Unit description
This unit aims to provide students with a knowledge and understanding of the principles and techniques underlying theory and practice in corporate finance. Topics include: - basic financial mathematics: interest rates, present values, future values, annuities, perpetuities; - valuation and analysis of debt and equity securities; - methods for investment evaluation and capital budgeting: NPV, IRR, PP; - financial markets and raising finance by issuing new securities; - risk and return, and the cost of capital; - capital structure and dividend policy; - derivative securities: forward, futures and option contracts, and applications to corporate finance; - corporate liabilities and international finance; and - introduction to risk management.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at https://www.mq.edu.au/study/calendar-of-dates

Learning Outcomes
On successful completion of this unit, you will be able to:

- to be able to demonstrate knowledge and understanding of the principles and techniques underlying theory and practice in Corporate Finance and Capital Markets
- develop expertise in using excel spreadsheet software to build the financial models and perform the calculations for security valuation and corporate decision making
demonstrate awareness of different financial instruments and their valuation and usefulness in a Corporate Finance context
be able to explain the concepts covered in the course in a clear and concise manner and be able to communicate it to others effectively

General Assessment Information

It is the responsibility of students to view their marks for each within session assessment on iLearn within 20 working days of posting. If there are any discrepancies, students must contact the unit convenor immediately. Failure to do so will mean that queries received after the release of final results regarding assessment tasks (not including the final exam mark) will not be addressed.

Assessment Tasks

<table>
<thead>
<tr>
<th>Name</th>

<td>40%</td>
<td>University Examination Period</td>
</tr>
</tbody>
</table>

Assessed coursework
Due: **Week 3, 5, 6, 9**
Weighting: **20%**

There are 4 tasks, worth 5% each. These are individual, not group assignments.

Task 1, 2 and 4 are due during weeks 3, 5 and 9 respectively, the exact dates to be advised.

Task 3 will be an online quiz held during week 6. The details will be announced on iLearn.

Submission for Task 1, 2, and 4.

The submissions for task 1, 2 and 4 should be typed into word and converted to pdf, or an excel spreadsheet file created, or both. The tasks are to be submitted electronically via iLearn. The due dates may change. We will advise students of any such changes to the due dates. The details of how to submit your work and the exact date and time will be announced on iLearn at the time the details of the assignment are made available. Students will have at least one week to complete these tasks.

Extension

No extensions will be granted for tasks 1, 2, and 4. Late tasks will be accepted up to 72 hours after the submission deadline. There will be a deduction of 10% of the total available marks
made from the total awarded mark for each 24 hour period or part thereof that the submission is late (for example, 25 hours late in submission – 20% penalty). This penalty does not apply for cases in which an application for special consideration is made and approved.

For task 3 students who have not sat the online quiz will be awarded a mark of 0 for the task except for cases in which an application for special consideration is made and approved.

On successful completion you will be able to:
- develop expertise in using excel spreadsheet software to build the financial models and perform the calculations for security valuation and corporate decision making
- demonstrate awareness of different financial instruments and their valuation and usefulness in a Corporate Finance context

Class test
Due: Week 8
Weighting: 20%

The test will be an openbook online test conducted on campus during week 8. The date, time and location of the test will be announced on iLearn.

Extension

No extensions will be granted. Students who have not sat the exam / test will be awarded a mark of 0 for the task, except for cases in which an application for special consideration is made and approved

On successful completion you will be able to:
- to be able to demonstrate knowledge and understanding of the principles and techniques underlying theory and practice in Corporate Finance and Capital Markets
- demonstrate awareness of different financial instruments and their valuation and usefulness in a Corporate Finance context
- be able to explain the concepts covered in the course in a clear and concise manner and be able to communicate it to others effectively

Assignment
Due: Week 10
Weighting: 20%

Assignment: Due week 10

The exact date for release and submission of the assignment will be announced on iLearn during the semester. The due date may change from the above. If so we will advise students of the changes.
This is an individual assignment, not group work.

