Unit description
This unit provides students with a basic understanding of the content of information systems; the types of information systems; the current roles of information systems in organisations; and the opportunities and business impacts of information systems. The unit also provides an overview of the tools, techniques and frameworks used to build information systems; the range of information technologies used to support information systems; and the ethical responsibilities of both the information system professional and the private user of information. Every business has an information system. These systems are a fundamental component of the business and provide the business with the information its people need to operate and manage the business. This unit lays a foundation for students to use information systems in the context of accounting, marketing, and finance, or develop business information systems that organisations want and need.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at [https://students.mq.edu.au/important-dates](https://students.mq.edu.au/important-dates)

Learning Outcomes
- An introductory understanding of a range of important and/or current IT issues
- An understanding of the core principles and components of the Information Systems discipline
- A recognition of how information systems can be used to improve business performance
- A competence with basic information technology applications, including basic computer management, e-mail, web browsers, web-page creators and productivity software
- An understanding of how such applications work, to a level where students can learn new material without requiring formal training
- An exposure to a 4th-generation programming environment

General Assessment Information

Late submission
Late work for the quizzes and assignments will not be accepted. If you cannot submit on time because of illness or other circumstances, please contact the lecturer as soon as possible so that appropriate measures can be taken.

<td>20%</td>
<td>No</td>
<td>Week 6 and 11</td>
</tr>
</tbody>
</table>

https://unitguides.mq.edu.au/unit_offerings/72908/unit_guide/print
**Assignments**

**Due:** **Week 6 and 11**

**Weighting:** **20%**

There are two assignments in the practical workshops for ISYS104, which cover:

**Excel (Spreadsheets) and Access (Databases).**

The 2 assignments will be graded (in your practical class) with each worth 10%. You cannot get the assignment marked in any other class than your scheduled practical class. The total assignment mark for ISYS104 is out of 20%.

<table>
<thead>
<tr>
<th>Week</th>
<th>Assignment</th>

</thead>
<tbody>
<tr>
<td>6</td>
<td>Advanced Spreadsheets</td>
<td>10%</td>
</tr>
<tr>
<td>11</td>
<td>Advanced Databases</td>
<td>10%</td>
</tr>
</tbody>
</table>

**Total out of 20% (of final grade)**

**NB. All details of each assignment will be available via iLearn.**

You are encouraged to:

- set your personal deadline earlier than the actual one;
- keep backups of all your important files;
- ensure that no-one else picks up your printouts.

On successful completion you will be able to:

- An introductory understanding of a range of important and/or current IT issues
- A recognition of how information systems can be used to improve business performance
- A competence with basic information technology applications, including basic computer management, e-mail, web browsers, web-page creators and productivity software
- An understanding of how such applications work, to a level where students can learn new material without requiring formal training
- An exposure to a 4th-generation programming environment
Quiz

Due: **Varies: Wk 5 & 8 & 11**
Weighting: **30%**

**Quizzes**

In weeks 5, 8 and 11 there will be a short quiz in the workshops. The quizzes are worth 10% each towards the final grade. These quizzes will cover important parts of the unit material and, as well as assessing your current level of mastery of it, give you and your tutor an opportunity to address any problem areas before the final exam paper. The quizzes will normally not take the whole class and will be followed by in-class problems. Please be on time to these classes, as the quiz will be the first thing in the class.

On successful completion you will be able to:

- An introductory understanding of a range of important and/or current IT issues
- An understanding of the core principles and components of the Information Systems discipline
- A recognition of how information systems can be used to improve business performance
- A competence with basic information technology applications, including basic computer management, e-mail, web browsers, web-page creators and productivity software
- An understanding of how such applications work, to a level where students can learn new material without requiring formal training

Final Exam

Due: **TBA**
Weighting: **50%**

Regarding the examination process, note that

1. you are expected to present yourself for examination at the time and place designated in the [University Examination Timetable](https://unitguides.mq.edu.au/unit_offerings/72908/unit_guide/print)
2. the timetable will be available in Draft form approximately eight weeks before the commencement of the examinations and in Final form approximately four weeks before the commencement of examinations
3. no early examinations for individuals or groups of students will be set. All students are expected to ensure that they are available until the end of the teaching semester, that is the final day of the official examination period
4. the only exception to not sitting an examination at the designated time is because of documented illness or unavoidable disruption. In these circumstances you may wish to
consider applying for **Disruption of Studies**.

