Prerequisites

39cp at 100 level or above

Corequisites

Co-badged status

Unit description

This unit builds practical skills to mix music for a live audience. Lectures and production lab workshops develop the techniques necessary for DJ-ing and laptop performance. The broad objective is to develop students' awareness of mixing techniques in the live performance of electronic music, to develop creative skills in constructing studio-based DJ sets, and to collaborate creatively with colleagues. Students are introduced to Ableton Live software as a tool for laptop performance and production. This unit caters to a variety of skill levels with both beginning and advanced students welcome.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

Apply concepts of music design and theory to DJ performance

Critically analyse mixing technique and song selection

Select and deploy appropriate mixing techniques

Use mixing technologies

Demonstrate creativity through expressive techniques

Assessment Tasks

Name	Weighting	Hurdle	Due
Listening Test	35%	No	Week 6
Peer Assessment	20%	No	Weeks 10-12
Live Performance	45%	No	Weeks 10-12

Listening Test

Due: **Week 6**

Weighting: **35%**

Assessment Outline

This assessment tests an important skill practised by DJs: the ability to recognise when music has been edited, looped, sampled, remixed, or otherwise manipulated. Practice tasks (with answer sheets) will be available on iLearn from Week 1. The practice tasks and answer sheets will provide you with early feedback on your progress in this unit.

Requirements

The test will require you to use your own headphones.

In the Listening Test you will be given a series of extracts from various DJ mixes. The extracts will draw on songs from a playlist that you will have access to from Week 1. Your task will be to identify how the songs have been changed in the DJ mixes.

Submission Instructions

The Listening Test will take place in class time in Week 6. Answers will be written on a hard-copy sheet to be submitted by the end of the class. You may take up to 45 minutes to complete the test. Audio files will be played through headphones connected to the workstations in 10HA-223. **Please remember to bring your headphones with you.**

Assessment Criteria and Standards

Marks will be awarded according to the number of correct responses submitted. Please see iLearn for a full assessment rubric.

Example Tasks

Practice tasks (along with answer sheets) will be available on iLearn from Week 1. The Listening Test from 2017 will also be available on iLearn.

On successful completion you will be able to:

- Critically analyse mixing technique and song selection

Peer Assessment

Due: **Weeks 10-12**

Weighting: **20%**

Assessment Outline

For this assessment you will write peer-evaluations of nine (9) performances.

Requirements

- You must use the peer-evaluation sheet provided in class as a template.
- You will be assigned 9 performances to review. The schedule will be available on iLearn by 5pm Friday 21 September.
- The minimum word length per evaluation is 100 words. There is no upper word limit for this task.

Submission Instructions

Your peer-evaluation sheet must be submitted to Turnitin/iLearn on the day that you complete your final peer-review. The file that you submit should be named as follows:

[Surname - ID number - Peer-evaluation]

Example: Renzo - 44441234 - Peer-evaluation

Assessment Criteria and Standards

Peer-reviews will be assessed according to the following criteria:

- Number of reviews submitted.
- Ability to identify relevant strengths of each performance.
- Ability to identify potential areas for improvement in each performance.

Please see iLearn for a full assessment rubric.

Example Tasks

An example of a peer-review will be available on iLearn.

On successful completion you will be able to:

- Apply concepts of music design and theory to DJ performance
- Critically analyse mixing technique and song selection

Live Performance

Due: **Weeks 10-12**

Weighting: **45%**

Assessment Outline

In this assessment, you will perform a 10-minute DJ set using the Session View of Ableton Live. You will also liaise with other students ahead of time, to ensure that you 'mix into' your set smoothly. The performance schedule will be available on iLearn by 5pm Friday 21 September.

Requirements

- The Live Performance must last for 10 minutes. You may use up to 2 minutes extra for transitions to and from your set.
- Ableton Live's Session View must be used as the 'hub' for the set. Other controllers and devices may be used as supplements.
- You will need to liaise with the people playing before and after you, to ensure a smooth transition between DJ performances.
- All tracks must be high-quality audio files. Lossless formats such as WAV and AIFF are preferred, although MP3s encoded at 320kbps are also acceptable. Audio tracks ripped from YouTube clips are not acceptable for the purposes of this assessment.
- You may be required to attend a separate viva voce regarding this assignment, to elaborate on your preparation process.
- If you choose to use your own equipment for the performance, you are responsible for ensuring that your hardware and software are in good working order.
- You should keep at least 3 external back-ups of your work at all times. The hard drives of computers in the lab can be erased at any time, so these computers should not be used as back-up storage.
- IMPORTANT: Click 'Collect All and Save' before submitting your assignment.

