Credit points
4

Prerequisites
Admission to MEng and 12cp at 600 level or above

Corequisites
ENGG805

Co-badged status

Unit description
Students in this unit will undertake a major project in the field of engineering, under the supervision of an academic member of staff. Where the work is carried out externally a suitable, industrially-based co-supervisor may be required. At the end of the work a comprehensive research report will be submitted. The communication vehicle for this unit is primarily focused on external, public engineering project team communications as would be found at an engineering conference or symposium or for a customer or supplier in the engineering design/supply chain.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at https://www.mq.edu.au/study/calendar-of-dates

Learning Outcomes

On successful completion of this unit, you will be able to:

Apply research principles, research methods, and technical standards to identify and provide solutions to complex problems in the required engineering discipline.
Identify, formulate and solve complex open-ended electrical engineering problems in an ethical manner.
Produce technical writing and presentations at a standard that would be acceptable in a professional engineering workplace.
Communicate research results through an effective written dissertation and oral presentation to a variety of audiences in research fora.
Undertake a complex engineering-specific research project and develop new knowledge, using appropriate technical and/or laboratory skills, data management and synthesis, critical analysis and interpretation of results.

General Assessment Information

Grading and passing requirement for unit

In order to pass this unit a student must obtain a mark of 50 or more for the unit (i.e. obtain a passing grade P/ CR/ D/ HD).

For further details about grading, please refer below in the policies and procedures section.

Hurdle Requirements

The thesis is a hurdle requirement. A grade of 50% or more on the thesis is a condition of passing this unit. If you are given a second opportunity to submit your thesis as a result of failing to meet the minimum mark required, your submission will be due during the supplementary examination period and will be notified of the exact day and time by the unit convenor. The second attempt at a hurdle assessment is graded as pass fail. The maximum grade for a second attempt is the hurdle threshold grade.

Regular meetings with thesis supervisor is a hurdle requirement. See details in assessment task description.

Late submissions and Re-submissions

Late submissions will attract a penalty of 10% marks per day. Extenuating circumstances will be considered upon lodgement of a special consideration application.

Resubmissions of work are not allowed after due date.

Assessment Tasks

Name	Weighting	Hurdle	Due
Thesis	70%	Yes	Week 13
Management and Engagement	10%	No	All Session

Name	Weighting	Hurdle	Due
Meetings with Supervisors	0%	Yes	Week 13
Poster Presentation	20%	No	Week 14-16

Thesis

Due: **Week 13**
Weighting: **70%**
This is a hurdle assessment task (see assessment policy for more information on hurdle assessment tasks)

Refer to iLearn for guidelines.

On successful completion you will be able to:

- Apply research principles, research methods, and technical standards to identify and provide solutions to complex problems in the required engineering discipline.
- Identify, formulate and solve complex open-ended electrical engineering problems in an ethical manner.
- Produce technical writing and presentations at a standard that would be acceptable in a professional engineering workplace.
- Communicate research results through an effective written dissertation and oral presentation to a variety of audiences in research fora.
- Undertake a complex engineering-specific research project and develop new knowledge, using appropriate technical and/or laboratory skills, data management and synthesis, critical analysis and interpretation of results.

Management and Engagement

Due: **All Session**
Weighting: **10%**

Students are required to actively engage with the project-related activities, and to demonstrate a professional demeanour towards project management and record-keeping. Students are also required to maintain a logbook for this unit, where dated records of day-to-day activities associated with the project are maintained. More guidelines are provided on iLearn.

On successful completion you will be able to:

- Apply research principles, research methods, and technical standards to identify and provide solutions to complex problems in the required engineering discipline.
- Identify, formulate and solve complex open-ended electrical engineering problems in an

ethical manner.
- Produce technical writing and presentations at a standard that would be acceptable in a professional engineering workplace.
- Communicate research results through an effective written dissertation and oral presentation to a variety of audiences in research fora.
- Undertake a complex engineering-specific research project and develop new knowledge, using appropriate technical and/or laboratory skills, data management and synthesis, critical analysis and interpretation of results.

Meetings with Supervisors

Due: **Week 13**
Weighting: **0%**
This is a hurdle assessment task (see assessment policy for more information on hurdle assessment tasks)

Students are expected to meet with their supervisor on a weekly basis, once the project commences. Such weekly meetings should aim to seek feedback and steer the project, and would normally last at least 15-30 minutes or more. In order to pass this unit, a student must attend at least 6 out of 12 weekly meetings between Week 1 to Week 12. In case a face-to-face meeting is not possible, a meeting must be conducted using telephone or video-conference. Meetings should be logged using the consultation meeting log sheet provided on iLearn.

