Disclaimer
Macquarie University has taken all reasonable measures to ensure the information in this publication is accurate and up-to-date. However, the information may change or become out-dated as a result of change in University policies, procedures or rules. The University reserves the right to make changes to any information in this publication without notice. Users of this publication are advised to check the website version of this publication [or the relevant faculty or department] before acting on any information in this publication.
General Information

Unit convenor and teaching staff
Mark Lackie
mark.lackie@mq.edu.au

Credit points
4

Prerequisites
Permission of Executive Dean of Faculty

Learning Outcomes
On successful completion of this unit, you will be able to:

1. Students will be able to utilise geophysical software to solve geological problems
2. Students will acquire new computational skills
3. Students will be able to process raw geophysical data to best highlight geological information
4. Competence in accessing, using and synthesising appropriate information
5. Application of knowledge to solving problems and evaluating ideas and information
6. Capacity to present ideas clearly with supporting evidence

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at https://www.mq.edu.au/study/calendar-of-dates
## Assessment Tasks

### Assignment I

**Due:** See schedule  
**Weighting:** 15%

**ModelVision Exercises**

On successful completion you will be able to:

- 1. Students will be able to utilise geophysical software to solve geological problems
- 2. Students will acquire new computational skills
- 3. Students will be able to process raw geophysical data to best highlight geological information
- 4. Competence in accessing, using and synthesising appropriate information
- 6. Capacity to present ideas clearly with supporting evidence

### Assignment II

**Due:** See schedule  
**Weighting:** 15%

**MAPINFO/Discover exercises**

On successful completion you will be able to:

- 1. Students will be able to utilise geophysical software to solve geological problems
- 2. Students will acquire new computational skills
- 4. Competence in accessing, using and synthesising appropriate information
Assignment III
Due: See schedule
Weighting: 15%
Geosoft exercises

On successful completion you will be able to:
• 1. Students will be able to utilise geophysical software to solve geological problems
• 2. Students will acquire new computational skills
• 4. Competence in accessing, using and synthesising appropriate information
• 6. Capacity to present ideas clearly with supporting evidence

Assignment IV
Due: See Schedule
Weighting: 10%
ERMAPPER exercises

On successful completion you will be able to:
• 1. Students will be able to utilise geophysical software to solve geological problems
• 2. Students will acquire new computational skills
• 4. Competence in accessing, using and synthesising appropriate information
• 5. Application of knowledge to solving problems and evaluating ideas and information
• 6. Capacity to present ideas clearly with supporting evidence

Assignment V
Due: See Schedule
Weighting: 20%
Interpretation exercise

On successful completion you will be able to:
• 2. Students will acquire new computational skills
• 3. Students will be able to process raw geophysical data to best highlight geological information
• 4. Competence in accessing, using and synthesising appropriate information
• 5. Application of knowledge to solving problems and evaluating ideas and information
• 6. Capacity to present ideas clearly with supporting evidence
Oral Presentation

Due: **See schedule**  
Weighting: **10%**  

Seminar on a specialist paper.

On successful completion you will be able to:  
- 3. Students will be able to process raw geophysical data to best highlight geological information  
- 4. Competence in accessing, using and synthesising appropriate information  
- 6. Capacity to present ideas clearly with supporting evidence

Exam

Due: **End of Semester**  
Weighting: **15%**  

Theory and Practical examination

On successful completion you will be able to:  
- 3. Students will be able to process raw geophysical data to best highlight geological information  
- 5. Application of knowledge to solving problems and evaluating ideas and information

Delivery and Resources

There is no textbook for the unit. A copy of DENTITH AND MUDGE (QC807 .D46 2014) or SHARMA (QE501.3.S48) or (TA705.S515/1997), or PARASNIS (TN269P32) or REYNOLDS (QC808.5.R49) or TELFORD (TN269.T44) or KEAREY and BROOKS (TN269.K36) or MUSSETT and KHAN (QE501.M87) would be useful to have around. Copies of relevant sections of the software manuals are on all the computers and I will make them available on the iLearn WEBSITE at [https://ilearn.mq.edu.au/login/MQ/](https://ilearn.mq.edu.au/login/MQ/). I will post the assignments and PDFs of relevant sections of the manuals on that site.

