Credit points
3

Prerequisites
15cp or admission to GCertBiotech

Corequisites

Co-badged status

Unit description
Alchemy is the art and science of converting one substance into another and it has been an important factor in shaping our society. Metals, ceramics, drugs and plastics have changed and enhanced our lifestyle. Drugs, fertilisers and pesticides have saved millions of lives, but not without some unforeseen environmental or social problems. When this happens, decisions have to be made and costs weighed against benefits. An appreciation of such issues is needed for better understanding of important problems that face society. This unit explores the way chemistry affects our lives, and the way chemists work things out. The unit does not aim to teach chemistry but looks at the impact that chemical sciences has had on civilisation, and where the latest molecular innovations are likely to lead us. The commercial significance of key biological processes and industries is addressed, emphasising the Australian context. The unit also examines connections between chemistry and other scientific fields as diverse as psychology, finance, medicine, environmental studies and astronomy, as well as revealing aesthetic and philosophical aspects of chemistry. This unit is taught online with a combination of topical lectures and multimedia material.
Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at [https://students.mq.edu.au/important-dates](https://students.mq.edu.au/important-dates)

Learning Outcomes

1. Identify issues facing humanity that are caused by chemicals or have have their solution in chemistry
2. Be able to discuss important issues that have a chemical basis from a rational perspective
3. Be able to critically evaluate non-specialist literature (e.g. Newspapers) that discuss chemical and biochemical issues
4. Understand the role of chemistry and the molecular sciences in drug discovery and medicine
5. Understand the role of chemistry as the source and solution of environmental issues
6. Understand the role of chemistry in industry
7. Understand how chemists approach scientific and seek to solve chemical questions
8. Identify chemical issues facing humanity

Assessment Tasks

workshop 1

Due: **Week 3**
Weighting: 8%
This Assessment Task relates to the following Learning Outcomes:

- Identify issues facing humanity that are caused by chemicals or have have their solution in chemistry
- Understand the role of chemistry in industry
- Identify chemical issues facing humanity

**Workshop 2**

Due: **Week 7**
Weighting: **8%**

This Assessment Task relates to the following Learning Outcomes:

- Identify issues facing humanity that are caused by chemicals or have have their solution in chemistry
- Understand the role of chemistry and the molecular sciences in drug discovery and medicine
- Identify chemical issues facing humanity

**Workshop 3**

Due: **Week 9**
Weighting: **8%**

This Assessment Task relates to the following Learning Outcomes:

- Identify issues facing humanity that are caused by chemicals or have have their solution in chemistry
- Identify chemical issues facing humanity

**Workshop 4**

Due: **Week 11**
Weighting: **8%**

This Assessment Task relates to the following Learning Outcomes:

- Identify issues facing humanity that are caused by chemicals or have have their solution
in chemistry
  • Understand the role of chemistry as the source and solution of environmental issues
  • Identify chemical issues facing humanity

Workshop 5
Due: **Week 13**
Weighting: 8%

test

This Assessment Task relates to the following Learning Outcomes:
  • Identify issues facing humanity that are caused by chemicals or have have their solution in chemistry
  • Understand how chemists approach scientific and seek to solve chemical questions
  • Identify chemical issues facing humanity

Essay 1
Due: **Week 5**
Weighting: 20%

*Pick either a Book Chapter*  
*or a Chemical Industry and write an essay*

This Assessment Task relates to the following Learning Outcomes:
  • Be able to discuss important issues that have a chemical basis from a rational perspective
  • Understand the role of chemistry in industry
  • Identify chemical issues facing humanity

Essay 2
Due: **Week 8**
Weighting: 20%

*Write a Poem! On Chemistry, chemical philosophy or the lectures so far*  
*or*  
*Write a critical Essay on the philosophy of Science if it had been written by chemists*

This Assessment Task relates to the following Learning Outcomes:
  • Be able to critically evaluate non-specialist literature (e.g. Newspapers) that discuss chemical and biochemical issues
Essay 3
Due: **Week 12**
Weighting: **20%**

The life and works of a famous chemist of Nobel laureate
or

The ethical, political and social responsibility of chemists

This Assessment Task relates to the following Learning Outcomes:

- Understand how chemists approach scientific and seek to solve chemical questions

