Co-badged status

Unit description
This unit examines major theories and current issues in child development and the application of developmental theory to educational practice. It provides students with an understanding of how theory and cultural assumptions influence practice and how to recognise the implications of theory and research for teaching. The initial part of the unit is concerned with theories of development and the middle to latter sections deal with domains of development and areas of specific interest in child development for the early childhood years.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at https://www.mq.edu.au/study/calendar-of-dates

Learning Outcomes
On successful completion of this unit, you will be able to:

- Acquire an understanding of the many and varying influences important to the development of a child.
- Develop an appreciation of the whole child through exploring the links between different dimensions of child growth and development.
- Demonstrate autonomy and adaptability as a teacher of young children through a thorough knowledge of child development theories and links with practical applications.
Demonstrate awareness and respect for cultural, historical and contextual influences on child.

Analyse critically links between theory, research and practice to explore the biological underpinnings of development including individual differences.

**General Assessment Information**

PLEASE REFER TO INFORMATION ON iLEARN FOR FULL DETAILS OF ASSESSMENT TASKS AND MARKING CRITERIA

All assignments in this unit are submitted online through the unit website.

**Assessment Presentation & Submission Guidelines**

Please follow these guidelines when you submit each assignment:

- Allow a left and right-hand margin of at least 2cm in all assignments.
- Please type all assignments using 12-point font and 1.5 spacing.
- All assessments must be submitted through turnitin in .doc or .pdf format for submission.
- It is the onus of the student to ensure that all assessments are successfully submitted through turnitin.
- Faculty assignment cover sheets are **NOT** required for this unit.

**Draft Submissions & Turnitin Originality Reports**

- Students may use Turnitin’s Originality Report as a learning tool to improve their academic writing if this option is made available in the unit.
- Students are strongly encouraged to upload a draft copy of each assessment to Turnitin at least one week prior to the due date to obtain an Originality Report.
- The Originality Report provides students with a similarity index that may indicate if plagiarism has occurred. Students will be able to make amendments to their drafts prior to their final submission on the due date.
- Generally, one Originality Report is generated every 24 hours up to the due date.

**Final Submissions**

- Students are responsible for checking that their submission has been successful and has been submitted by the due date and time.

When preparing your assignments, it is essential that you note that:

- Assignment marks will be deducted if you submit your assignment late (refer to the ‘late assignments’ section below for more details);
- Unless there are exceptional circumstances, no assignment will be accepted after the date that the assignment has been returned to other students.

https://unitguides.mq.edu.au/unit_offerings/74479/unit_guide/print
• All failing assignments will be double marked when the failure is due to unsatisfactory content. Failures that are the result of deductions for lateness or loss of marks for referencing, presentation, or plagiarism may not be double-marked;

**Academic Honesty Guidelines:**

All assignments should cite and provide full bibliographical details of all material that you have used to inform or support your ideas. Early Childhood students are required to use the American Psychological Association (APA) 6th edition referencing procedures. Full details about how to cite and reference correctly can be found in Perrin (2015). Online APA guides are also available via the library.

The following guide can be purchased from the Co-op Bookshop. This is a required text:

**Assignment Extensions and Penalties:**

Applications for extensions must be made via AskMQ at https://ask.mq.edu.au as a "Disruption to Studies" request before the submission date. Students who experience a disruption to their studies through ill-health or misadventure are able to apply for this request. *Extensions can only be granted if they meet the Disruption to Studies policy and are submitted via ask.mq.edu.au.*

This will ensure consistency in the consideration of such requests is maintained.

In general, there should be no need for extensions except through illness or misadventure that would be categorised as unavoidable disruption according to the University definition of same, and currently available at:

[https://students.mq.edu.au/study/my-study-program/special-consideration/disruption-to-studies](https://students.mq.edu.au/study/my-study-program/special-consideration/disruption-to-studies)

Late submissions without extension will receive a penalty of 5% reduction of the total possible mark for each day late (including weekends and public holidays). You are reminded that submitting even just 1 day late could be the difference between passing and failing a unit. Late penalties are applied by unit convenors or their delegates after tasks are assessed.

No assessable work will be accepted after the return/release of marked work on the same topic. If a student is still permitted to submit on the basis of unavoidable disruption, an alternative topic may be set.

Students should keep an electronic file of all assessments. Claims regarding "lost" assessments cannot be made if the file cannot be produced. It is also advisable to keep an electronic file of all drafts and the final submission on a USB untouched/unopened after submission. This can be used to demonstrate easily that the assessment has not been amended after the submission date.