5. If you apply for Disruption to Study for your final examination, you must make yourself available for the week of July 24 – 28, 2017. If you are not available at that time, there is no guarantee an additional examination time will be offered. Specific examination dates and times will be determined at a later date.

On successful completion you will be able to:

- An introductory understanding of a range of important and/or current IT issues
- An understanding of the core principles and components of the Information Systems discipline
- A recognition of how information systems can be used to improve business performance
- A competence with basic information technology applications, including basic computer management, e-mail, web browsers, web-page creators and productivity software
- An understanding of how such applications work, to a level where students can learn new material without requiring formal training
- An exposure to a 4th-generation programming environment

## Delivery and Resources

### Teaching and Learning Strategy

ISYS104 is taught via lectures, workshop (tutorials and practicals) in the laboratory. The feedback that you receive plays also a crucial role in your learning.

Lectures are used to introduce new material, give examples of the advances in business information systems and technologies and put them in a wider context.

Workshops are small group classes which give you the opportunity to interact with your peers and with a tutor who has a sound knowledge of the subject. This also gives you a chance to practice your technical skills.

You have many opportunities to seek for and to receive feedback. During lectures, you are encouraged to ask the lecturer questions to clarify anything you might not be sure of. Assignments have been especially designed to deliver continuous feedback on your work.

Each week you should:

- Attend lectures, take notes, ask questions
- Attend your workshops and seek feedback from your tutor on your work
- Read assigned reading material, add to your notes and prepare questions for your lecturer or tutor
- Start working on any assignments immediately after they have been released.
Lecture notes are made available each week but these notes are intended as an outline of the lecture only and are not a substitute for your own notes or reading additional material.

**Classes**

Each week you should attend two hours of lectures, and a one hour workshop class.

**Note that workshops run for 12 weeks and commence in week 1. (Remember that in the summer each day we have class represents a traditional week in other sessions)**

Please note that you are required to submit a certain number of assignments. Failure to do so may result in you failing the unit.

**Textbook**

The textbook for ISYS104 used this semester is:

*Experiencing MIS 4ed by Kroenke*

(ISBN: 9781486019281)

**Technology used and required**

iLecture/echo

Digital recordings of lectures are available.

ISYS104 makes use of the following software in the lab:

- Microsoft Windows 8
- Microsoft Office 2013
- Internet Explorer and Mozilla Firefox

**Website**

The web page for this unit can be found at: [http://ilearn.mq.edu.au](http://ilearn.mq.edu.au).

**Discussion Boards**

The discussion board for this unit can be accessed through [http://ilearn.mq.edu.au](http://ilearn.mq.edu.au).

**Staff-Student Liaison Committee**

Being the summer session you will find that the Liaison meetings do not run in such a condensed period. If you have any issues to be addressed then you should consult the Director of Teaching (Dr. Steve Cassidy) or the Head of Department (Dr Christophe Doche). You are entitled to have your concerns raised, discussed and resolved.

**Student Support Services**

Macquarie University provides a range of Academic Student Support Services. Details of these services can accessed at [http://www.student.mq.edu.au](http://www.student.mq.edu.au).

**Assumed knowledge**

[https://unitguides.mq.edu.au/unit_offerings/72908/unit_guide/print](https://unitguides.mq.edu.au/unit_offerings/72908/unit_guide/print)
Policies and Procedures

Macquarie University policies and procedures are accessible from Policy Central. Students should be aware of the following policies in particular with regard to Learning and Teaching:

In addition, a number of other policies can be found in the Learning and Teaching Category of Policy Central.

Student Code of Conduct

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: [https://students.mq.edu.au/support/student_conduct/](https://students.mq.edu.au/support/student_conduct/)

Results

Results shown in iLearn, or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in eStudent. For more information visit [ask.mq.edu.au](http://ask.mq.edu.au).

Submission

Details for each assignment will be available via iLearn.

