Unit description

This unit focuses on advanced statistical approaches used in Economics, Finance and related disciplines. By successfully completing this unit, students should be able to develop an econometric model suitable for the objective of their analysis, estimate the model using an appropriate estimation method, and draw valid inferences from the estimation results. Topics include time series analysis, ARCH, GARCH models, panel data models, VAR and VECM models. The unit will also consider applications of the above models and techniques.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

Understand a range of generalizations of regression and how to apply them.

Understand how linear models, time series models and various generalizations are applied and how empirical results are communicated in practice.

Have a broad understanding of Panel Data Models and Dynamic Panel Data Models.

Appreciate the relevance and limitations of the econometric methods used.

General Assessment Information

Details of these assessment tasks will be given in lectures, and will be posted on iLearn.

Tutorial exercises

The weekly exercises require access to a statistical package. Students are expected to attempt at least 10 of the 12 tutorial exercises. If you miss more than 2 tutorials due to unavoidable disruption/s, you should apply for Special Consideration (see the Special Consideration Policy below).

Midterm test

A 60-minute test covering all of the material up to week 7 will be held in lecture time in week 8.

Students must be available during the time of the lecture class to sit the Midterm test. The only exception to this is if a student could not do the test because of documented illness or unavoidable disruption. In these circumstances this student may wish to consult the University's Special Consideration Policy- <https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policies/special-consideration> . If a student satisfies the Special Consideration Policy they will be required to complete a supplementary assessment task.

Project

The report will be approximately 3000 words. The economic/finance motivation should be 2 to 4 pages long including a quick review of applied work in the area. You will need to choose an economic hypothesis you wish to test, collect the data, build and estimate a model to test this hypothesis. You will need to apply one or more of the techniques discussed in class to address the problem and write up a report on the same. Submission as per the class timetable and to be further discussed in class.

Late submissions will be accepted after the submission deadline. There will be a deduction of 10% of the total quality-based marks for **EACH 24 HOURS** period or part thereof that the submission is late (for example, being 25 hours late in submission will occur 20% mark penalty). This penalty does not apply for the cases in which an application for special consideration has been made and has been successful.

This is to be completed as an individual piece of work. A hard copy needs to be submitted as well as a copy uploaded to "Turn-it-in" (via iLearn). The assignment is worth 30% of the course grade.

Class Test

The class test will be of a two-hour duration and will be held in lecture time in week 13.

Students must be available during the time of the lecture class to sit the Class test. The only exception to this is if a student could not do the test because of documented illness or unavoidable disruption. In these circumstances this student may wish to consult the University's Special Consideration Policy- <https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policies/special-consideration> . If a student satisfies the

Special Consideration Policy they will be required to complete a supplementary assessment task.

Class test conditions: 1 x A4 page of handwritten or typed notes (both sides) to be returned with the exam paper; Non-programmable calculators (no text retrieval capacity) permitted; No dictionaries permitted.

Assessment Tasks

Name	Weighting	Hurdle	Due
<u>Participation - class</u>	10%	No	All session
<u>Tutorial questions</u>	10%	No	All session
<u>Midterm</u>	20%	No	Week 8, Lecture time
<u>Project</u>	30%	No	Week 14
<u>Class Test</u>	30%	No	Week 13, Lecture time

Participation - class

Due: **All session**

Weighting: **10%**

Participation in lectures and tutorials. You are expected to attend and participate in at least 10 tutorials out of 12.

On successful completion you will be able to:

- Understand a range of generalizations of regression and how to apply them.
- Understand how linear models, time series models and various generalizations are applied and how empirical results are communicated in practice.
- Have a broad understanding of Panel Data Models and Dynamic Panel Data Models.

Tutorial questions

Due: **All session**

Weighting: **10%**

Attempt tutorial questions for at least 10 out of 12 tutorials.

On successful completion you will be able to:

- Understand a range of generalizations of regression and how to apply them.
- Understand how linear models, time series models and various generalizations are applied and how empirical results are communicated in practice.
- Have a broad understanding of Panel Data Models and Dynamic Panel Data Models.
- Appreciate the relevance and limitations of the econometric methods used.

Midterm

Due: **Week 8, Lecture time**

Weighting: **20%**

Class Test

On successful completion you will be able to:

- Understand a range of generalizations of regression and how to apply them.
- Understand how linear models, time series models and various generalizations are applied and how empirical results are communicated in practice.
- Appreciate the relevance and limitations of the econometric methods used.

Project

Due: **Week 14**

Weighting: **30%**

The report will be approximately 3000 words. The economic/finance motivation should be 2 to 4 pages long including a quick review of applied work in the area. You will need to choose an economic hypothesis you wish to test, collect the data, build and estimate a model to test this hypothesis.