Submission Instructions

- You must submit your Live Set to the two performance computers in 10HA-223 by 9.30am on the day of your performance. A performance schedule will be available on iLearn by 5pm Friday 21 September.

Assessment Criteria and Standards

Marks will be awarded according to the following criteria:

- Ability to apply concepts of music design and theory to DJ performance.
- Level of mixing techniques.
- Competence in the use of technologies.
- Creative adaptation of sound materials.
- Quality of self-assessment.

Please see iLearn for a full assessment rubric.

Example Tasks

Videos of Live Performances will be available on iLearn.

On successful completion you will be able to:

- Apply concepts of music design and theory to DJ performance
- Select and deploy appropriate mixing techniques
- Use mixing technologies
- Demonstrate creativity through expressive techniques

Delivery and Resources

Delivery Mode

This unit consists of online lectures and on-campus tutorials.

Class Times

Tutorials begin in Week 2 and take place in 10HA-223. For more details please see the MQ Timetables website: <http://www.timetables.mq.edu.au>

In Week 1, you should complete the "Listening Practice" tasks available on iLearn. This will provide you with early feedback on how you are progressing in this unit.

Required Technology

Ableton Live 9 Standard is available for student use on all computers in the lab. (External licences are not available.) You may use the lab to work on your assignments at any time that no class is being held in the room. The lab is open from 8am to 8pm, Monday to Friday. Please see MQ Timetables to check when the lab is free: <http://www.timetables.mq.edu.au>

If you choose to acquire Ableton Live 10, please note that you will need to use your own computer for the duration of the unit.

You will need to supply your own headphones for this course. The headphones do not need to be premium-grade DJ headphones, but they do need to cover your ears and give a fair representation of the full frequency range (please see iLearn for further details). You will need to use your own headphones in order to complete the Listening Test in Week 6.

You will need to supply your own data storage hardware. It is expected that you will regularly make three copies of your work on your own external hard drives, computers, and/or USB flash drives. Data on lab computers may be erased at any time, so these computers should not be used as a backup storage medium.

Hardware and Software Compatibility

It is students' responsibility to ensure that any work undertaken outside of the MMCCS is fully functional within and compatible with the Mac version of Ableton Live currently installed on the computers in the MMCCS labs. Additional VST instruments and effects not native to Ableton Live should not be used in submitted assignments unless you are also providing the hardware on

which such instruments will run.

Policies and Procedures

Macquarie University policies and procedures are accessible from [Policy Central \(https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central\)](https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central). Students should be aware of the following policies in particular with regard to Learning and Teaching:

- [Academic Appeals Policy](#)
- [Academic Integrity Policy](#)
- [Academic Progression Policy](#)
- [Assessment Policy](#)
- [Fitness to Practice Procedure](#)
- [Grade Appeal Policy](#)
- [Complaint Management Procedure for Students and Members of the Public](#)
- [Special Consideration Policy](#) (**Note:** *The Special Consideration Policy is effective from 4 December 2017 and replaces the Disruption to Studies Policy.*)

Undergraduate students seeking more policy resources can visit the [Student Policy Gateway \(https://students.mq.edu.au/support/study/student-policy-gateway\)](https://students.mq.edu.au/support/study/student-policy-gateway). It is your one-stop-shop for the key policies you need to know about throughout your undergraduate student journey.

If you would like to see all the policies relevant to Learning and Teaching visit [Policy Central \(https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central\)](https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central).

Student Code of Conduct

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: <https://students.mq.edu.au/study/getting-started/student-conduct>

Results

Results shown in *iLearn*, or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in [eStudent](#). For more information visit ask.mq.edu.au.

Additional Information

MMCCS website: https://www.mq.edu.au/about_us/faculties_and_departments/faculty_of_arts/department_of_media_music_communication_and_cultural_studies/

The MMCCS in-session re-mark application is available at: <http://www.mq.edu.au/pubstatic/public/download/?id=167914>

Information is correct at the time of publication.

Student Support

Macquarie University provides a range of support services for students. For details, visit <http://students.mq.edu.au/support/>

Learning Skills

Learning Skills (mq.edu.au/learningskills) provides academic writing resources and study strategies to improve your marks and take control of your study.