• Please notify the unit coordinator of your intention to request an extension (via Dialogue in iLearn), however, extension will only be granted on receipt of the completed form
submitted through ask.mq.edu.au, plus documentation.

- Emails are not appropriate means of extension requests.
- It is essential that you plan ahead and organise your study time effectively. Poor time management is not grounds for an extension.

**Work Awarded a Fail**

All assessments awarded a fail will be double marked, or double checked in the case of multiple choice items. There are no resubmissions in this unit.

**Eligibility for a Passing Grade**

In order to receive a passing grade in this unit, you must meet the following criteria:

- Receive an adequate total mark for the unit (i.e. your combined marks for the two quizzes, the two learning activities and PeerWise tasks).
- Have made a serious attempt at passing all pieces of work in order to pass the unit.
- In order to receive a grade of Pass, your total mark must be at least 50/100.

Note: If you miss one piece of work, you will fail the unit. It is not the responsibility of unit staff to contact students who have failed to submit assignments or have missed a quiz. **If you have any missing items of assessment, it is your responsibility to make contact with the unit coordinator** to determine whether it is possible to complete the unit in 2017.

**Learning Activity 1 - Theories**

Due: **17 March**
Weighting: 20%

“Key Understandings of Two Major Theories”

What is your understanding of theories of development? Listen to the lectures from Weeks 1 and 2 and read White et al.’s (2016) introductory chapter titled “What is developmental psychology?” Select two theories to focus on and read the key readings concerning these. In 800 words outline your understandings of these theories. What are the key aspects of their explanation of human development? Describe whether the theories are consistent with your observations of development.

On successful completion you will be able to:

• Acquire an understanding of the many and varying influences important to the development of a child.
• Develop an appreciation of the whole child through exploring the links between different dimensions of child growth and development.
• Demonstrate autonomy and adaptability as a teacher of young children through a thorough knowledge of child development theories and links with practical applications.
• Demonstrate awareness and respect for cultural, historical and contextual influences on child.
• Analyse critically links between theory, research and practice to explore the biological underpinnings of development including individual differences.

PeerWise Task 1

Due: 3 April
Weighting: 5%

Students in ECED602 will use PeerWise to create, share and evaluate multiple choice quiz questions. Peerwise is designed to help students consolidate course content and prepare for the two Quiz assessment tasks.

PeerWise Task 1: Upload minimum of 1 multiple choice question per lecture for Topics 1 to 12. Evaluation of 10 questions written by other students.

On successful completion you will be able to:

• Acquire an understanding of the many and varying influences important to the development of a child.
• Develop an appreciation of the whole child through exploring the links between different dimensions of child growth and development.
Quiz 1
Due: 6 April
Weighting: 15%

30 questions - multiple choice questions; True/False; matching terms – worth 0.5 marks each
Questions drawn from lectures and readings for Topics 1-12 inclusive (Key debates in child development to Perception)
Open Book (notes, lecture slides and textbooks)

Note: Online quizzes are an individual assessment task and MUST BE COMPLETED by each student individually.

On successful completion you will be able to:
• Acquire an understanding of the many and varying influences important to the development of a child.
• Develop an appreciation of the whole child through exploring the links between different dimensions of child growth and development.
• Demonstrate autonomy and adaptability as a teacher of young children through a thorough knowledge of child development theories and links with practical applications.
• Demonstrate awareness and respect for cultural, historical and contextual influences on child.
• Analyse critically links between theory, research and practice to explore the biological underpinnings of development including individual differences.

Learning Activity 2
Due: 22 May
Weighting: 40%

In this essay, students will examine current research related to a specific area of development. In your response, you need to refer to the findings of at least 5 empirical research studies.

On successful completion you will be able to:
• Acquire an understanding of the many and varying influences important to the development of a child.
• Develop an appreciation of the whole child through exploring the links between different
dimensions of child growth and development.

- Demonstrate autonomy and adaptability as a teacher of young children through a thorough knowledge of child development theories and links with practical applications.
- Demonstrate awareness and respect for cultural, historical and contextual influences on child.
- Analyse critically links between theory, research and practice to explore the biological underpinnings of development including individual differences.

PeerWise Task 2

Due: 8 June
Weighting: 5%

PeerWise Task 2: Upload minimum of 1 multiple choice question per lecture topic for Lectures 13 to 23. Evaluation of 10 questions written by other students.

On successful completion you will be able to:

- Acquire an understanding of the many and varying influences important to the development of a child.
- Develop an appreciation of the whole child through exploring the links between different dimensions of child growth and development.