Submission:

Essay type responses to be submitted online via iLearn / turnitin. Excel spreadsheet solutions to be submitted electronically via iLearn.

Extension

No extensions will be granted. Late tasks will be accepted up to 72 hours after the submission deadline. There will be a deduction of 10% of the total available marks made from the total awarded mark for each 24 hour period or part thereof that the submission is late (for example, 25 hours late in submission – 20% penalty). This penalty does not apply for cases in which an application for special consideration is made and approved.

On successful completion you will be able to:

• to be able to demonstrate knowledge and understanding of the principles and techniques underlying theory and practice in Corporate Finance and Capital Markets
• develop expertise in using excel spreadsheet software to build the financial models and perform the calculations for security valuation and corporate decision making
• demonstrate awareness of different financial instruments and their valuation and usefulness in a Corporate Finance context
• be able to explain the concepts covered in the course in a clear and concise manner and be able to communicate it to others effectively

Final exam

Due: University Examination Period
Weighting: 40%

This will be a 3 hour invigilated open book online exam conducted on campus. The date, time and location of the exam will be advised on iLearn.

Extension

No extensions will be granted. Students who have not sat the exam / test will be awarded a mark of 0 for the task, except for cases in which an application for special consideration is made and approved.

On successful completion you will be able to:

• to be able to demonstrate knowledge and understanding of the principles and techniques underlying theory and practice in Corporate Finance and Capital Markets
• demonstrate awareness of different financial instruments and their valuation and usefulness in a Corporate Finance context
• be able to explain the concepts covered in the course in a clear and concise manner and
be able to communicate it to others effectively

Delivery and Resources

Classes

For campus students:

A 3-hour combined lecture / tutorial / computer lab session will be held each week. Normally the lecture part takes up the first 1.5 - 2.0 hours and the tutorial / lab session the last 1.0 - 1.5 hours.

All lecture content and tutorial exercises and solutions will be available on iLearn.

For distance students:

All lecture content and tutorial exercises and solutions will be available on iLearn. This will be available in pdf form and mp4 files.

The timetable for classes can be found on the University web site at: http://www.timetables.mq.edu.au/

There are no prizes for this unit.

Required and Recommended Texts and/or Materials

Textbooks:

The textbook for this unit is "Fundamentals of Corporate Finance" by Parrino et al (ISBN 9780730305422). An electronic version of the book is available from Wiley Direct and is cheaper than the paper version. This book covers most but not all of the topics in the unit. The lecture notes will also cover what you need to know. Additional readings may be assigned for the various topics each week. This will either be journal articles, or other materials available on the web or available electronically e.g. via the Macquarie University Library.

Reference Books:

Beninga Principles of Finance with Excel, Oxford (ISBN 978 0 19 975547 9) This book may be used to by students to learn about using excel for the various financial calculations involved in the course, during the tutorial / computer lab sessions.

Hull, Options, Futures and Other Derivatives 8th Edition, Prentice Hall

Technology Used and Required

Students will require access to the internet to download lecture slides and tutorial solutions.
The assignment and most tutorial exercises will require the use of word processing and/or spreadsheet programs.

In most weeks we will be using excel spreadsheets for the various financial calculations needed. Our classes are held in a computer laboratory and all students will have access to a computer with the required software installed on it.

Students will be instructed in how to use excel for the purposes of the unit.

Students may wish to bring a headset to class so they can view and listen to the mp4 video files of lectures / tutorials / excel demonstrations.

