Unit description

Negotiation involves influencing how people think, perceive, feel and behave. We apply these skills in every interaction, whether in the business environment, with our family, or in the world of international politics. The path to improving our negotiation performance involves adopting a mindset conducive for negotiations, learning theories, and developing skill in executing the right behaviour at the right time. This subject will increase students' awareness of the complex dynamics in human interaction and decision-making. The subject will draw on multiple disciplines in order to provide students with key theories and frameworks for managing that complexity in a wide range of different contexts. Students will also build practical skill in preparing for, conducting, and reviewing negotiations.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

Diagnose complex negotiation scenarios to determine appropriate negotiation goals, strategies, tactics and behaviours based on an informed assessment of risks and rewards.

Apply sophisticated problem-solving and collaboration skills in business and workplace negotiations to enable value creation.

Critically reflect on how assumptions, values, cognitive heuristics and cultural bias impact on negotiation sub processes such as decision making, goal setting and evaluating negotiated outcomes. Students will learn how to adapt their own negotiation behaviours when working in international and inter/intra-organisational cultures.

Deconstruct and evaluate negotiation outcomes and processes by applying a multi-disciplinary framework to aid a holistic negotiation debrief.

Apply a sophisticated stakeholder mapping process to fully identify and realize the potential value, risks and likely consequences for all parties in the ecosystem of concurrent and sequential negotiation processes that surround the manifest negotiation issues.

Define success in a manner that captures all aspects of value in a negotiation to increase value creation, reduce inequality in distribution of that value, and ultimately ensure greater sustainability of the negotiation process and of outcomes.

Group Work

Due: **23/2/18**

Weighting: **25%**

Team Debrief

Question

The major simulation provided your team with ample opportunity to apply a range of insights covered in this course. You had the opportunity to prepare, conduct and review as a team. Preparation took place both individually and as a team. You negotiated internally within the team and externally with the counter party. And the comprehensive review process shed light on what happened behind the scenes; what people perceived what they thought, how they felt, and the

intent behind their actions. In this report syndicate teams must write a formal debrief (one per team) about their team's approach to negotiation and draw out the key lessons for the team. You will be assessed on your ability to apply the insights covered in class, to diagnose and identify the key repeatable process lessons that will inform your future strategies. The focus is on what your team, not the counter party, needs to do differently to improve outcomes. The paper should contain academic references and a reference list

Assessment of Individual performance in Group Work will be based on the Group member contribution statement / Peer Evaluation subject to the final decision of the lecturer

*Please ensure all participants **full names**, the **unit code** (MGSM884), **unit name** (Negotiation: Theory & Practice), **lecturer** (Heys), as well as the **topic presented** is clearly visible on your presentation front page.*

On successful completion you will be able to:

- Diagnose complex negotiation scenarios to determine appropriate negotiation goals, strategies, tactics and behaviours based on an informed assessment of risks and rewards.
- Apply sophisticated problem-solving and collaboration skills in business and workplace negotiations to enable value creation.
- Critically reflect on how assumptions, values, cognitive heuristics and cultural bias impact on negotiation sub processes such as decision making, goal setting and evaluating negotiated outcomes. Students will learn how to adapt their own negotiation behaviours when working in international and inter/intra-organisational cultures.
- Deconstruct and evaluate negotiation outcomes and processes by applying a multi-disciplinary framework to aid a holistic negotiation debrief.
- Define success in a manner that captures all aspects of value in a negotiation to increase value creation, reduce inequality in distribution of that value, and ultimately ensure greater sustainability of the negotiation process and of outcomes.

Essay

Due: **5/3/18**

Weighting: **50%**

Students are to write a 2,500 word case analysis as follows:

Develop a case study of a recent negotiation you were involved in, observed as a stakeholder or supporter, or that you have studied from recent events or even from history (provide a short introduction describing the negotiation at the start of your paper). Your paper should then set up an analytical framework or apply a theory that explains some element of negotiation and use that framework to analyse the case. This paper asks you to 'test' or apply the framework or theory in what is to be an analytical case analysis. Your paper should build to convincing and well-drawn conclusions about both the framework/theory and the case. Sample frameworks will be

highlighted in class.

