Unit description

This unit addresses experimentation and innovation in the context of popular music. It examines key movements, innovations, and major ideas that have shaped, and continue to shape, the evolution of musical forms and practices. The unit addresses musical hybridity and innovative approaches to songwriting and record production. A broad range of music is examined and discussed; including psychedelic music, punk/post-punk, ambient, mash-up, minimal techno and electronics, glitch and noise, post-rock and post-classical music. Students will gain a current and historical overview of the dynamic pattern of innovative ideas in music across writing, performance and production and the way in which underground music scenes have influenced the mainstream.

Weighting: **40%**

There are two options for this assignment. The first is more creatively oriented while the second is more analytically oriented. Choose either Option 1 OR Option 2.

Option 1: Creative Task

Create a musical work that uses ideas examined in this unit. The work may be a song, instrumental composition or soundscape. The length of the musical work will depend on your individual project, but as a guideline will be between 3 and 4 minutes. The work is to be uploaded to a music streaming service such as Soundcloud.
