In the lecture in weeks 3, 6, 9 and 12 students will be asked to complete a '10 minute debrief' (10MD) activity. In these activities students will work in groups of 3-5, to answer a set question on the running case of the textbook. Groups' handwritten answer to the question will be given to the lecturer on the spot. Results shown in iLearn, or released directly by your Unit Convenor, are not confirmed as they
Our graduates should be capable of researching; of analysing, and interpreting and assessing data and information in various forms; of drawing connections across fields of knowledge; and they should be able to relate their knowledge to complex situations at work or in the world, in order to diagnose and solve problems. We want them to have the confidence to take the initiative in doing so, within an awareness of their own limitations.

Research and Practice; Global and Sustainability

This unit draws on extensive research from sources outside the textbook. Students will be provided with stretch readings for every week that will allow them to considerably expand their knowledge of OB. Such readings are for example:

Conducting research independently is strongly encouraged for this unit and is rewarded. This unit will give you extensive practice in applying theoretical knowledge on case studies. Issues of sustainability are integrated throughout the unit, with sustainability explicitly discussed in Week 12. Examples of practices from different countries will be discussed in the lectures and in tutorials.