Note: If your assignment refers to commercially sensitive negotiations all company and individual names should be anonymised (changed to pseudonyms) to protect anonymity, especially important due to the use of Turnitin software submissions.

*Please ensure all participants **full names**, the **unit code** (MGSM884), unit name (Negotiation: Theory & Practice), **lecturer** (Heys), is clearly visible on your assignments.*

On successful completion you will be able to:

- Diagnose complex negotiation scenarios to determine appropriate negotiation goals, strategies, tactics and behaviours based on an informed assessment of risks and rewards.
- Critically reflect on how assumptions, values, cognitive heuristics and cultural bias impact on negotiation sub processes such as decision making, goal setting and evaluating negotiated outcomes. Students will learn how to adapt their own negotiation behaviours when working in international and inter/intra-organisational cultures.
- Deconstruct and evaluate negotiation outcomes and processes by applying a multi-disciplinary framework to aid a holistic negotiation debrief.
- Apply a sophisticated stakeholder mapping process to fully identify and realize the potential value, risks and likely consequences for all parties in the ecosystem of concurrent and sequential negotiation processes that surround the manifest negotiation issues.
- Define success in a manner that captures all aspects of value in a negotiation to increase value creation, reduce inequality in distribution of that value, and ultimately ensure greater sustainability of the negotiation process and of outcomes.

Learning Journal

Due: **TBA**

Weighting: **25%**

Students will receive a mark based on their class participation and also on the submission of a learning journal toward the end of the term. Class participation will be based on lecturer observations during class and also during the course simulations (including the students' contribution to the learning of other members of their syndicate group and of the class in general. Note this is based on quality of input – not simply on quantity).

The Learning Journal should be developed throughout the entire semester. Students are advised to take notes of any “aha moments” for the journal when they occur during the lectures, exercises, class discussions, feedback sessions as well as in interactions outside of class. For the assignment submission students should hand in a summary of that journal that focuses on answering the following questions:

1. “What have I learnt about myself as a negotiator during the semester?” This assignment should be a thoughtful reflection on how you have improved as a negotiator. You will be assessed on whether the marker believes you have developed the learning journal through the semester, on the sources you have drawn upon, and on the level of self-awareness that you demonstrate.
2. “In what areas do I need to improve my skills and how to I plan to continue improving as a negotiator?” You will be assessed based on the marker believes that the action plan is likely to make you a better negotiator, and whether you are likely to commit to following through on the plan.

The paper should contain academic references and a reference list.

Please ensure your **full name**, **student number**, **unit code** (MGSM884), **unit name** (Negotiation: Theory & Practice), and **lecturer** (Heys) is clearly visible on your assignment.

SUBMISSION FOR ALL ASSESSMENTS:

Submission for the assessments will be via soft copy in iLearn, via turnitin submission, unless instructed otherwise.

Further submission instructions/details will be sent via announcement in iLearn during the duration of the unit.

No extensions to submission dates will be granted without prior permission. Late submissions without permission will incur a penalty of 2 marks made from the total awarded mark for each 24 hour period or part thereof that the submission is late. This penalty does not apply for cases in which an application for disruption of studies is made and approved.

On successful completion you will be able to:

- Apply sophisticated problem-solving and collaboration skills in business and workplace negotiations to enable value creation.
- Critically reflect on how assumptions, values, cognitive heuristics and cultural bias impact on negotiation sub processes such as decision making, goal setting and evaluating negotiated outcomes. Students will learn how to adapt their own negotiation behaviours when working in international and inter/intra-organisational cultures.
- Apply a sophisticated stakeholder mapping process to fully identify and realize the potential value, risks and likely consequences for all parties in the ecosystem of concurrent and sequential negotiation processes that surround the manifest negotiation issues.
- Define success in a manner that captures all aspects of value in a negotiation to increase value creation, reduce inequality in distribution of that value, and ultimately ensure greater sustainability of the negotiation process and of outcomes.

