Unit description
This unit is designed as an introduction to common neuropsychological disorders including disorders of memory, adaptive functions, perception, praxis and language. Models of normal and abnormal function and case examples of dysfunction are presented. This unit is designed to provide insight into how neuropsychological disorders typically manifest. It provides students with an understanding of how functions such as memory, adaptive abilities, perception, praxis and language are typically disrupted as a result of neurological dysfunction. The unit relates to material taught in psychological assessment, professional practice, neuroanatomy and neuropsychopathology.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at https://students.mq.edu.au/important-dates

Learning Outcomes

1. Understanding the difference between psychological and neuropsychological assessment
2. In depth understanding of how cognitive functions can be disrupted following acquired brain damage that can be applied clinically
3. In depth understanding of how neuropsychological disorders typically manifest that can
be applied clinically

4. Skill in interpretation of neuropsychological test results including base rate analysis

<tr>
<td>Assignment 2</td>
<td>25%</td>
<td>3/5/16</td>
</tr>
</tbody>
</table>

**Exam - open book**

Due: **Week 13.**

Weighting: **50%**

Open book examination of 90 minutes duration. The assessment task relates to the following learning outcomes:

- Understanding how cognitive functions can be disrupted
- Understanding how neuropsychological disorders typically manifest

This Assessment Task relates to the following Learning Outcomes:

- In depth understanding of how cognitive functions can be disrupted following acquired brain damage that can be applied clinically
- In depth understanding of how neuropsychological disorders typically manifest that can be applied clinically
- Skill in interpretation of neuropsychological test results including base rate analysis

**Assignment 1**

Due: **5/4/16**

Weighting: **25%**

Interpretation of neuropsychological test results. The assessment task relates to the following learning outcomes:

- Understanding the difference between psychological and neuropsychological assessment
- Skill in interpretation of neuropsychological test results including base rate analysis
- Understanding how cognitive functions can be disrupted
- Understanding of how neuropsychological disorders typically manifest
This Assessment Task relates to the following Learning Outcomes:

- Understanding the difference between psychological and neuropsychological assessment
- In depth understanding of how cognitive functions can be disrupted following acquired brain damage that can be applied clinically
- In depth understanding of how neuropsychological disorders typically manifest that can be applied clinically
- Skill in interpretation of neuropsychological test results including base rate analysis

Assignment 2
Due: 3/5/16
Weighting: 25%

Interpretation of clinical data. The assessment task relates to the following learning outcomes

- Understanding the difference between psychological and neuropsychological assessment
- Skill in interpretation of neuropsychological test results including base rate analysis
- Understanding how cognitive functions can be disrupted
- Understanding of how neuropsychological disorders typically manifest

Delivery and Resources
Articles and texts provided during class

Policies and Procedures
Macquarie University policies and procedures are accessible from Policy Central. Students should be aware of the following policies in particular with regard to Learning and Teaching:

Academic Honesty Policy http://mq.edu.au/policy/docs/academic_honesty/policy.html

Disruption to Studies Policy http://www.mq.edu.au/policy/docs/disruption_studies/policy.html The Disruption to Studies Policy is effective from March 3 2014 and replaces the Special Consideration Policy.

In addition, a number of other policies can be found in the Learning and Teaching Category of Policy Central.

Student Code of Conduct

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: https://students.mq.edu.au/support/student_conduct/

Results

Results shown in iLearn, or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in eStudent. For more information visit ask.mq.edu.au.

Student Support

Macquarie University provides a range of support services for students. For details, visit http://students.mq.edu.au/support/

Learning Skills

Learning Skills (mq.edu.au/learningskills) provides academic writing resources and study strategies to improve your marks and take control of your study.

- Workshops
- StudyWise
- Academic Integrity Module for Students
- Ask a Learning Adviser

Student Enquiry Service

For all student enquiries, visit Student Connect at ask.mq.edu.au

Equity Support

Students with a disability are encouraged to contact the Disability Service who can provide appropriate help with any issues that arise during their studies.
Graduate Capabilities

PG - Discipline Knowledge and Skills

Our postgraduates will be able to demonstrate a significantly enhanced depth and breadth of knowledge, scholarly understanding, and specific subject content knowledge in their chosen fields.

