Unit description
This unit enables students to understand and analyze the highly influential discourse of strategic management. Starting with the premise that the ideas and practices of strategic management are far too significant to be reduced to a set of simplified tools or techniques, this unit draws upon a wide range of academic work across the fields of management, organization studies, and strategy to examine the topic. Using this research, strategic management is considered in terms of the social, political, ethical and global effects that it engenders and encourages in today’s organised world. Students will have the opportunity to synthesize these areas of knowledge through analyzing the strategic lessons to be drawn from major organizational and societal events, including those of high-level corporate fraud and environmental crisis.

Changes from Previous Offering

We have changed one of the weekly readings as a response to tutor and student feedback. We have locked-in the two weeks of group work preparation time in weeks 11 and 12 trialed in the previous semester, due to positive feedback from students.

Global Contexts and Sustainability

This unit examines Strategic Management from a critical academic perspective. As such, we will be questioning the theories and practices of strategic management as much as learning them. A major aspect of this questioning will be an examination of the global, ethical and environmental impacts of dominant corporate strategies.

Research and Practice

This unit requires students to engage with contemporary and classic research texts on strategy, drawn from the leading management and strategy journals. As such, the unit fosters student's abilities to read and understand published academic research on the subject area. In addition, students will conduct their own independent research into the strategies and performance of real organisations - drawing upon the academic material to develop a research-informed analysis of contemporary business practice.