On successful completion you will be able to:
- Apply research principles, research methods, and technical standards to identify and provide solutions to complex problems in the required engineering discipline.
- Identify, formulate and solve complex open-ended electrical engineering problems in an ethical manner.
- Produce technical writing and presentations at a standard that would be acceptable in a professional engineering workplace.
- Communicate research results through an effective written dissertation and oral presentation to a variety of audiences in research fora.
- Undertake a complex engineering-specific research project and develop new knowledge, using appropriate technical and/or laboratory skills, data management and synthesis, critical analysis and interpretation of results.

Poster Presentation

Due: **Week 14-16**
Weighting: **20%**

Refer to iLearn for guidelines

On successful completion you will be able to:

- Apply research principles, research methods, and technical standards to identify and provide solutions to complex problems in the required engineering discipline.
- Identify, formulate and solve complex open-ended electrical engineering problems in an ethical manner.
- Produce technical writing and presentations at a standard that would be acceptable in a professional engineering workplace.
- Communicate research results through an effective written dissertation and oral presentation to a variety of audiences in research fora.
- Undertake a complex engineering-specific research project and develop new knowledge, using appropriate technical and/or laboratory skills, data management and synthesis, critical analysis and interpretation of results.

Delivery and Resources

Unit Delivery

This is a project-based unit and has no scheduled lectures or tutorial sessions. Special lectures may be organised and related announcements will be made via iLearn.

Logbook

This unit requires a logbook. The students should maintain an individual logbook which should contain a dated log of day-to-day activities undertaken in relation to the project.

Technology Used and Required

The students are required to discuss with their supervisor about the software/hardware resources required for analysis, simulation, testing and experiments related to their project. In addition, word processing software (MS Word, Latex etc.) will be required to produce the preliminary thesis and MS PowerPoint or equivalent software will be required for presentation slides.

Unit Webpage: Access from the online iLearn System at http://ilearn.mq.edu.au

Required and Recommended Texts/Materials

There is not set textbook for this unit. The students are required to discuss with their supervisor regarding required/recommended reading materials, as suited to individual project needs.

Policies and Procedures

Macquarie University policies and procedures are accessible from Policy Central (https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central). Students should be aware of the following policies in particular with regard to Learning and Teaching:

- Academic Appeals Policy
- Academic Integrity Policy
- Academic Progression Policy
- Assessment Policy
- Fitness to Practice Procedure
- Grade Appeal Policy
- Complaint Management Procedure for Students and Members of the Public
- Special Consideration Policy *(**Note:** The Special Consideration Policy is effective from 4 December 2017 and replaces the Disruption to Studies Policy.)*

Undergraduate students seeking more policy resources can visit the Student Policy Gateway (https://students.mq.edu.au/support/study/student-policy-gateway). It is your one-stop-shop for the key policies you need to know about throughout your undergraduate student journey.

If you would like to see all the policies relevant to Learning and Teaching visit Policy Central (https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central).

Student Code of Conduct

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: https://students.mq.edu.au/study/getting-started/student-conduct

Results

Results published on platform other than eStudent, (eg. iLearn, Coursera etc.) or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in eStudent. For more information visit ask.mq.edu.au or if you are a Global MBA student contact globalmba.support@mq.edu.au

Student Support

Macquarie University provides a range of support services for students. For details, visit http://students.mq.edu.au/support/

Learning Skills

Learning Skills (mq.edu.au/learningskills) provides academic writing resources and study strategies to improve your marks and take control of your study.

- Workshops
- StudyWise
- Academic Integrity Module for Students
- Ask a Learning Adviser

Student Services and Support

Students with a disability are encouraged to contact the Disability Service who can provide appropriate help with any issues that arise during their studies.

Student Enquiries

For all student enquiries, visit Student Connect at ask.mq.edu.au

If you are a Global MBA student contact globalmba.support@mq.edu.au

IT Help

For help with University computer systems and technology, visit http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/.

When using the University's IT, you must adhere to the Acceptable Use of IT Resources Policy. The policy applies to all who connect to the MQ network including students.

Graduate Capabilities

PG - Capable of Professional and Personal Judgment and Initiative

Our postgraduates will demonstrate a high standard of discernment and common sense in their professional and personal judgment. They will have the ability to make informed choices and decisions that reflect both the nature of their professional work and their personal perspectives.

