Unit description
This unit develops knowledge and understanding of the international business environment and business operations in foreign markets through first-hand observation of businesses in a foreign country. Students are expected to develop and demonstrate knowledge about the foreign markets involved, and at the same time, apply knowledge gained in their disciplinary areas in the context of the foreign markets. The unit includes a series of seminars and a two week study tour to one or two overseas countries, and enables students to develop an appreciation of the ways in which business operations and business systems differ across national boundaries. Students are required to prepare a written assignment based on the seminars and prepare a report at the end of the tour based on their observations of the businesses and the country.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at https://www.mq.edu.au/study/calendar-of-dates

Learning Outcomes
On successful completion of this unit, you will be able to:

- Recognize and understand key concepts and theories discussed in the literature of doing business in China
- Gain practical knowledge and experience on conducting academic research to analyse
real-world cases
Demonstrate the ability to identify, discuss and analyse market trends and problems related to emerging markets
Apply the above knowledge and skills to develop effective strategies and solutions

Assessment Tasks

</thead>
<tbody>
<tr>
<td>Report</td>
<td>40%</td>
<td>W5, 10</td>
</tr>
<tr>
<td>Presentation</td>
<td>30%</td>
<td>W11</td>
</tr>
<tr>
<td>Class Participation</td>
<td>30%</td>
<td>N/A</td>
</tr>
</tbody>
</table>

Report

Due: **W5, 10**
Weighting: **40%**

This task includes a 1,500-word individual pre-trip report based on the materials covered in the seminar series (15%) and a 2,000-word individual field-trip report submitted after the trip (25%).

Late submission will be subject to the penalty of 10% discount from the original mark for every 24-hour delay, unless special consideration is applied for and approved.

On successful completion you will be able to:
- Recognize and understand key concepts and theories discussed in the literature of doing business in China
- Gain practical knowledge and experience on conducting academic research to analyse real-world cases
- Demonstrate the ability to identify, discuss and analyse market trends and problems related to emerging markets
- Apply the above knowledge and skills to develop effective strategies and solutions

Presentation

Due: **W11**
Weighting: **30%**

Three students are to be formed as one group. Students in one group are required to develop different yet connected topics for their individual reports, based on their learning throughout the field trip in China. These topics should be combined into a coherent and well-structured group presentation.
On successful completion you will be able to:

- Gain practical knowledge and experience on conducting academic research to analyse real-world cases
- Demonstrate the ability to identify, discuss and analyse market trends and problems related to emerging markets
- Apply the above knowledge and skills to develop effective strategies and solutions

Class Participation

Due: N/A
Weighting: 30%

This component includes attendance to pre-trip seminars (5%) and active participation throughout the field trip in China (25%). Students are supposed to have regular attendance to all pre-trip seminars and activities during the field trip, as well as to actively participate in class discussions and activities during the field trip. They are expected to make positive contribution to the group learning experiences.

On successful completion you will be able to:

- Recognize and understand key concepts and theories discussed in the literature of doing business in China
- Gain practical knowledge and experience on conducting academic research to analyse real-world cases

Delivery and Resources

Delivery

Classes in this unit will include two main components: a seminar series in the first half of the semester and a two-week field trip to China during the mid-semester break from 20th Sept. to 23rd Oct. There will be no lectures after the field trip except for a student presentation session in Week 10.

During the first half of the semester (before the field trip), a 3-hour class will be held each week. The first 1.5 hours will mainly be seminar presentations from teaching staff and the second 1.5 hours will be used for group/class discussion, and on some occasions, making logistic arrangement for the field trip. In some weeks, seminar presentations and class discussion could be carried out at the same time.

The field trip to China will involve intensive daily activities, including visiting a number of businesses and organisations, interacting with relevant personnel, participating in organised activities in some companies, making observations of business settings and market places, reading literature and information on China and relevant companies/organisations, and preparing for case studies of a company, organisation or a sector. Students’ full participation in all
scheduled activities is expected.

There will be no lecture in the weeks after the field trip. It is expected that students will spend a substantial amount of time during these weeks to prepare their group projects, which is one of the key assessment components. A presentation session is scheduled in Week 10. Students will make group presentations based on their group projects. It is expected that each group presentation will take 25-30 minutes.

**Timetable**

The timetable for classes can be found on the University website at: [http://www.timetables.mq.edu.au/](http://www.timetables.mq.edu.au/)

**Resources**

There is no prescribed textbook for this unit. A list of recommended readings will be given for each topic in the seminar series. Students are encouraged to read widely in the areas of China’s economic reforms, social and economic conditions and business practices that are available in a wide range of academic journals and books.

Students may access unit materials online through the Macquarie University online learning facility iLearn at [http://www.ilearn.mq.edu.au](http://www.ilearn.mq.edu.au) using your Student ID Number and password. This page supports the lecture notes, unit outline, assessment tasks, recommended reading lists, and any other information that is deemed relevant to the unit.

Students who experience technical problems accessing this page should contact IT officers or BESS immediately.

**Technology used**

Students would need to have full access to internet to download course materials and complete their assignment.

Our graduates will take with them the intellectual development, depth and breadth of knowledge, scholarly understanding, and specific subject content in their chosen fields to make them competent and confident in their subject or profession. They will be able to demonstrate, where relevant, professional technical competence and meet professional standards. They will be able to articulate the structure of knowledge of their discipline, be able to adapt discipline-specific
knowledge to novel situations, and be able to contribute from their discipline to inter-disciplinary solutions to problems.

This graduate capability is supported by:

**Learning outcome**

- Recognize and understand key concepts and theories discussed in the literature of doing business in China

**Assessment tasks**

- Report
- Class Participation

**Critical, Analytical and Integrative Thinking**

We want our graduates to be capable of reasoning, questioning and analysing, and to integrate and synthesise learning and knowledge from a range of sources and environments; to be able to critique constraints, assumptions and limitations; to be able to think independently and systemically in relation to scholarly activity, in the workplace, and in the world. We want them to have a level of scientific and information technology literacy.

This graduate capability is supported by:

**Learning outcomes**

- Gain practical knowledge and experience on conducting academic research to analyse real-world cases
- Demonstrate the ability to identify, discuss and analyse market trends and problems related to emerging markets

**Assessment tasks**

- Report
- Presentation

**Problem Solving and Research Capability**

Our graduates should be capable of researching; of analysing, and interpreting and assessing data and information in various forms; of drawing connections across fields of knowledge; and they should be able to relate their knowledge to complex situations at work or in the world, in order to diagnose and solve problems. We want them to have the confidence to take the initiative in doing so, within an awareness of their own limitations.

This graduate capability is supported by:

**Learning outcomes**

- Demonstrate the ability to identify, discuss and analyse market trends and problems
related to emerging markets
  • Apply the above knowledge and skills to develop effective strategies and solutions

Assessment tasks
  • Report
  • Presentation
