Unit description

This is a program-wide capstone unit and must be taken by students in their final session of study. The unit will broaden students' understanding of the importance of strategic business issues in the organisation's planning, operations, control and leadership, ethics and industry relationship, and broader economic & global developments. The unit is not only reflective and integrative, but also future-focused, offering opportunities for "real world" preparatory experience. Students will work individually and collaboratively with peers to understand "real world" business issues and challenges requiring cross-disciplinary insights and knowledge. While the unit aims at giving students an opportunity to explore strategic business issues within the context of a business environment, students will be exposed to comprehensive case studies, which will give them the opportunity to learn about the practical implications of business issues and challenges. Students will also work in self-managing teams to prepare group reports and complete a session long individual research-based project that will be assessed by the academic staff.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

Integrate discipline-specific knowledge and skills and apply subject knowledge critically, analytically and creatively to different bodies of knowledge or practice.

Synthesise knowledge from alternative perspectives and generate critical thinking and problem-solving skills in formulating and implementing strategy.

Apply knowledge to complex ethical and global issues and understand its impact on organisations and/or in simulated situations.

Research and critically analyse recent or developing business issues, appraise the outcomes of proposed solutions and defend propositions.

Demonstrate professional written and interpersonal competencies, including critical reflection on personal, social and practical issues in a team environment.

General Assessment Information

Turnitin

All text based assessments must be submitted through Turnitin as per instructions provided in the unit guide. It is the student's responsibility to ensure that work is submitted correctly prior to the due date. No hard copies of assessments will be accepted and only Turnitin records will be taken as records of submission.

Multiple submissions may be possible in some units via Turnitin prior to the final due date and time of an assessment task and originality reports may be made available to students to view and check their work. All identified matching text will be reconsidered carefully. Students should note that the system will not immediately produce the similarity score on a second or subsequent submission - it approximately takes 24 hours for the report to be generated. This may be after the due date so students should plan any resubmissions carefully. Please refer to these instructions on how to submit your assignment through Turnitin and access similarity reports and feedback provided by teaching staff. Should you have questions about Turnitin or experience issues submitting through the system, you must inform your unit coordinator immediately. If the issue is technical in nature may also lodge OneHelp Ticket, refer to the IT help page.

It is the responsibility of the student to retain a copy of any work submitted. Students must produce these documents upon request. Copies should be retained until the end of the grade appeal period each term. In the event that a student is asked to produce another copy of work submitted and is unable to do so, they may be awarded zero (0) for that particular assessment task.

Research & Practice, Global & Sustainability

This unit also addresses global and sustainability issues as direct areas of study and as necessary implications arising from the materials, assessment and academic discussion and

debate in classes/seminars. We promote sustainability by developing ability in students to research and locate information within accounting discipline. We aim to provide students with an opportunity to obtain skills which will benefit them throughout their career.

This unit also gives you opportunities to conduct your own research and gives you practice in applying research findings in your assessment tasks. Students will be required to use library resources to research beyond these materials in undertaking research necessary to complete their tasks. The unit encourages students to read journals of interest and publications in these journals have a reference list at the end of each article containing all references cited by the author. These provide some guidance to references that could be used to research particular issues.