On successful completion you will be able to:

- Understand a range of generalizations of regression and how to apply them.
- Understand how linear models, time series models and various generalizations are applied and how empirical results are communicated in practice.
- Have a broad understanding of Panel Data Models and Dynamic Panel Data Models.
- Appreciate the relevance and limitations of the econometric methods used.

Class Test

Due: **Week 13, Lecture time**

Weighting: **30%**

Class Test

On successful completion you will be able to:

- Understand a range of generalizations of regression and how to apply them.
- Understand how linear models, time series models and various generalizations are applied and how empirical results are communicated in practice.
- Have a broad understanding of Panel Data Models and Dynamic Panel Data Models.
- Appreciate the relevance and limitations of the econometric methods used.

Delivery and Resources

Lecture and Tutorial times

Classes for FOBE840 are scheduled as per the class timetable available at <http://www.timetables.mq.edu.au/>

There will be 3 hours face-to-face teaching per week consisting of one two-hour lecture and one hour tutorial. Lectures and tutorials are held in the computer labs.

Technology used and required

If you are enrolled in this unit, you will be listed in the FOBE840 online unit (iLearn). Login at <http://ilearn.mq.edu.au/>

The site will be used to post any additional lecture slides, handouts, and assignment. The site contains a “forum” to which you may contribute. Please log in to the site on a regular basis.

Required and Recommended Texts and/or Materials

The recommended textbooks for FOBE840 are:

1. Hill, C. H., Griffiths, W. E. and Lim, G. C. (2018) *Principles of Econometrics* (5th ed.) Wiley.
 2. Wooldridge, J. (2008) *Introductory Econometrics: A Modern Approach* (4th ed.) Cengage Learning.
- A list of prescribed reading will be developed on the website as the unit progresses.

Teaching and Learning Strategy

- Students are expected to complete all pre-class preparation tasks in advance of that particular class.
- Please make notes summarizing the pre-class readings. These notes do not need to be submitted for assessment; however they will permit discussion of the questions and material in class.
- Students are expected to attend and participate in all classes.

Information

Details of the assessment tasks will be given in lectures and posted on iLearn. You should check iLearn regularly.

About this Unit

This unit focuses on advanced statistical approaches used in Finance, Economics and related disciplines. It seeks to develop students understanding of the contexts in which quantitative research can be undertaken and the ability to analyse, conduct, and evaluate quantitative forms of research. It is designed for those who need quantitative skills for specialisations in the areas of Economics and Finance.

Assumed background

A one—semester rigorous introduction to probability, statistics and regression analysis, equivalent to ECON840, is required.

Unit Schedule

Week	Topic	Tutorial Topic
1	Stationarity, Integration and ARIMA Models	Introduction to software
2	Testing for unit roots and bubbles	Computer exercise
3	Testing for unit roots and bubbles	Computer exercise
4	Testing for cointegration	Computer exercise
5	VAR and VECM	Computer exercise
6	VAR and VECM	Computer exercise
7	Testing restrictions in VAR models	Computer exercise
Mid	Semester	Break
8	SVAR	Mid Term Test
9	Impulse response functions	Computer exercise
10	Volatility models	Computer exercise
11	Panel data models	Computer exercise
12	Panel data models	Computer exercise
13	Class test	

The list of topics above is only provisional and will be changed according to students

backgrounds and interests.

Policies and Procedures

Macquarie University policies and procedures are accessible from [Policy Central \(https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central\)](https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central). Students should be aware of the following policies in particular with regard to Learning and Teaching:

- [Academic Appeals Policy](#)
- [Academic Integrity Policy](#)
- [Academic Progression Policy](#)
- [Assessment Policy](#)
- [Fitness to Practice Procedure](#)
- [Grade Appeal Policy](#)
- [Complaint Management Procedure for Students and Members of the Public](#)
- [Special Consideration Policy](#) (**Note:** *The Special Consideration Policy is effective from 4 December 2017 and replaces the Disruption to Studies Policy.*)

Undergraduate students seeking more policy resources can visit the [Student Policy Gateway \(https://students.mq.edu.au/support/study/student-policy-gateway\)](https://students.mq.edu.au/support/study/student-policy-gateway). It is your one-stop-shop for the key policies you need to know about throughout your undergraduate student journey.

If you would like to see all the policies relevant to Learning and Teaching visit [Policy Central \(https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central\)](https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central).

Student Code of Conduct

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: <https://students.mq.edu.au/study/getting-started/student-conduct>

Results

Results shown in *iLearn*, or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in [eStudent](#). For more information visit ask.mq.edu.au.

Supplementary exam information

The dates and details relating to supplementary exams are at the following link:

http://www.businessandconomics.mq.edu.au/current_students/undergraduate/how_do_i/special_consideration

Policy regarding late submission of assessments

Late assignments will be accepted, but will incur a penalty of 10% of the total available marks for

each 24 hour period late or part thereof.