### Unit Web Page

Course material is available on the learning management system (iLearn)

Important information:

1) Timetable for lectures is available at: [https://timetables.mq.edu.au/2016/](https://timetables.mq.edu.au/2016/)

Note that Monday 28 March 2016 and Monday 25 April 2016 are Public Holidays.
| Week 3 | Valuation of multi-payment cashflows  
annuities & perpetuities  
Present value and future value  
Sinking funds  
Loans, leases, amortizing loans  
Nominal and effective interest rates  
Spreadsheet implementation of financial calculations | lecture notes,  
& text Ch 6 |
|---|---|
| Week 4 | Valuation of shares and fixed income bonds  
Bond terminology, Yield to maturity  
RBA bond valuation formula  
Solving for the bonds price, coupon rate, or yield  
Dividend discount model for share valuation  
Gordon growth model  
Share valuation using multiples  
Net Asset Valuation  
Spreadsheet implementation of financial calculations | lecture notes  
& text ch 8, 9 |
| Week 5 | Public Holiday - online lecture  
Capital Budgeting – project evaluation methods  
Weighted Average Cost of Capital  
Internal rate of return,  
net present value,  
payback period  
Definition and measurement of cashflow  
Sensitivity analysis and breakeven analysis  
Excel implementation of calculations | lecture notes  
text ch 10, 11, 13 |
| Week 6 | The term structure of interest rates and corporate bond valuation  
Zero Coupon Bonds  
The relationship between zero coupon bonds and normal coupon bearing bonds & the law of one price  
The bootstrap method  
Spot and forward yield curves  
Applications of zero coupon bond pricing  
Corporate Debt Finance  
Valuing corporate bonds | lecture notes  
text ch 8 |
| Week 7 | Public Holiday  
Students to do Revision |
|--------|------------------|
| Week 8 | Raising new capital – Debt & Equity  
IPO  
SEO  
Placement  
Rights Issue  
Dividend Reinvestment Plan  
Issuance Costs  
Mid semester test |
|        | lecture notes, text ch 15 |
| Week 9 | Randomness, probability and statistical concepts:  
What is randomness  
The structure of randomness - probability distributions:  
Bernoulli, binomial, uniform and normal distributions  
Expected value, variance, standard deviation,  
Correlation, covariance, linear regression and forecasting  
Measurement of risk  
Results for portfolios |
|        | lecture notes |
| Week 10 | Tradeoff between risk and return  
Random walks, market efficiency  
law of one price,  
implications for investment and finance  
measurement of risk and return,  
estimation of risk and return.  
Risk and return for portfolios  
the capital asset pricing model and the security market line  
Spreadsheet implementation of methods used. |
|        | lecture notes  
text ch 7 |
Learning and Teaching Activities

Lectures and Tutorials

The unit is taught via lectures, tutorial exercises and the use of spreadsheet software for implementing models and calculations for the purpose of financial decision making. Each lecture is self-contained and structured according to the summary provided in the Unit Schedule section. Students are expected to read the relevant chapters prior to the lecture, so that they are familiar with the material to be covered. This will greatly enhance your learning experience. Dealing with advanced material in our subject area requires a range of generic skills. This unit aims at developing such skills. The lectures and in particular the assignments and tutorial exercises are tailored to enhance critical analysis, problem-solving and creative thinking, comprehension, computing and writing skills. You should take the time to work on the problem sets, since they will tend to be similar in nature to the problems you see on the test and exam. Solutions will be provided for the assigned selected questions. We cover many examples of financial valuation and decision making problems and how to solve these using spreadsheets. Our approach is one of learning by example and by practicing using excel to solve financial decision making problems.
Policies and Procedures

Macquarie University policies and procedures are accessible from Policy Central. Students should be aware of the following policies in particular with regard to Learning and Teaching:

Academic Honesty Policy  http://mq.edu.au/policy/docs/academic_honesty/policy.html

Disruption to Studies Policy  http://www.mq.edu.au/policy/docs/disruption_studies/policy.html The Disruption to Studies Policy is effective from March 3 2014 and replaces the Special Consideration Policy.

In addition, a number of other policies can be found in the Learning and Teaching Category of Policy Central.

Student Code of Conduct

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct:  https://students.mq.edu.au/support/student_conduct/

Results

Results shown in iLearn, or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in eStudent. For more information visit ask.mq.edu.au.

