Unit description
This unit covers selected topics on modern statistical methods including statistical modelling, computational statistics, bio- and medical statistics, statistical models in finance, modelling dependence and point processes. These topics are hot research areas of statistics. The topics will be delivered by reading research papers, discussions and presentations. Students are also required to attend department research seminars. Each topic will be taught in two weeks and then assessed by the lecturer delivering the topic.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at https://www.mq.edu.au/study/calendar-of-dates

Learning Outcomes
On successful completion of this unit, you will be able to:

- Be able to obtain a broad view of some research activities in various fields of statistics
- Be able to read and discuss research papers in statistics
- Be able to utilise google or other search engines to look for research papers
- Be able to recognise the general structure of research papers
- Be able to write research papers

**Topic 1**

Due: 8 March  
Weighting: 15%

"Statistical modelling and model selection"

Each topic will be assessed by the lecturer of that topic. Each topic weights 15% towards the final assessment. Topic assessment is based on presentation (13%) and contribution to the discussion (2%). Three core criteria will be used to assess students’ work:

1. Knowledge Development: Understanding of key ideas and concepts.  
2. Application: Ability to apply statistical concepts to actual problems.  
3. Presentation: The extent to which work has been written and/or presented in a manner consistent with accepted academic standards.

Performance in relation to each of these criteria will be assessed against established standards.

On successful completion you will be able to:

- Be able to obtain a broad view of some research activities in various fields of statistics
- Be able to read and discuss research papers in statistics
- Be able to utilise google or other search engines to look for research papers
- Be able to recognise the general structure of research papers

**Topic 2**

Due: 22 March  
Weighting: 15%

"Computational statistics, including EM, mixture distribution, LASSO".

For assessment see topic 1

On successful completion you will be able to:

- Be able to obtain a broad view of some research activities in various fields of statistics
- Be able to read and discuss research papers in statistics
- Be able to utilise google or other search engines to look for research papers
- Be able to recognise the general structure of research papers

**Topic 3**

Due: 5 April  
Weighting: 15%
"Frequency estimation"
For assessment see topic 1

On successful completion you will be able to:
• Be able to obtain a broad view of some research activities in various fields of statistics
• Be able to read and discuss research papers in statistics
• Be able to utilise google or other search engines to look for research papers
• Be able to recognise the general structure of research papers

Topic 4
Due: 3 May
Weighting: 15%

"Change point detection".
For assessment see topic 1

On successful completion you will be able to:
• Be able to obtain a broad view of some research activities in various fields of statistics
• Be able to read and discuss research papers in statistics
• Be able to utilise google or other search engines to look for research papers
• Be able to recognise the general structure of research papers

Topic 5
Due: 17 May
Weighting: 15%

"Statistical models in finance, including ARCH & GARCH models"
For assessment see topic 1

On successful completion you will be able to:
• Be able to obtain a broad view of some research activities in various fields of statistics
• Be able to read and discuss research papers in statistics
• Be able to utilise google or other search engines to look for research papers
• Be able to recognise the general structure of research papers

Topic 6
Due: 31 May
Weighting: 15%

"Bio- and medical statistics, including Cox model, censorings, recurrent events, multi-

https://unitguides.mq.edu.au/unit_offerings/75340/unit_guide/print
On successful completion you will be able to:

- Be able to obtain a broad view of some research activities in various fields of statistics
- Be able to read and discuss research papers in statistics
- Be able to utilise google or other search engines to look for research papers
- Be able to recognise the general structure of research papers

Statistics department seminar

Due: TBA
Weighting: 10%

Students are required to attend the research seminars of Statistics Department. Their attendance and performance (asking questions and participation in discussions) will be used for this assessment.

On successful completion you will be able to:

- Be able to obtain a broad view of some research activities in various fields of statistics
- Be able to read and discuss research papers in statistics
- Be able to utilise google or other search engines to look for research papers
- Be able to write research papers

Delivery and Resources

Lectures

Lectures begin in Week 1. Students should attend one 3-hour session per week. Papers and reading materials for each topic will be made available via iLearn. Students should read these materials prior to the lectures.

Each topic will last for two weeks. In the first week, the lecturer will give a brief introduction to the materials covered in that topic and introduce students to the papers that will be discussed. Each student will be given three papers to read. However, each student will be required to present one paper in the class in the second week. Students are encouraged to participate in presentations, i.e. ask questions and involve in discussions.

Department research seminars

Students are also required to attend the research seminars of Statistics Department.

Policies and Procedures

Macquarie University policies and procedures are accessible from Policy Central. Students should be aware of the following policies in particular with regard to Learning and Teaching:

In addition, a number of other policies can be found in the Learning and Teaching Category of Policy Central.

Student Code of Conduct

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: [https://students.mq.edu.au/support/student_conduct/](https://students.mq.edu.au/support/student_conduct/)

Results

Results shown in iLearn, or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in eStudent. For more information visit [ask.mq.edu.au](http://ask.mq.edu.au).

https://unitguides.mq.edu.au/unit_offers/75340/unit_guide/print
Student Support
Macquarie University provides a range of support services for students. For details, visit http://students.mq.edu.au/support/

Learning Skills
Learning Skills (mq.edu.au/learningskills) provides academic writing resources and study strategies to improve your marks and take control of your study.

- Workshops
- StudyWise
- Academic Integrity Module for Students
- Ask a Learning Adviser

Student Services and Support
Students with a disability are encouraged to contact the Disability Service who can provide appropriate help with any issues that arise during their studies.

Student Enquiries
For all student enquiries, visit Student Connect at ask.mq.edu.au

IT Help
For help with University computer systems and technology, visit http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/.

When using the University’s IT, you must adhere to the Acceptable Use of IT Resources Policy. The policy applies to all who connect to the MQ network including students.
