Co-badged status

Unit description

The applied finance discipline has become more reliant on quantitative analysis in recent years. Increasingly, models employed by practitioners and researchers are based on assumptions about the stochastic properties of financial variables and time series. This unit covers a variety of stochastic models for use in applied finance and includes extensive use of Excel spreadsheets. The topics include discrete and continuous probability distributions, extreme events, joint probability distributions, copulas, Bayesian analysis, regression models, time series models, and risk-neutral pricing.

## Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

## Learning Outcomes

On successful completion of this unit, you will be able to:

Use a range of probability distributions to model different financial variables

Assess the dependence between financial variables with suitable statistical tools

Apply regression models and time series models to various financial time series  
Understand the basic concepts of no-arbitrage principle and risk-neutral pricing  
Perform mathematical computations on Excel spreadsheets for practical problems

## General Assessment Information

It is the responsibility of students to view their marks for each within session assessment on iLearn within 20 working days of posting. If there are any discrepancies, students must contact the unit convenor immediately. Failure to do so will mean that queries received after the release of final results regarding assessment marks (not including the final exam mark) will not be addressed.

Assessment criteria for all assessment tasks will be provided on the unit iLearn site.

## Assessment Tasks

Name	Weighting	Hurdle	Due
<u>Assessed Coursework</u>	20%	No	Throughout
<u>Class Test</u>	20%	No	Week 8
<u>Final Exam</u>	60%	No	Exam Period

### Assessed Coursework

Due: **Throughout**

Weighting: **20%**

Weekly questions should be attempted and the work will be collected in four (4) of the tutorials randomly throughout the semester, without prior notice. Marks will be granted for accuracy and clarity of the work submitted. At least one (1) assignments will be collected before Week 4 to provide early feedback.

No extensions will be granted. Students who have not submitted the task prior to the deadline will be awarded a mark of zero (0) for the task, except for cases in which an application for special consideration is made and approved.

It is the responsibility of students to view their marks for each within session assessment on iLearn within 20 working days of posting. If there are any discrepancies, students must contact the unit convenor immediately. Failure to do so will mean that queries received after the release of final results regarding assessment marks (not including the final exam mark) will not be

addressed.

Assessment criteria will be provided on the unit iLearn site.

On successful completion you will be able to:

- Use a range of probability distributions to model different financial variables
- Assess the dependence between financial variables with suitable statistical tools
- Apply regression models and time series models to various financial time series
- Understand the basic concepts of no-arbitrage principle and risk-neutral pricing
- Perform mathematical computations on Excel spreadsheets for practical problems

## Class Test

Due: **Week 8**

Weighting: **20%**

The class test covers the Excel applications in Week 1 to Week 6. Students will have one (1) hour to complete the test and submit their spreadsheets. Use of the Internet during the test is not permitted. Marks will be granted for accuracy and clarity of the work submitted. The class test will be conducted in the tutorial.

You are permitted one (1) A4 page of paper containing reference material printed on both sides. The material may be handwritten or typed. The page will not be returned to you at the end of the class test.

Students who do not attend the class test will be awarded a mark of zero (0) for the test, except for cases in which an application for special consideration is made and approved.

Assessment criteria will be provided on the unit iLearn site.

On successful completion you will be able to:

- Use a range of probability distributions to model different financial variables
- Assess the dependence between financial variables with suitable statistical tools
- Perform mathematical computations on Excel spreadsheets for practical problems

## Final Exam

Due: **Exam Period**

Weighting: **60%**

A two-hour (2) written exam will be held during the normal university exam period. Questions will cover the entire unit. Marks will be granted for accuracy and clarity of the work shown.

You are permitted one (1) A4 page of paper containing reference material printed on both sides. The material may be handwritten or typed. The page will not be returned to you at the end of the final exam. Non-programmable calculators with no text-retrieval capacity are permitted.

Students who do not attend the final exam will be awarded a mark of zero (0) for the exam, except for cases in which an application for special consideration is made and approved.

On successful completion you will be able to:

- Use a range of probability distributions to model different financial variables
- Assess the dependence between financial variables with suitable statistical tools
- Apply regression models and time series models to various financial time series
- Understand the basic concepts of no-arbitrage principle and risk-neutral pricing
- Perform mathematical computations on Excel spreadsheets for practical problems

## Delivery and Resources

The timetables for classes can be found on the University website at:

<https://timetables.mq.edu.au/2017/>

Tutorials (Excel workshops) will commence in Week 1.

The required textbook is:

Rachev S.T., Hoehstoetter M., Fabozzi F.J., and Focardi S.M., 2010, Probability and Statistics for Finance, John Wiley & Sons.

Lecture handouts are available for download from iLearn before lectures. Students are expected to read the handout and the corresponding textbook chapter(s) before each lecture.

Students will be required to use iLearn, Excel, PDF, Word, BUGS, and a non-programmable calculator.

