Strategy Workbook

Due: **10 June 2018**

Weighting: **10%**

The strategy workbook component commences in the second session.

Students will apply concepts discussed in class to a product/company of their choice. Over the sessions, the Strategy Workbook will help students to identify the areas of marketing strategy that pose critical threats and opportunities to their chosen product/company. At the conclusion of the coursework, students will use the content of their strategy workbook as a starting point for their marketing strategy audit and plan.

On successful completion you will be able to:

- Critically analyse and evaluate existing internal and external customer and stakeholder relationships, to generate strategic marketing strategies that create and deliver sustainable value across complex networks.

MarkStrat Performance

Due: **Each Session**

Weighting: **15%**

Students will participate in the computer-based marketing management and strategy simulation Markstrat Online. It is a sophisticated marketing simulation that provides a challenging decision-making exercise in which complex strategic marketing decisions must be made within a competitive and realistic context. Students will participate in their allocated study group and, as a group, will manage their hypothetical firm in competition with other teams over the course of the

program. The objective of this exercise is to place students into a realistic operating environment that requires the integration of complex strategy, marketing research, planning and decision-making. Groups will be evaluated on the basis of their overall strategies and competitive results. Groups are expected to be democratic and self-managing. The decision rules of the game are detailed and extensive. Thus, it is essential that each student has access to a copy of the student manual and makes continual reference to it. The game requires seven decisions to be made simulating seven years of operations. Decisions will be made according to the program in this guide. Decisions must be received by due dates as the simulation closes at the time of the beginning of each lecture. Teams will also be expected to give an informal debrief outlining their initial strategies, where they went right (and wrong), their results and key conclusions.

The Markstrat licences will be supplied by MGSM. The licences and details will be distributed in the first class.

On successful completion you will be able to:

- Apply advanced strategic marketing frameworks and concepts to make strategic marketing decisions that are robust and well-informed and support the broader corporate strategy.
- Critically analyse and evaluate existing internal and external customer and stakeholder relationships, to generate strategic marketing strategies that create and deliver sustainable value across complex networks.
