Unit description

This unit examines the external forces (behaviour of customers, initiatives of competitors, emergence of new laws and regulations) that shape the environment of an organisation. The unit is also concerned with the internal ambitions and concerns (desire for growth, design of processes, competency of employees, financial resources) that exist within an organisation. Specifically, the unit considers the factors relevant in establishing the strategic position of a business in the present and as predicted in the future using relevant forecasting techniques. It is primarily concerned with the impact of the external environment on a business, its internal capabilities and expectations, and how the organisation positions itself subject to these constraints.

### Assessed Coursework

Due: **Throughout**

Weighting: **15%**

#### Task Description:

Homework exercises form a critical part in the study process, as they serve to reinforce concepts that are covered in class or online. Students have often failed a unit as they do not follow a disciplined approach over the session. To this end, students will be required to attend seminars with their weekly homework. The teaching staff will check that these are satisfactorily attempted.

The teaching staff will assess weekly homework on six (6) occasions without prior notice. Marks are awarded for the original effort, completeness and evidence that corrections are made as appropriate.

The homework component will be worth 12%, with each submission counting for 2%. The remaining 3% will be based on the quality and frequency of the student's seminar participation.

Students should be prepared to engage constructively in open discussions on relevant topical issues.