## Unit Schedule

Week 1	Measures of Location and Spread
Week 2	Discrete Probability Distributions
Week 3	Basic Option Pricing Techniques
Week 4	Continuous Probability Distributions
Week 5	Modelling Extreme Events
Week 6	Joint Probability Distributions
Week 7	Copulas and Dependence Measures
Week 8	Bayesian Analysis
Week 9	Regression Models
Week 10	Time Series Models
Week 11	Risk-Neutral Pricing
Week 12	Professional Ethics
Week 13	Revision

## Policies and Procedures

Macquarie University policies and procedures are accessible from [Policy Central \(https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central\)](https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central). Students should be aware of the following policies in particular with regard to Learning and Teaching:

- [Academic Appeals Policy](#)
- [Academic Integrity Policy](#)
- [Academic Progression Policy](#)
- [Assessment Policy](#)
- [Fitness to Practice Procedure](#)
- [Grade Appeal Policy](#)
- [Complaint Management Procedure for Students and Members of the Public](#)
- [Special Consideration Policy](#) (**Note:** *The Special Consideration Policy is effective from 4 December 2017 and replaces the Disruption to Studies Policy.*)

Undergraduate students seeking more policy resources can visit the [Student Policy Gateway \(https://students.mq.edu.au/support/study/student-policy-gateway\)](https://students.mq.edu.au/support/study/student-policy-gateway). It is your one-stop-shop for the key policies you need to know about throughout your undergraduate student journey.

If you would like to see all the policies relevant to Learning and Teaching visit [Policy Central \(http://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central\)](http://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central).

## Student Code of Conduct

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: <https://students.mq.edu.au/study/getting-started/student-conduct>

## Results

Results shown in *iLearn*, or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in [eStudent](#). For more information visit [ask.mq.edu.au](http://ask.mq.edu.au).

## Supplementary exams

Information regarding supplementary exams, including dates, is available at:

[http://www.businessandconomics.mq.edu.au/current\\_students/undergraduate/how\\_do\\_i/disruption\\_to\\_studies](http://www.businessandconomics.mq.edu.au/current_students/undergraduate/how_do_i/disruption_to_studies)

## Student Support

Macquarie University provides a range of support services for students. For details, visit <http://students.mq.edu.au/support/>

## Learning Skills

Learning Skills ([mq.edu.au/learningskills](http://mq.edu.au/learningskills)) provides academic writing resources and study strategies to improve your marks and take control of your study.

- [Workshops](#)
- [StudyWise](#)
- [Academic Integrity Module for Students](#)
- [Ask a Learning Adviser](#)

## Student Services and Support

Students with a disability are encouraged to contact the [Disability Service](#) who can provide appropriate help with any issues that arise during their studies.

## Student Enquiries

For all student enquiries, visit Student Connect at [ask.mq.edu.au](http://ask.mq.edu.au)

## IT Help

For help with University computer systems and technology, visit [http://www.mq.edu.au/about\\_us/offices\\_and\\_units/information\\_technology/help/](http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/).

When using the University's IT, you must adhere to the [Acceptable Use of IT Resources Policy](#). The policy applies to all who connect to the MQ network including students.

## Graduate Capabilities

### Creative and Innovative

Our graduates will also be capable of creative thinking and of creating knowledge. They will be imaginative and open to experience and capable of innovation at work and in the community. We want them to be engaged in applying their critical, creative thinking.

This graduate capability is supported by:

#### Learning outcome

- Perform mathematical computations on Excel spreadsheets for practical problems

#### Assessment task

- Class Test

### Discipline Specific Knowledge and Skills

Our graduates will take with them the intellectual development, depth and breadth of knowledge, scholarly understanding, and specific subject content in their chosen fields to make them competent and confident in their subject or profession. They will be able to demonstrate, where relevant, professional technical competence and meet professional standards. They will be able to articulate the structure of knowledge of their discipline, be able to adapt discipline-specific knowledge to novel situations, and be able to contribute from their discipline to inter-disciplinary solutions to problems.

This graduate capability is supported by:

#### Learning outcomes

- Use a range of probability distributions to model different financial variables
- Assess the dependence between financial variables with suitable statistical tools
- Apply regression models and time series models to various financial time series
- Understand the basic concepts of no-arbitrage principle and risk-neutral pricing
- Perform mathematical computations on Excel spreadsheets for practical problems

#### Assessment tasks

- Assessed Coursework
- Class Test
- Final Exam

### Critical, Analytical and Integrative Thinking

We want our graduates to be capable of reasoning, questioning and analysing, and to integrate

and synthesise learning and knowledge from a range of sources and environments; to be able to critique constraints, assumptions and limitations; to be able to think independently and systemically in relation to scholarly activity, in the workplace, and in the world. We want them to have a level of scientific and information technology literacy.

This graduate capability is supported by:

## **Learning outcomes**

- Use a range of probability distributions to model different financial variables
- Assess the dependence between financial variables with suitable statistical tools
- Apply regression models and time series models to various financial time series
- Understand the basic concepts of no-arbitrage principle and risk-neutral pricing
- Perform mathematical computations on Excel spreadsheets for practical problems

## **Assessment tasks**

- Assessed Coursework
- Class Test
- Final Exam

## **Problem Solving and Research Capability**

Our graduates should be capable of researching; of analysing, and interpreting and assessing data and information in various forms; of drawing connections across fields of knowledge; and they should be able to relate their knowledge to complex situations at work or in the world, in order to diagnose and solve problems. We want them to have the confidence to take the initiative in doing so, within an awareness of their own limitations.

This graduate capability is supported by:

## **Learning outcomes**

- Use a range of probability distributions to model different financial variables
- Assess the dependence between financial variables with suitable statistical tools
- Apply regression models and time series models to various financial time series
- Understand the basic concepts of no-arbitrage principle and risk-neutral pricing
- Perform mathematical computations on Excel spreadsheets for practical problems

## **Assessment tasks**

- Assessed Coursework
- Class Test
- Final Exam

## **Changes from Previous Offering**

The class test has been moved from Week 7 to Week 8.