This graduate capability is supported by:

**Learning outcomes**

- Understanding the difference between psychological and neuropsychological assessment
- In depth understanding of how cognitive functions can be disrupted following acquired brain damage that can be applied clinically
- In depth understanding of how neuropsychological disorders typically manifest that can be applied clinically
- Skill in interpretation of neuropsychological test results including base rate analysis

**Assessment tasks**

- Exam - open book
- Assignment 1
- Assignment 2

PG - Critical, Analytical and Integrative Thinking

Our postgraduates will be capable of utilising and reflecting on prior knowledge and experience, of applying higher level critical thinking skills, and of integrating and synthesising learning and knowledge from a range of sources and environments. A characteristic of this form of thinking is the generation of new, professionally oriented knowledge through personal or group-based critique of practice and theory.

This graduate capability is supported by:

**Learning outcomes**

- Understanding the difference between psychological and neuropsychological assessment
Unit guide PSYN840 Neuropsychological Disorders

- In depth understanding of how cognitive functions can be disrupted following acquired brain damage that can be applied clinically
- In depth understanding of how neuropsychological disorders typically manifest that can be applied clinically
- Skill in interpretation of neuropsychological test results including base rate analysis

Assessment tasks
- Exam - open book
- Assignment 1
- Assignment 2

PG - Research and Problem Solving Capability
Our postgraduates will be capable of systematic enquiry; able to use research skills to create new knowledge that can be applied to real world issues, or contribute to a field of study or practice to enhance society. They will be capable of creative questioning, problem finding and problem solving.

This graduate capability is supported by:

Learning outcomes
- In depth understanding of how cognitive functions can be disrupted following acquired brain damage that can be applied clinically
- In depth understanding of how neuropsychological disorders typically manifest that can be applied clinically
- Skill in interpretation of neuropsychological test results including base rate analysis

Assessment tasks
- Exam - open book
- Assignment 1
- Assignment 2

PG - Effective Communication
Our postgraduates will be able to communicate effectively and convey their views to different social, cultural, and professional audiences. They will be able to use a variety of technologically supported media to communicate with empathy using a range of written, spoken or visual formats.

This graduate capability is supported by:

Learning outcomes
- In depth understanding of how cognitive functions can be disrupted following acquired
brain damage that can be applied clinically
• Skill in interpretation of neuropsychological test results including base rate analysis

Assessment tasks
• Exam - open book
• Assignment 1
• Assignment 2

PG - Engaged and Responsible, Active and Ethical Citizens

Our postgraduates will be ethically aware and capable of confident transformative action in relation to their professional responsibilities and the wider community. They will have a sense of connectedness with others and country and have a sense of mutual obligation. They will be able to appreciate the impact of their professional roles for social justice and inclusion related to national and global issues.

This graduate capability is supported by:

Learning outcomes
• Understanding the difference between psychological and neuropsychological assessment
• In depth understanding of how cognitive functions can be disrupted following acquired brain damage that can be applied clinically
• In depth understanding of how neuropsychological disorders typically manifest that can be applied clinically

Assessment tasks
• Exam - open book
• Assignment 1
• Assignment 2

PG - Capable of Professional and Personal Judgment and Initiative

Our postgraduates will demonstrate a high standard of discernment and common sense in their professional and personal judgment. They will have the ability to make informed choices and decisions that reflect both the nature of their professional work and their personal perspectives.

This graduate capability is supported by:

Learning outcomes
• Understanding the difference between psychological and neuropsychological assessment
• In depth understanding of how cognitive functions can be disrupted following acquired
brain damage that can be applied clinically

- In depth understanding of how neuropsychological disorders typically manifest that can be applied clinically

**Assessment tasks**

- Exam - open book
- Assignment 1
- Assignment 2