Supplementary Exams

Further information regarding supplementary exams, including dates, is available here

http://www.businessandeconomics.mq.edu.au/current_students/undergraduate/how_do_i/special_consideration

Student Support

Macquarie University provides a range of support services for students. For details, visit  http://students.mq.edu.au/support/
Learning Skills

Learning Skills (mq.edu.au/learningskills) provides academic writing resources and study strategies to improve your marks and take control of your study.

- Workshops
- StudyWise
- Academic Integrity Module for Students
- Ask a Learning Adviser

Student Services and Support

Students with a disability are encouraged to contact the Disability Service who can provide appropriate help with any issues that arise during their studies.

Student Enquiries

For all student enquiries, visit Student Connect at ask.mq.edu.au

IT Help

For help with University computer systems and technology, visit http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/.

When using the University's IT, you must adhere to the Acceptable Use of IT Resources Policy. The policy applies to all who connect to the MQ network including students.

Graduate Capabilities

Discipline Specific Knowledge and Skills

Our graduates will take with them the intellectual development, depth and breadth of knowledge, scholarly understanding, and specific subject content in their chosen fields to make them competent and confident in their subject or profession. They will be able to demonstrate, where relevant, professional technical competence and meet professional standards. They will be able to articulate the structure of knowledge of their discipline, be able to adapt discipline-specific knowledge to novel situations, and be able to contribute from their discipline to inter-disciplinary solutions to problems.

This graduate capability is supported by:

Learning outcomes

- to be able to demonstrate knowledge and understanding of the principles and techniques underlying theory and practice in Corporate Finance and Capital Markets
- develop expertise in using excel spreadsheet software to build the financial models and perform the calculations for security valuation and corporate decision making
- demonstrate awareness of different financial instruments and their valuation and
usefulness in a Corporate Finance context
• be able to explain the concepts covered in the course in a clear and concise manner and be able to communicate it to others effectively

Assessment tasks
• Assessed coursework
• Class test
• Assignment
• Final exam

Critical, Analytical and Integrative Thinking
We want our graduates to be capable of reasoning, questioning and analysing, and to integrate and synthesise learning and knowledge from a range of sources and environments; to be able to critique constraints, assumptions and limitations; to be able to think independently and systemically in relation to scholarly activity, in the workplace, and in the world. We want them to have a level of scientific and information technology literacy.

This graduate capability is supported by:

Learning outcomes
• to be able to demonstrate knowledge and understanding of the principles and techniques underlying theory and practice in Corporate Finance and Capital Markets
• develop expertise in using excel spreadsheet software to build the financial models and perform the calculations for security valuation and corporate decision making
• demonstrate awareness of different financial instruments and their valuation and usefulness in a Corporate Finance context
• be able to explain the concepts covered in the course in a clear and concise manner and be able to communicate it to others effectively

Assessment tasks
• Assessed coursework
• Class test
• Assignment
• Final exam

Effective Communication
We want to develop in our students the ability to communicate and convey their views in forms effective with different audiences. We want our graduates to take with them the capability to read, listen, question, gather and evaluate information resources in a variety of formats, assess, write clearly, speak effectively, and to use visual communication and communication
technologies as appropriate.

This graduate capability is supported by:

**Learning outcomes**

- to be able to demonstrate knowledge and understanding of the principles and techniques underlying theory and practice in Corporate Finance and Capital Markets
- develop expertise in using excel spreadsheet software to build the financial models and perform the calculations for security valuation and corporate decision making
- demonstrate awareness of different financial instruments and their valuation and usefulness in a Corporate Finance context
- be able to explain the concepts covered in the course in a clear and concise manner and be able to communicate it to others effectively

**Assessment tasks**

- Assessed coursework
- Class test
- Assignment

**Changes from Previous Offering**

There are some changes to the assessment structure. The content of the course is essentially unchanged.

**Research and Practice**

This unit gives you practice in applying research findings in your assignments

This unit gives you opportunities to conduct your own research