This graduate capability is supported by:

Learning outcomes

- Apply research principles, research methods, and technical standards to identify and provide solutions to complex problems in the required engineering discipline.
- Identify, formulate and solve complex open-ended electrical engineering problems in an ethical manner.
- Produce technical writing and presentations at a standard that would be acceptable in a professional engineering workplace.
- Communicate research results through an effective written dissertation and oral presentation to a variety of audiences in research fora.
- Undertake a complex engineering-specific research project and develop new knowledge, using appropriate technical and/or laboratory skills, data management and synthesis, critical analysis and interpretation of results.

Assessment tasks

- Thesis
- Management and Engagement

- Meetings with Supervisors
- Poster Presentation

PG - Discipline Knowledge and Skills

Our postgraduates will be able to demonstrate a significantly enhanced depth and breadth of knowledge, scholarly understanding, and specific subject content knowledge in their chosen fields.

This graduate capability is supported by:

Learning outcomes

- Apply research principles, research methods, and technical standards to identify and provide solutions to complex problems in the required engineering discipline.
- Identify, formulate and solve complex open-ended electrical engineering problems in an ethical manner.
- Produce technical writing and presentations at a standard that would be acceptable in a professional engineering workplace.
- Communicate research results through an effective written dissertation and oral presentation to a variety of audiences in research fora.
- Undertake a complex engineering-specific research project and develop new knowledge, using appropriate technical and/or laboratory skills, data management and synthesis, critical analysis and interpretation of results.

Assessment tasks

- Thesis
- Management and Engagement
- Meetings with Supervisors
- Poster Presentation

PG - Critical, Analytical and Integrative Thinking

Our postgraduates will be capable of utilising and reflecting on prior knowledge and experience, of applying higher level critical thinking skills, and of integrating and synthesising learning and knowledge from a range of sources and environments. A characteristic of this form of thinking is the generation of new, professionally oriented knowledge through personal or group-based critique of practice and theory.

This graduate capability is supported by:

Learning outcomes

- Apply research principles, research methods, and technical standards to identify and provide solutions to complex problems in the required engineering discipline.

- Identify, formulate and solve complex open-ended electrical engineering problems in an ethical manner.
- Produce technical writing and presentations at a standard that would be acceptable in a professional engineering workplace.
- Communicate research results through an effective written dissertation and oral presentation to a variety of audiences in research fora.
- Undertake a complex engineering-specific research project and develop new knowledge, using appropriate technical and/or laboratory skills, data management and synthesis, critical analysis and interpretation of results.

Assessment tasks

- Thesis
- Management and Engagement
- Meetings with Supervisors
- Poster Presentation

PG - Research and Problem Solving Capability

Our postgraduates will be capable of systematic enquiry; able to use research skills to create new knowledge that can be applied to real world issues, or contribute to a field of study or practice to enhance society. They will be capable of creative questioning, problem finding and problem solving.

This graduate capability is supported by:

Learning outcomes

- Apply research principles, research methods, and technical standards to identify and provide solutions to complex problems in the required engineering discipline.
- Identify, formulate and solve complex open-ended electrical engineering problems in an ethical manner.
- Produce technical writing and presentations at a standard that would be acceptable in a professional engineering workplace.
- Communicate research results through an effective written dissertation and oral presentation to a variety of audiences in research fora.
- Undertake a complex engineering-specific research project and develop new knowledge, using appropriate technical and/or laboratory skills, data management and synthesis, critical analysis and interpretation of results.

Assessment tasks

- Thesis

- Management and Engagement
- Meetings with Supervisors
- Poster Presentation

PG - Effective Communication

Our postgraduates will be able to communicate effectively and convey their views to different social, cultural, and professional audiences. They will be able to use a variety of technologically supported media to communicate with empathy using a range of written, spoken or visual formats.

This graduate capability is supported by:

Learning outcomes

- Apply research principles, research methods, and technical standards to identify and provide solutions to complex problems in the required engineering discipline.
- Identify, formulate and solve complex open-ended electrical engineering problems in an ethical manner.
- Produce technical writing and presentations at a standard that would be acceptable in a professional engineering workplace.
- Communicate research results through an effective written dissertation and oral presentation to a variety of audiences in research fora.
- Undertake a complex engineering-specific research project and develop new knowledge, using appropriate technical and/or laboratory skills, data management and synthesis, critical analysis and interpretation of results.

Assessment tasks

- Thesis
- Management and Engagement
- Meetings with Supervisors
- Poster Presentation