Delivery and Resources

Students are encouraged to enrol in and undertake an online pre-work unit 'Negotiation and Conflict Resolution' available for free at the Open Universities Australia website Open2Study: <https://www.open2study.com/courses/negotiation-and-conflict-resolution>

The unit comprises 40 short videos (4hours in total) divided into 4 modules and comes with additional "tests" to assess your recall of the topics. This unit and readings from the course textbooks will provide students with an excellent introduction to key topics in this unit.

Graduate Capabilities

PG - Capable of Professional and Personal Judgment and Initiative

Our postgraduates will demonstrate a high standard of discernment and common sense in their professional and personal judgment. They will have the ability to make informed choices and decisions that reflect both the nature of their professional work and their personal perspectives.

This graduate capability is supported by:

Learning outcomes

- Diagnose complex negotiation scenarios to determine appropriate negotiation goals, strategies, tactics and behaviours based on an informed assessment of risks and rewards.
- Apply sophisticated problem-solving and collaboration skills in business and workplace negotiations to enable value creation.
- Critically reflect on how assumptions, values, cognitive heuristics and cultural bias impact on negotiation sub processes such as decision making, goal setting and evaluating negotiated outcomes. Students will learn how to adapt their own negotiation behaviours when working in international and inter/intra-organisational cultures.
- Deconstruct and evaluate negotiation outcomes and processes by applying a multi-disciplinary framework to aid a holistic negotiation debrief.
- Apply a sophisticated stakeholder mapping process to fully identify and realize the potential value, risks and likely consequences for all parties in the ecosystem of concurrent and sequential negotiation processes that surround the manifest negotiation issues.
- Define success in a manner that captures all aspects of value in a negotiation to increase value creation, reduce inequality in distribution of that value, and ultimately ensure greater sustainability of the negotiation process and of outcomes.

PG - Critical, Analytical and Integrative Thinking

Our postgraduates will be capable of utilising and reflecting on prior knowledge and experience, of applying higher level critical thinking skills, and of integrating and synthesising learning and knowledge from a range of sources and environments. A characteristic of this form of thinking is the generation of new, professionally oriented knowledge through personal or group-based critique of practice and theory.

This graduate capability is supported by:

Learning outcomes

- Diagnose complex negotiation scenarios to determine appropriate negotiation goals, strategies, tactics and behaviours based on an informed assessment of risks and rewards.

- Apply sophisticated problem-solving and collaboration skills in business and workplace negotiations to enable value creation.
- Critically reflect on how assumptions, values, cognitive heuristics and cultural bias impact on negotiation sub processes such as decision making, goal setting and evaluating negotiated outcomes. Changes from Previous Offering

Statement for extension and penalty for late assignment submission added.

Alignment with MGSM's mission-driven attributes

Leadership: The unit develops leadership skills to enable decision making in collegial environments where there is pressure to meet financial targets and competing priorities. It promotes creative problem-solving and collaboration skills.

Global mindset: The unit encourages reflection on the different cultural assumptions brought to a negotiation by those from different cultures, promoting more professional and culturally appropriate behaviours when doing business internationally or working in teams inter-culturally.

Citizenship: The unit gives consideration to a wide range of stakeholder perspectives and drivers, assisting me to consider how negotiators can incorporate the wider perspectives of others into negotiation strategies and outcomes and assess negotiation outcomes from a balanced perspective factoring in measures of performance beyond financial metrics.

Creating sustainable value: The unit encouraged me to reflect on the impact of different negotiation styles and approaches on long term relationships.

Attendance Policy (MGSM)

The interactive environment of the classroom is central to the MGSM experience. Students are required to attend the full duration of all classes for the units in which they are enrolled. We recognise that exceptional circumstances may occur, such as unavoidable travel on behalf of your organization or the serious illness or injury of you or a close family member.

Special consideration may be given for a maximum of 20% non-attendance for such circumstances as long as lecturers are contacted in advance, and supporting documentation provided, to request exemption from attendance. Failure to abide by these conditions may result in automatic withdrawal, with academic and/or financial penalty. The full Student Attendance Policy is published in the MGSM Student Handbook at <https://students.mgsm.edu.au/handbook>.