You are encouraged to:

- set your personal deadline earlier than the actual one;
- keep backups of all your important files;
- ensure that no-one else picks up your printouts.
Graduate Capabilities

Discipline Specific Knowledge and Skills

Our graduates will take with them the intellectual development, depth and breadth of knowledge, scholarly understanding, and specific subject content in their chosen fields to make them competent and confident in their subject or profession. They will be able to demonstrate, where relevant, professional technical competence and meet professional standards. They will be able to articulate the structure of knowledge of their discipline, be able to adapt discipline-specific knowledge to novel situations, and be able to contribute from their discipline to inter-disciplinary solutions to problems.
This graduate capability is supported by:

**Learning outcomes**

- An introductory understanding of a range of important and/or current IT issues
- An understanding of the core principles and components of the Information Systems discipline
- A recognition of how information systems can be used to improve business performance
- A competence with basic information technology applications, including basic computer management, e-mail, web browsers, web-page creators and productivity software
- An understanding of how such applications work, to a level where students can learn new material without requiring formal training

**Assessment tasks**

- Assignments
- Quiz
- Final Exam

**Problem Solving and Research Capability**

Our graduates should be capable of researching; of analysing, and interpreting and assessing data and information in various forms; of drawing connections across fields of knowledge; and they should be able to relate their knowledge to complex situations at work or in the world, in order to diagnose and solve problems. We want them to have the confidence to take the initiative in doing so, within an awareness of their own limitations.

This graduate capability is supported by:

**Learning outcomes**

- An introductory understanding of a range of important and/or current IT issues
- A recognition of how information systems can be used to improve business performance
- A competence with basic information technology applications, including basic computer management, e-mail, web browsers, web-page creators and productivity software
- An understanding of how such applications work, to a level where students can learn new material without requiring formal training
- An exposure to a 4th-generation programming environment

**Assessment tasks**

- Assignments
- Quiz
- Final Exam
Creative and Innovative

Our graduates will also be capable of creative thinking and of creating knowledge. They will be imaginative and open to experience and capable of innovation at work and in the community. We want them to be engaged in applying their critical, creative thinking.

This graduate capability is supported by:

**Learning outcomes**

- An understanding of the core principles and components of the Information Systems discipline
- A recognition of how information systems can be used to improve business performance
- A competence with basic information technology applications, including basic computer management, e-mail, web browsers, web-page creators and productivity software
- An understanding of how such applications work, to a level where students can learn new material without requiring formal training

**Assessment tasks**

- Assignments
- Quiz

Effective Communication

We want to develop in our students the ability to communicate and convey their views in forms effective with different audiences. We want our graduates to take with them the capability to read, listen, question, gather and evaluate information resources in a variety of formats, assess, write clearly, speak effectively, and to use visual communication and communication technologies as appropriate.

This graduate capability is supported by:

**Learning outcomes**

- An introductory understanding of a range of important and/or current IT issues
- An understanding of the core principles and components of the Information Systems discipline
- A recognition of how information systems can be used to improve business performance
- A competence with basic information technology applications, including basic computer management, e-mail, web browsers, web-page creators and productivity software

**Assessment tasks**

- Assignments
- Quiz
Engaged and Ethical Local and Global citizens

As local citizens our graduates will be aware of indigenous perspectives and of the nation's historical context. They will be engaged with the challenges of contemporary society and with knowledge and ideas. We want our graduates to have respect for diversity, to be open-minded, sensitive to others and inclusive, and to be open to other cultures and perspectives: they should have a level of cultural literacy. Our graduates should be aware of disadvantage and social justice, and be willing to participate to help create a wiser and better society.

This graduate capability is supported by:

**Learning outcomes**

- An introductory understanding of a range of important and/or current IT issues
- An understanding of the core principles and components of the Information Systems discipline
- A recognition of how information systems can be used to improve business performance

**Assessment tasks**

- Quiz
- Final Exam

Socially and Environmentally Active and Responsible

We want our graduates to be aware of and have respect for self and others; to be able to work with others as a leader and a team player; to have a sense of connectedness with others and country; and to have a sense of mutual obligation. Our graduates should be informed and active participants in moving society towards sustainability.

This graduate capability is supported by:

**Learning outcomes**

- An introductory understanding of a range of important and/or current IT issues
- An understanding of the core principles and components of the Information Systems discipline
- A recognition of how information systems can be used to improve business performance

**Assessment tasks**

- Assignments
- Quiz
- Final Exam
Capable of Professional and Personal Judgement and Initiative

We want our graduates to have emotional intelligence and sound interpersonal skills and to demonstrate discernment and common sense in their professional and personal judgement. They will exercise initiative as needed. They will be capable of risk assessment, and be able to handle ambiguity and complexity, enabling them to be adaptable in diverse and changing environments.

