Lectures may make use of PowerPoint; overhead projectors; visualisers.

Unit material is available on the learning management system (iLearn)

Students should take responsibility for their own learning and this will incorporate reading as required, attendance at classes, developing effective study strategies, reflection on their abilities, and a task oriented approach to assessment – that is, do not think solely about gathering information/content - think about what you are required to do with that information/content, what makes for successful performance in your (various) assessments.,how you will use the law you have studied.

There are 2 main components of successful business and corporations law study: one is that students must have some knowledge of the core issues of the relevant topics [take short clear notes in classes, think about your task, involve yourself in classes], the second is that students will only be successful if they can apply what they have learned. That is, in class, your assignment, or in the exam, you have to be able to use the law to communicate, analyse, interpret and explain.

Students should be ready to allocate at least 150 hours during session time for BUSL250. This includes all classes, assessment, personal study and other learning activities.