### Delivery and Resources

- iLearn
- library
- internet

### Unit Schedule

<table>
<thead>
<tr>
<th>Week # commencing</th>
<th>e-lecture Office hours: Tuesday 1–2</th>
<th>e-lecture Office hours: Friday 10–11</th>
<th>Assignment / activities scheduled this week</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 ...29 Jul</td>
<td>Read Unit Guide and familiarise yourself with the iLearn resources</td>
<td>Read Unit Guide and familiarise yourself with the iLearn resources</td>
<td></td>
</tr>
<tr>
<td>1 ...4 Aug</td>
<td><strong>LIVE LECTURE L0</strong> Introductory Remarks and navigating this unit 1 PM # LECTURE IN W5AT2#</td>
<td><strong>L1</strong>: Chemistry through the Ages BO  <strong>L2</strong>: Elements of Chemistry BO</td>
<td>Familiarisation with unit notes, Library services, e-resources, …;</td>
</tr>
<tr>
<td>2 ...11 Aug</td>
<td><strong>L3</strong>: Aluminium from Ore to Oven BO plus Preview of <strong>L4, L5 &amp; E1</strong></td>
<td><strong>L4</strong>: Bridges for Civilisation BO</td>
<td>Prepare for Workshop W1</td>
</tr>
<tr>
<td>3 ...18 Aug</td>
<td><strong>L5</strong>: Chemistry – Creative, Useful BO and Central</td>
<td><strong>L6</strong>: Health, Life &amp; Natural Products PK – Shipworm to Carbolic Acid … <em>W1 is due at 9 am Friday</em></td>
<td><strong>W1 Pick a Pair of Elements</strong> Prepare for Workshop W1 and Essay E1</td>
</tr>
<tr>
<td>4 ...25 Aug</td>
<td><strong>L7</strong>: Health, Life &amp; Natural Products PK – Salvarsan to Penicillin;</td>
<td><strong>L8</strong>: Health, Life &amp; Natural Products - PK What Do Molecules Look Like?</td>
<td>Prepare for Essay E1</td>
</tr>

### Policies and Procedures

Macquarie University policies and procedures are accessible from [Policy Central](https://unitguides.mq.edu.au/unit_offerings/6652/unit_guide/print).
Students should be aware of the following policies in particular with regard to Learning and Teaching:

Academic Honesty Policy  http://mq.edu.au/policy/docs/academic_honesty/policy.html
Disruption to Studies Policy  http://www.mq.edu.au/policy/docs/disruption_studies/policy.html  The Disruption to Studies Policy is effective from March 3 2014 and replaces the Special Consideration Policy.

In addition, a number of other policies can be found in the Learning and Teaching Category of Policy Central.

Student Code of Conduct

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct:  https://students.mq.edu.au/support/student_conduct/

Student Support

Macquarie University provides a range of support services for students. For details, visit  http://students.mq.edu.au/support/

Learning Skills

Learning Skills (mq.edu.au/learningskills) provides academic writing resources and study strategies to improve your marks and take control of your study.

- Workshops
- StudyWise
- Academic Integrity Module for Students
- Ask a Learning Adviser

Student Enquiry Service

For all student enquiries, visit Student Connect at ask.mq.edu.au

Equity Support

Students with a disability are encouraged to contact the Disability Service who can provide appropriate help with any issues that arise during their studies.
IT Help
For help with University computer systems and technology, visit http://informatics.mq.edu.au/help.

When using the University’s IT, you must adhere to the Acceptable Use Policy. The policy applies to all who connect to the MQ network including students.

Graduate Capabilities

Discipline Specific Knowledge and Skills

Our graduates will take with them the intellectual development, depth and breadth of knowledge, scholarly understanding, and specific subject content in their chosen fields to make them competent and confident in their subject or profession. They will be able to demonstrate, where relevant, professional technical competence and meet professional standards. They will be able to articulate the structure of knowledge of their discipline, be able to adapt discipline-specific knowledge to novel situations, and be able to contribute from their discipline to inter-disciplinary solutions to problems.

This graduate capability is supported by:

Learning outcomes

• Be able to discuss important issues that have a chemical basis from a rational perspective
• Understand the role of chemistry and the molecular sciences in drug discovery and medicine

Assessment tasks

• Workshop 2
• Essay 1

Problem Solving and Research Capability

Our graduates should be capable of researching; of analysing, and interpreting and assessing data and information in various forms; of drawing connections across fields of knowledge; and they should be able to relate their knowledge to complex situations at work or in the world, in order to diagnose and solve problems. We want them to have the confidence to take the initiative in doing so, within an awareness of their own limitations.

This graduate capability is supported by:

Learning outcome

• Understand how chemists approach scientific and seek to solve chemical questions
Assessment tasks

• Workshop 5
• Essay 2
• Essay 3

Socially and Environmentally Active and Responsible

We want our graduates to be aware of and have respect for self and others; to be able to work with others as a leader and a team player; to have a sense of connectedness with others and country; and to have a sense of mutual obligation. Our graduates should be informed and active participants in moving society towards sustainability.

