented illness or unavoidable disruption. In these circumstances this student may wish to consult the University’s Disruption to Studies policy - http://www.mq.edu.au/policy/docs/disruption_studies/policy.html

This Assessment Task relates to the following Learning Outcomes:

- Apply basic statistical techniques to problems in economics and business
- Use econometric tools to model, estimate and forecast economic data
- Critically evaluate empirical econometric work
- Engage into further studies in econometrics

Delivery and Resources

This unit is taught as a mix of tutorials and lectures. The lectures are designed to provide the tools which can then be applied in tutorials. Tutorials are based mainly on numerical problems as well as empirical applications which require the use of econometric software packages. How to use these packages is taught in tutorials which are held in the computer labs.

Lectures – large group learning (3 hour each teaching week)

Lectures are intended to provide an overview of statistical and econometrics techniques that are critical to the core themes of the unit. Students are expected to read the relevant material before each lecture. Additional reading material such as academic papers and research reports will be provided on the website.

Self-study activities – learning by doing (about 6 hours each teaching week and 9 hours each week during the 2-week mid-semester recess)

ECON634 relies heavily on independent learning where students read the relevant chapter, revise the lecture notes, prepare answers to the pre-set tutorial questions and extend themselves by doing additional reading, questions, exercises and problems.
Useful references include:

Material such as lecture slides, examples, and tutorial questions will be available on the unit home page. The lecture notes, together with the lectures and additional references will provide students with a clear indication of the basic content of the unit.

It is recommended that students attend all lectures and tutorials for several reasons including:

1. Not all the material in the texts is included in the unit, and not all the material in the unit is covered in the texts. In some places the texts deals with issues in greater depth than is necessary for the unit, and in other places it doesn’t go far enough. The lectures contain all the unit material taught at the level required for the assessment tasks, and are your guide to the unit content.
2. The approaches to some problems that are recommended by the lecturer are different to those in the text.
3. The lectures will include guidance about the style and content of the final exam and recommendation about study technique.
4. It is difficult (and often impossible) for staff to provide meaningful assistance to students outside class times on topics for which they did not attend the relevant lectures and tutorials.

Policies and Procedures

Macquarie University policies and procedures are accessible from Policy Central. Students should be aware of the following policies in particular with regard to Learning and Teaching:

- **Academic Honesty Policy** [Link](http://mq.edu.au/policy/docs/academic_honesty/policy.html)
- **New Assessment Policy in effect from Session 2 2016** [Link](http://mq.edu.au/policy/docs/assessment/policy_2016.html). For more information visit [Link](http://students.mq.edu.au/events/2016/07/19/new_assessment_policy_in_place_from_session_2/)
- **Assessment Policy prior to Session 2 2016** [Link](http://mq.edu.au/policy/docs/assessment/policy.html)
- **Grading Policy prior to Session 2 2016** [Link](http://mq.edu.au/policy/docs/grading/policy.html)
- **Grade Appeal Policy** [Link](http://mq.edu.au/policy/docs/gradeappeal/policy.html)
- **Complaint Management Procedure for Students and Members of the Public** [Link](http://www.mq.edu.au/policy/docs/complaint_management/procedure.html)
- **Disruption to Studies Policy** [Link](http://www.mq.edu.au/policy/docs/disruption_studies/policy.html) The Disruption to Studies Policy is effective from March 3 2014 and replaces the Special Consideration Policy.

In addition, a number of other policies can be found in the Learning and Teaching Category of Policy Central.

**Student Code of Conduct**

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: [Link](https://students.mq.edu.au/support/student_conduct/)

**Results**

Results shown in iLearn, or released directly by your Unit Convenor, are not confirmed as they
are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in eStudent. For more information visit ask.mq.edu.au.

Student Support

Macquarie University provides a range of support services for students. For details, visit http://students.mq.edu.au/support/

Learning Skills

Learning Skills (mq.edu.au/learningskills) provides academic writing resources and study strategies to improve your marks and take control of your study.

- Workshops
- StudyWise
- Academic Integrity Module for Students
- Ask a Learning Adviser

Student Enquiry Service

For all student enquiries, visit Student Connect at ask.mq.edu.au

Equity Support

Students with a disability are encouraged to contact the Disability Service who can provide appropriate help with any issues that arise during their studies.

IT Help

For help with University computer systems and technology, visit http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/.

When using the University's IT, you must adhere to the Acceptable Use of IT Resources Policy. The policy applies to all who connect to the MQ network including students.

Graduate Capabilities

Capable of Professional and Personal Judgement and Initiative

We want our graduates to have emotional intelligence and sound interpersonal skills and to demonstrate discernment and common sense in their professional and personal judgement. They will exercise initiative as needed. They will be capable of risk assessment, and be able to handle ambiguity and complexity, enabling them to be adaptable in diverse and changing environments.

This graduate capability is supported by:

Assessment task

- Group Assignment
Discipline Specific Knowledge and Skills

Our graduates will take with them the intellectual development, depth and breadth of knowledge, scholarly understanding, and specific subject content in their chosen fields to make them competent and confident in their subject or profession. They will be able to demonstrate, where relevant, professional technical competence and meet professional standards. They will be able to articulate the structure of knowledge of their discipline, be able to adapt discipline-specific knowledge to novel situations, and be able to contribute from their discipline to inter-disciplinary solutions to problems.

This graduate capability is supported by:

**Learning outcomes**

- Apply basic statistical techniques to problems in economics and business
- Use econometric tools to model, estimate and forecast economic data
- Critically evaluate empirical econometric work
- Engage into further studies in econometrics

**Assessment tasks**

- Class Test
- Take Home Test
- Group Assignment

Critical, Analytical and Integrative Thinking

We want our graduates to be capable of reasoning, questioning and analysing, and to integrate and synthesise learning and knowledge from a range of sources and environments; to be able to critique constraints, assumptions and limitations; to be able to think independently and systemically in relation to scholarly activity, in the workplace, and in the world. We want them to have a level of scientific and information technology literacy.

This graduate capability is supported by:

**Learning outcomes**

- Use econometric tools to model, estimate and forecast economic data
- Critically evaluate empirical econometric work
- Engage into further studies in econometrics

**Assessment tasks**

- Class Test
- Take Home Test
- Group Assignment
Problem Solving and Research Capability

Our graduates should be capable of researching; of analysing, and interpreting and assessing data and information in various forms; of drawing connections across fields of knowledge; and they should be able to relate their knowledge to complex situations at work or in the world, in order to diagnose and solve problems. We want them to have the confidence to take the initiative in doing so, within an awareness of their own limitations.

This graduate capability is supported by:

**Learning outcomes**

- Apply basic statistical techniques to problems in economics and business
- Use econometric tools to model, estimate and forecast economic data
- Critically evaluate empirical econometric work
- Engage into further studies in econometrics

**Assessment tasks**

- Class Test
- Take Home Test
- Group Assignment

Effective Communication

We want to develop in our students the ability to communicate and convey their views in forms effective with different audiences. We want our graduates to take with them the capability to read, listen, question, gather and evaluate information resources in a variety of formats, assess, write clearly, speak effectively, and to use visual communication and communication technologies as appropriate.

This graduate capability is supported by:

**Learning outcomes**

- Apply basic statistical techniques to problems in economics and business
- Use econometric tools to model, estimate and forecast economic data
- Critically evaluate empirical econometric work
- Engage into further studies in econometrics

**Assessment tasks**

- Class Test
- Take Home Test
- Group Assignment