Quiz 2

Due: 14 June
Weighting: 15%

30 questions - multiple choice questions; True/False; matching terms – worth 0.5 marks each

Questions drawn from lectures and readings for Lectures 13-23 inclusive (Cognition to Social development)

Open Book (notes, lecture slides and textbooks)

Note: Online quizzes are an individual assessment task and MUST BE COMPLETED by each student individually.

On successful completion you will be able to:

- Acquire an understanding of the many and varying influences important to the
development of a child.

- Develop an appreciation of the whole child through exploring the links between different dimensions of child growth and development.
- Demonstrate autonomy and adaptability as a teacher of young children through a thorough knowledge of child development theories and links with practical applications.
- Demonstrate awareness and respect for cultural, historical and contextual influences on child.
- Analyse critically links between theory, research and practice to explore the biological underpinnings of development including individual differences.

**Delivery and Resources**

**IEC Relevant Documents**

The information in this Unit Guide must be read in conjunction with the following documents available for download from iLearn:

- Unit Readings, Assessment Details

**IEC Electronic Communication**

During semester time, staff may contact students using the following ways:

- Dialogue function on iLearn
- Official MQ Student Email Address

It is the student’s responsibility to check all electronic communication on a regular weekly basis.

**Required Texts:**

**Additional Required Readings: (available online)**

**Recommended:**

**Learning and Teaching Methods:**

The main method of delivery of unit content is via weekly lectures and tasks in iLearn. The
lectures are not presented during class time, but are available from the ECED602 web site under each weekly section. You must make time to listen to the lectures and take notes. The lecture schedule in this unit guide provides dates for lectures to be completed to ensure you are prepared for your class. **Internal students must complete all lectures for the topics covered in weeks 1 -3 before attending your first class on 10 March**, and, on average, complete 2-3 topics each week of semester.

- Ensure that you are listening to your lectures regularly and completing the associated readings. The material in this unit is complex and cannot be rushed. Set yourself weekly times to ensure that you complete your topics each week.

This series of recorded lectures, along with accompanying lecture notes and textbook readings, are the core study material. Seminars, tasks and assessments have been developed specifically to facilitate understanding of the lectures and readings. See the lecture schedule for more details.

**External students** will have the opportunity to complete weekly seminar tasks at the voluntary on campus days (Saturday 1 April and 27 May). Much of the seminar material is also presented within the weekly tasks for those unable to attend.

**Withdrawing from this PG Unit**

If you are considering withdrawing from this unit, please seek academic advice by writing to pg.educ.iec@mq.edu.au before doing so as this unit may be a co-requisite or prerequisite for units in the following semesters and may impact on your progression through the degree.

### Policies and Procedures

Macquarie University policies and procedures are accessible from Policy Central. Students should be aware of the following policies in particular with regard to Learning and Teaching:

In addition, a number of other policies can be found in the **Learning and Teaching Category** of Policy Central.

### Student Code of Conduct

Macquarie University students have a responsibility to be familiar with the Student Code of
Graduate Capabilities

Capable of Professional and Personal Judgement and Initiative

We want our graduates to have emotional intelligence and sound interpersonal skills and to demonstrate discernment and common sense in their professional and personal judgement. They will exercise initiative as needed. They will be capable of risk assessment, and be able to handle ambiguity and complexity, enabling them to be adaptable in diverse and changing environments.

This graduate capability is supported by:
Learning outcomes

• Acquire an understanding of the many and varying influences important to the development of a child.
• Develop an appreciation of the whole child through exploring the links between different dimensions of child growth and development.
• Demonstrate autonomy and adaptability as a teacher of young children through a thorough knowledge of child development theories and links with practical applications.
• Demonstrate awareness and respect for cultural, historical and contextual influences on child.
• Analyse critically links between theory, research and practice to explore the biological underpinnings of development including individual differences.

Assessment tasks

• Learning Activity 1 - Theories
• Learning Activity 2

Commitment to Continuous Learning

Our graduates will have enquiring minds and a literate curiosity which will lead them to pursue knowledge for its own sake. They will continue to pursue learning in their careers and as they participate in the world. They will be capable of reflecting on their experiences and relationships with others and the environment, learning from them, and growing - personally, professionally and socially.

This graduate capability is supported by:

Learning outcome

• Analyse critically links between theory, research and practice to explore the biological underpinnings of development including individual differences.