Students who do not submit an assignment will be awarded a mark of zero for that assessment except for cases in which an application for special consideration is made and approved.

Student Support

Macquarie University provides a range of support services for students. For details, visit <http://students.mq.edu.au/support/>

Learning Skills

Learning Skills (mq.edu.au/learningskills) provides academic writing resources and study strategies to improve your marks and take control of your study.

- [Workshops](#)
- [StudyWise](#)
- [Academic Integrity Module for Students](#)
- [Ask a Learning Adviser](#)

Student Services and Support

Students with a disability are encouraged to contact the [Disability Service](#) who can provide appropriate help with any issues that arise during their studies.

Student Enquiries

For all student enquiries, visit Student Connect at ask.mq.edu.au

IT Help

For help with University computer systems and technology, visit http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/.

When using the University's IT, you must adhere to the [Acceptable Use of IT Resources Policy](#). The policy applies to all who connect to the MQ network including students.

Graduate Capabilities

PG - Capable of Professional and Personal Judgment and Initiative

Our postgraduates will demonstrate a high standard of discernment and common sense in their professional and personal judgment. They will have the ability to make informed choices and decisions that reflect both the nature of their professional work and their personal perspectives.

This graduate capability is supported by:

Learning outcome

- Understand how linear models, time series models and various generalizations are applied and how empirical results are communicated in practice.

Assessment tasks

- Participation - class
- Project

PG - Discipline Knowledge and Skills

Our postgraduates will be able to demonstrate a significantly enhanced depth and breadth of knowledge, scholarly understanding, and specific subject content knowledge in their chosen fields.

This graduate capability is supported by:

Learning outcomes

- Understand a range of generalizations of regression and how to apply them.
- Understand how linear models, time series models and various generalizations are applied and how empirical results are communicated in practice.
- Have a broad understanding of Panel Data Models and Dynamic Panel Data Models.
- Appreciate the relevance and limitations of the econometric methods used.

Assessment tasks

- Participation - class
- Tutorial questions
- Midterm
- Project
- Class Test

PG - Critical, Analytical and Integrative Thinking

Our postgraduates will be capable of utilising and reflecting on prior knowledge and experience, of applying higher level critical thinking skills, and of integrating and synthesising learning and knowledge from a range of sources and environments. A characteristic of this form of thinking is the generation of new, professionally oriented knowledge through personal or group-based critique of practice and theory.

This graduate capability is supported by:

Learning outcomes

- Understand a range of generalizations of regression and how to apply them.
- Understand how linear models, time series models and various generalizations are applied and how empirical results are communicated in practice.
- Have a broad understanding of Panel Data Models and Dynamic Panel Data Models.
- Appreciate the relevance and limitations of the econometric methods used.

Assessment tasks

- Participation - class
- Tutorial questions
- Midterm
- Project
- Class Test

PG - Research and Problem Solving Capability

Our postgraduates will be capable of systematic enquiry; able to use research skills to create new knowledge that can be applied to real world issues, or contribute to a field of study or practice to enhance society. They will be capable of creative questioning, problem finding and problem solving.

This graduate capability is supported by:

Learning outcomes

- Understand a range of generalizations of regression and how to apply them.
- Understand how linear models, time series models and various generalizations are applied and how empirical results are communicated in practice.
- Have a broad understanding of Panel Data Models and Dynamic Panel Data Models.
- Appreciate the relevance and limitations of the econometric methods used.

Assessment tasks

- Participation - class
- Tutorial questions
- Project
- Class Test

PG - Effective Communication

Our postgraduates will be able to communicate effectively and convey their views to different social, cultural, and professional audiences. They will be able to use a variety of technologically supported media to communicate with empathy using a range of written, spoken or visual formats.

This graduate capability is supported by:

Learning outcome

- Understand how linear models, time series models and various generalizations are applied and how empirical results are communicated in practice.

Assessment tasks

- Participation - class
- Tutorial questions
- Project

PG - Engaged and Responsible, Active and Ethical Citizens

Our postgraduates will be ethically aware and capable of confident transformative action in relation to their professional responsibilities and the wider community. They will have a sense of connectedness with others and country and have a sense of mutual obligation. They will be able to appreciate the impact of their professional roles for social justice and inclusion related to national and global issues

This graduate capability is supported by:

Learning outcomes

- Understand how linear models, time series models and various generalizations are applied and how empirical results are communicated in practice.
- Appreciate the relevance and limitations of the econometric methods used.

Assessment task

- Participation - class

Research and Practice

- The unit is designed to equip students to embark on their individual career and/or higher degree research projects.
- A number of reading, writing and analytical tasks are set. Responses to some of these tasks are discussed in class, whereas others will be submitted for assessment. The tasks will teach students how to apply econometric techniques in practice.
- The unit is delivered in accordance with current academic teaching and learning pedagogies.
