This is a program designed to give you an understanding of the issues that are apparent in the modern day workplace. Those issues that affect all businesses, government and Not-for-Profit organisations are set in a Global context and with respect for the need to include Sustainability in all our endeavours. Future-ready graduates should be prepared for work around the globe not just locally. Sustainability is no longer a catchphrase, it is an expectation. Business education requires you to align yourself with industry expectations on employability and sustainability and this will only increase as your career develops!

Research and Practice

The content of this unit has been developed with the input from various stakeholders (including academics and Career Professionals) at Macquarie University. Contribution from academic theorists in the way of academic papers and articles will be well utilised throughout the Unit. This will include the latest contemporary views of career management and professional behaviours.

The unit includes a guided progression from self awareness inclusive of personality profiling and individual learning styles; to the concept of group work/teamwork as a common thread of project based activities in all organisations; to the identification of the individual's potential career path and how those paths should be pursued.