This graduate capability is supported by:

Learning outcomes

- An introductory understanding of a range of important and/or current IT issues
- An understanding of the core principles and components of the Information Systems discipline
- A recognition of how information systems can be used to improve business performance
- A competence with basic information technology applications, including basic computer management, e-mail, web browsers, web-page creators and productivity software
- An understanding of how such applications work, to a level where students can learn new material without requiring formal training

Assessment tasks

- Assignments
- Quiz
- Final Exam

Critical, Analytical and Integrative Thinking

We want our graduates to be capable of reasoning, questioning and analysing, and to integrate and synthesise learning and knowledge from a range of sources and environments; to be able to critique constraints, assumptions and limitations; to be able to think independently and systemically in relation to scholarly activity, in the workplace, and in the world. We want them to have a level of scientific and information technology literacy.

This graduate capability is supported by:

Learning outcomes

- An introductory understanding of a range of important and/or current IT issues
- An understanding of the core principles and components of the Information Systems discipline
- A recognition of how information systems can be used to improve business performance
- A competence with basic information technology applications, including basic computer management, e-mail, web browsers, web-page creators and productivity software
An understanding of how such applications work, to a level where students can learn new material without requiring formal training

**Assessment tasks**
- Assignments
- Quiz
- Final Exam

**Commitment to Continuous Learning**

Our graduates will have enquiring minds and a literate curiosity which will lead them to pursue knowledge for its own sake. They will continue to pursue learning in their careers and as they participate in the world. They will be capable of reflecting on their experiences and relationships with others and the environment, learning from them, and growing - personally, professionally and socially.

This graduate capability is supported by:

**Learning outcomes**
- An introductory understanding of a range of important and/or current IT issues
- An understanding of the core principles and components of the Information Systems discipline
- A recognition of how information systems can be used to improve business performance
- A competence with basic information technology applications, including basic computer management, e-mail, web browsers, web-page creators and productivity software
- An understanding of how such applications work, to a level where students can learn new material without requiring formal training

**Assessment tasks**
- Assignments
- Quiz
- Final Exam

**Changes from Previous Offering**

**What has changed from previous semesters?**

As with every semester we try to use the experiences from previous semesters to enhance the unit. The biggest change is the unit has removed the practical exam which was always considered to be difficult and challenging for a first year unit. The focus now is on making sure all students enjoy the unit.
Standards and Grading

Unlike many units, ISYS104 covers a wide range of areas, but at limited depth. Therefore it is not appropriate to identify core knowledge and assess the students' mastery of that at increasing levels of complexity. Instead, the assessment of learning outcomes is based in large part on the amount of knowledge the student gains across the range of the unit, as assessed by performance in the assignments, quizzes, practical exam and final examination.

</table>

Your final grade will depend on your performance in each part of the assessment of the unit. In particular, to obtain a grade of Pass (P) or higher in this unit you will need to obtain an overall mark of at least 50% (calculated according to the weightings given above).

Obtaining a higher grade than a Pass (P) in this unit will require a student to obtain the required total number of marks (Credit - 65, Distinction - 75, High Distinction - 85).

Policies

Macquarie is developing a number of policies in the area of learning and teaching. Approved policies and associated guidelines and procedures can be found at Policy Central. There you will find the University’s policy and associated procedures on:

- Assessment
• Special Consideration
• Plagiarism
• Grade Appeal

Assessment
The procedure implementing the new assessment policy can be found here.

Disruption of Studies
Disruption of Studies is intended for a student who is prevented by serious and unavoidable
disruption from completing any unit requirements in accordance with their ability. In this case,
you should follow the procedure implementing the policy available here.

If a Supplementary Examination is granted as a result of the Special Consideration process the
examination will be scheduled after the conclusion of the official examination period. For details
of the Special Consideration policy specific to the Department of Computing, see the
Department’s policy page.

Plagiarism
Plagiarism involves using the work of another person and presenting it as one’s own. The
Department, in line with University policy, treats all cases seriously. In particular, the Department,
and the University, keeps a record of all plagiarism cases. This record is referred to so that an
appropriate penalty can be applied to each case. More details are available here.

Grade Appeal
In case of problems arising from the final unit grade provided by academic staff members, the
first step is to request a review of your grade. The Department recommends that you submit a
request in writing to the convenor of the unit in order to arrange a review session. If this review
does not resolve the problem, a formal Grade Appeal can be lodged via www.ask.mq.edu.au