Policies and Procedures

Macquarie University policies and procedures are accessible from [Policy Central](http://mq.edu.au/policy/docs/policy_central/policy.html). Students should be aware of the following policies in particular with regard to Learning and Teaching:

In addition, a number of other policies can be found in the Learning and Teaching Category of Policy Central.

**Student Code of Conduct**

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: [https://students.mq.edu.au/support/student_conduct/](https://students.mq.edu.au/support/student_conduct/)

**Results**

Results shown in iLearn, or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in eStudent. For more information visit [ask.mq.edu.au](http://ask.mq.edu.au).

**Student Support**

Macquarie University provides a range of support services for students. For details, visit [http://students.mq.edu.au/support/](http://students.mq.edu.au/support/)

**Learning Skills**

Learning Skills ([mq.edu.au/learningskills](http://mq.edu.au/learningskills)) provides academic writing resources and study strategies to improve your marks and take control of your study.

- Workshops
- StudyWise
- Academic Integrity Module for Students
- Ask a Learning Adviser

**Student Services and Support**

Students with a disability are encouraged to contact the Disability Service who can provide appropriate help with any issues that arise during their studies.

**Student Enquiries**

For all student enquiries, visit Student Connect at [ask.mq.edu.au](http://ask.mq.edu.au)

**IT Help**

For help with University computer systems and technology, visit [http://www.mq.edu.au/about_us/](http://www.mq.edu.au/about_us/)
Graduate Capabilities

PG - Discipline Knowledge and Skills
Our postgraduates will be able to demonstrate a significantly enhanced depth and breadth of knowledge, scholarly understanding, and specific subject content knowledge in their chosen fields.

This graduate capability is supported by:

Learning outcomes
- 1. Students will be able to utilise geophysical software to solve geological problems
- 2. Students will acquire new computational skills
- 3. Students will be able to process raw geophysical data to best highlight geological information
- 4. Competence in accessing, using and synthesising appropriate information
- 5. Application of knowledge to solving problems and evaluating ideas and information
- 6. Capacity to present ideas clearly with supporting evidence

Assessment tasks
- Assignment I
- Assignment II
- Assignment III
- Assignment IV
- Assignment V
- Oral Presentation
- Exam

PG - Critical, Analytical and Integrative Thinking
Our postgraduates will be capable of utilising and reflecting on prior knowledge and experience, of applying higher level critical thinking skills, and of integrating and synthesising learning and knowledge from a range of sources and environments. A characteristic of this form of thinking is the generation of new, professionally oriented knowledge through personal or group-based critique of practice and theory.

This graduate capability is supported by:

When using the University's IT, you must adhere to the Acceptable Use of IT Resources Policy. The policy applies to all who connect to the MQ network including students.
Learning outcomes

• 3. Students will be able to process raw geophysical data to best highlight geological information
• 6. Capacity to present ideas clearly with supporting evidence

Assessment tasks

• Assignment I
• Assignment V
• Exam

PG - Research and Problem Solving Capability

Our postgraduates will be capable of systematic enquiry; able to use research skills to create new knowledge that can be applied to real world issues, or contribute to a field of study or practice to enhance society. They will be capable of creative questioning, problem finding and problem solving.

This graduate capability is supported by:

Learning outcomes

• 3. Students will be able to process raw geophysical data to best highlight geological information
• 5. Application of knowledge to solving problems and evaluating ideas and information

Assessment tasks

• Assignment V
• Oral Presentation
• Exam

PG - Effective Communication

Our postgraduates will be able to communicate effectively and convey their views to different social, cultural, and professional audiences. They will be able to use a variety of technologically supported media to communicate with empathy using a range of written, spoken or visual formats.

This graduate capability is supported by:

Learning outcomes

• 1. Students will be able to utilise geophysical software to solve geological problems
• 2. Students will acquire new computational skills
• 3. Students will be able to process raw geophysical data to best highlight geological information
Unit guide GEOS929 Geophysical Data Processing

- 4. Competence in accessing, using and synthesising appropriate information
- 5. Application of knowledge to solving problems and evaluating ideas and information
- 6. Capacity to present ideas clearly with supporting evidence

Assessment tasks

- Assignment I
- Assignment II
- Assignment III
- Assignment IV
- Assignment V
- Oral Presentation
- Exam