Assessment tasks

• PeerWise Task 1
• Quiz 1
• Learning Activity 2
• PeerWise Task 2
• Quiz 2

Discipline Specific Knowledge and Skills

Our graduates will take with them the intellectual development, depth and breadth of knowledge, scholarly understanding, and specific subject content in their chosen fields to make them
competent and confident in their subject or profession. They will be able to demonstrate, where relevant, professional technical competence and meet professional standards. They will be able to articulate the structure of knowledge of their discipline, be able to adapt discipline-specific knowledge to novel situations, and be able to contribute from their discipline to inter-disciplinary solutions to problems.

This graduate capability is supported by:

**Learning outcomes**

- Acquire an understanding of the many and varying influences important to the development of a child.
- Develop an appreciation of the whole child through exploring the links between different dimensions of child growth and development.
- Demonstrate autonomy and adaptability as a teacher of young children through a thorough knowledge of child development theories and links with practical applications.
- Demonstrate awareness and respect for cultural, historical and contextual influences on child.
- Analyse critically links between theory, research and practice to explore the biological underpinnings of development including individual differences.

**Assessment tasks**

- Learning Activity 1 - Theories
- PeerWise Task 1
- Quiz 1
- Learning Activity 2
- PeerWise Task 2
- Quiz 2

**Critical, Analytical and Integrative Thinking**

We want our graduates to be capable of reasoning, questioning and analysing, and to integrate and synthesise learning and knowledge from a range of sources and environments; to be able to critique constraints, assumptions and limitations; to be able to think independently and systemically in relation to scholarly activity, in the workplace, and in the world. We want them to have a level of scientific and information technology literacy.

This graduate capability is supported by:

**Learning outcomes**

- Acquire an understanding of the many and varying influences important to the development of a child.
- Develop an appreciation of the whole child through exploring the links between different
dimensions of child growth and development.

- Demonstrate autonomy and adaptability as a teacher of young children through a thorough knowledge of child development theories and links with practical applications.
- Demonstrate awareness and respect for cultural, historical and contextual influences on child.
- Analyse critically links between theory, research and practice to explore the biological underpinnings of development including individual differences.

**Assessment tasks**

- Learning Activity 1 - Theories
- PeerWise Task 1
- Quiz 1
- Learning Activity 2
- PeerWise Task 2
- Quiz 2

**Problem Solving and Research Capability**

Our graduates should be capable of researching; of analysing, and interpreting and assessing data and information in various forms; of drawing connections across fields of knowledge; and they should be able to relate their knowledge to complex situations at work or in the world, in order to diagnose and solve problems. We want them to have the confidence to take the initiative in doing so, within an awareness of their own limitations.

This graduate capability is supported by:

**Learning outcomes**

- Develop an appreciation of the whole child through exploring the links between different dimensions of child growth and development.
- Demonstrate autonomy and adaptability as a teacher of young children through a thorough knowledge of child development theories and links with practical applications.
- Analyse critically links between theory, research and practice to explore the biological underpinnings of development including individual differences.

**Assessment task**

- Learning Activity 2

**Effective Communication**

We want to develop in our students the ability to communicate and convey their views in forms effective with different audiences. We want our graduates to take with them the capability to read, listen, question, gather and evaluate information resources in a variety of formats, assess,
write clearly, speak effectively, and to use visual communication and communication technologies as appropriate.

This graduate capability is supported by:

**Learning outcomes**

- Demonstrate autonomy and adaptability as a teacher of young children through a thorough knowledge of child development theories and links with practical applications.
- Analyse critically links between theory, research and practice to explore the biological underpinnings of development including individual differences.

**Assessment tasks**

- Learning Activity 1 - Theories
- PeerWise Task 1
- Learning Activity 2
- PeerWise Task 2
- Quiz 2

**Engaged and Ethical Local and Global citizens**

As local citizens our graduates will be aware of indigenous perspectives and of the nation's historical context. They will be engaged with the challenges of contemporary society and with knowledge and ideas. We want our graduates to have respect for diversity, to be open-minded, sensitive to others and inclusive, and to be open to other cultures and perspectives: they should have a level of cultural literacy. Our graduates should be aware of disadvantage and social justice, and be willing to participate to help create a wiser and better society.

This graduate capability is supported by:

**Learning outcome**

- Demonstrate awareness and respect for cultural, historical and contextual influences on child.

**Assessment task**

- Learning Activity 2

**Socially and Environmentally Active and Responsible**

We want our graduates to be aware of and have respect for self and others; to be able to work with others as a leader and a team player; to have a sense of connectedness with others and country; and to have a sense of mutual obligation. Our graduates should be informed and active participants in moving society towards sustainability.

This graduate capability is supported by:
Learning outcome

- Demonstrate awareness and respect for cultural, historical and contextual influences on child.