- [Workshops](#)
- [StudyWise](#)
- [Academic Integrity Module for Students](#)
- [Ask a Learning Adviser](#)

Student Services and Support

Students with a disability are encouraged to contact the [Disability Service](#) who can provide appropriate help with any issues that arise during their studies.

Student Enquiries

For all student enquiries, visit Student Connect at ask.mq.edu.au

IT Help

For help with University computer systems and technology, visit http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/.

When using the University's IT, you must adhere to the [Acceptable Use of IT Resources Policy](#). The policy applies to all who connect to the MQ network including students.

Graduate Capabilities

Creative and Innovative

Our graduates will also be capable of creative thinking and of creating knowledge. They will be imaginative and open to experience and capable of innovation at work and in the community. We want them to be engaged in applying their critical, creative thinking.

This graduate capability is supported by:

Learning outcomes

- Apply concepts of music design and theory to DJ performance
- Critically analyse mixing technique and song selection
- Select and deploy appropriate mixing techniques
- Use mixing technologies
- Demonstrate creativity through expressive techniques

Assessment tasks

- Listening Test
- Peer Assessment
- Live Performance

Discipline Specific Knowledge and Skills

Our graduates will take with them the intellectual development, depth and breadth of knowledge, scholarly understanding, and specific subject content in their chosen fields to make them competent and confident in their subject or profession. They will be able to demonstrate, where relevant, professional technical competence and meet professional standards. They will be able to articulate the structure of knowledge of their discipline, be able to adapt discipline-specific knowledge to novel situations, and be able to contribute from their discipline to inter-disciplinary solutions to problems.

This graduate capability is supported by:

Learning outcomes

- Apply concepts of music design and theory to DJ performance
- Critically analyse mixing technique and song selection
- Select and deploy appropriate mixing techniques
- Use mixing technologies
- Demonstrate creativity through expressive techniques

Assessment tasks

- Listening Test
- Peer Assessment
- Live Performance

Critical, Analytical and Integrative Thinking

We want our graduates to be capable of reasoning, questioning and analysing, and to integrate and synthesise learning and knowledge from a range of sources and environments; to be able to critique constraints, assumptions and limitations; to be able to think independently and systemically in relation to scholarly activity, in the workplace, and in the world. We want them to have a level of scientific and information technology literacy.

This graduate capability is supported by:

Learning outcomes

- Apply concepts of music design and theory to DJ performance
- Critically analyse mixing technique and song selection
- Select and deploy appropriate mixing techniques

- Use mixing technologies
- Demonstrate creativity through expressive techniques

Assessment tasks

- Listening Test
- Peer Assessment
- Live Performance

Problem Solving and Research Capability

Our graduates should be capable of researching; of analysing, and interpreting and assessing data and information in various forms; of drawing connections across fields of knowledge; and they should be able to relate their knowledge to complex situations at work or in the world, in order to diagnose and solve problems. We want them to have the confidence to take the initiative in doing so, within an awareness of their own limitations.

This graduate capability is supported by:

Learning outcomes

- Apply concepts of music design and theory to DJ performance
- Critically analyse mixing technique and song selection
- Use mixing technologies

Assessment tasks

- Listening Test
- Peer Assessment
- Live Performance

Effective Communication

We want to develop in our students the ability to communicate and convey their views in forms effective with different audiences. We want our graduates to take with them the capability to read, listen, question, gather and evaluate information resources in a variety of formats, assess, write clearly, speak effectively, and to use visual communication and communication technologies as appropriate.

This graduate capability is supported by:

Learning outcomes

- Critically analyse mixing technique and song selection
- Demonstrate creativity through expressive techniques

Assessment tasks

- Listening Test

- Peer Assessment
- Live Performance

Late Submissions

Listening Test

Unless a Special Consideration request has been submitted and approved, no late submissions will be accepted for the Listening Test. If your Special Consideration request has been approved, you will be advised how and when to sit a supplementary Listening Test.

Peer Assessment

Unless a Special Consideration request has been submitted and approved, no late submissions will be accepted for the Peer Assessment. If your Special Consideration request has been approved, you will be advised how and when to submit your Peer Assessment task.

Live Performance

Unless a Special Consideration request has been submitted and approved, no late submissions will be accepted for the Live Performance. If your Special Consideration request has been approved, you will be advised how and when to complete the Live Performance.