This graduate capability is supported by:

Learning outcomes

• Identify issues facing humanity that are caused by chemicals or have have their solution in chemistry
• Be able to discuss important issues that have a chemical basis from a rational perspective
• Be able to critically evaluate non-specialist literature (e.g. Newspapers) that discuss chemical and biochemical issues
• Understand the role of chemistry as the source and solution of environmental issues
• Understand the role of chemistry in industry
• Identify chemical issues facing humanity

Assessment tasks

• workshop 1
• Workshop 2
• Workshop 3
• Workshop 4
• Workshop 5
• Essay 1
• Essay 2

Critical, Analytical and Integrative Thinking

We want our graduates to be capable of reasoning, questioning and analysing, and to integrate and synthesise learning and knowledge from a range of sources and environments; to be able to critique constraints, assumptions and limitations; to be able to think independently and systemically in relation to scholarly activity, in the workplace, and in the world. We want them to have a level of scientific and information technology literacy.
This graduate capability is supported by:

**Learning outcomes**

- Identify issues facing humanity that are caused by chemicals or have have their solution in chemistry
- Be able to discuss important issues that have a chemical basis from a rational perspective
- Be able to critically evaluate non-specialist literature (e.g. Newspapers) that discuss chemical and biochemical issues
- Understand the role of chemistry as the source and solution of environmental issues

**Assessment tasks**

- workshop 1
- Workshop 2
- Workshop 3
- Workshop 4
- Workshop 5
- Essay 1
- Essay 2

**Creative and Innovative**

Our graduates will also be capable of creative thinking and of creating knowledge. They will be imaginative and open to experience and capable of innovation at work and in the community. We want them to be engaged in applying their critical, creative thinking.

This graduate capability is supported by:

**Learning outcomes**

- Understand the role of chemistry and the molecular sciences in drug discovery and medicine
- Understand how chemists approach scientific and seek to solve chemical questions

**Assessment tasks**

- Workshop 2
- Workshop 5
- Essay 2
- Essay 3

**Effective Communication**

We want to develop in our students the ability to communicate and convey their views in forms
effective with different audiences. We want our graduates to take with them the capability to read, listen, question, gather and evaluate information resources in a variety of formats, assess, write clearly, speak effectively, and to use visual communication and communication technologies as appropriate.

This graduate capability is supported by:

**Learning outcomes**

- Identify issues facing humanity that are caused by chemicals or have have their solution in chemistry
- Be able to discuss important issues that have a chemical basis from a rational perspective
- Understand the role of chemistry in industry

**Assessment tasks**

- workshop 1
- Workshop 2
- Workshop 3
- Workshop 4
- Workshop 5
- Essay 1

**Engaged and Ethical Local and Global citizens**

As local citizens our graduates will be aware of indigenous perspectives and of the nation's historical context. They will be engaged with the challenges of contemporary society and with knowledge and ideas. We want our graduates to have respect for diversity, to be open-minded, sensitive to others and inclusive, and to be open to other cultures and perspectives: they should have a level of cultural literacy. Our graduates should be aware of disadvantage and social justice, and be willing to participate to help create a wiser and better society.

This graduate capability is supported by:

**Learning outcomes**

- Identify issues facing humanity that are caused by chemicals or have have their solution in chemistry
- Be able to discuss important issues that have a chemical basis from a rational perspective
- Be able to critically evaluate non-specialist literature (e.g. Newspapers) that discuss chemical and biochemical issues
- Understand the role of chemistry as the source and solution of environmental issues
- Understand the role of chemistry in industry
• Identify chemical issues facing humanity

**Assessment tasks**

• workshop 1
• Workshop 2
• Workshop 3
• Workshop 4
• Workshop 5
• Essay 1
• Essay 2

**Capable of Professional and Personal Judgement and Initiative**

We want our graduates to have emotional intelligence and sound interpersonal skills and to demonstrate discernment and common sense in their professional and personal judgement. They will exercise initiative as needed. They will be capable of risk assessment, and be able to handle ambiguity and complexity, enabling them to be adaptable in diverse and changing environments.

This graduate capability is supported by:

**Learning outcomes**

• Be able to critically evaluate non-specialist literature (e.g. Newspapers) that discuss chemical and biochemical issues
• Identify chemical issues facing humanity

**Assessment tasks**

• workshop 1
• Workshop 2
• Workshop 3
• Workshop 4
• Workshop 5
• Essay 1
• Essay 2

**Changes from Previous Offering**

Lectures start in week 1 instead of week 2 and Essay 3 is due in week 13 instead of week 14.
